Author: David Sobecki
ISBN: 9780077488260

After many years as developmental math coordinator at Miami Hamilton, I share the frustration that goes along with low pass rates in the developmental math curriculum. Like so many instructors across the country, I believe the time is right to move beyond the one-size-fits-all curriculum that treats students the same whether they hope to be an engineer or a pastry chef. When not teaching or writing, my passions include Ohio State football, Cleveland Indians baseball, heavy metal music, travel, golf, and home improvement. Allan G. He has taught mathematics and statistics for over 35 years. He received an Apple for the Teacher award in recognition of his bringing excellence to the learning environment at South Campus. Al Bluman is married and has two sons and a granddaughter. Your email address will not be published. These include biographical vignettes about famous mathematicians as well as other interesting facts that emphasize the importance of math in areas like weather, photography,

music, and health.

This helps students relate mathematical concepts presented in a section and the real life relevance of something familiar to them, increasing both student interest and motivation. The latest edition brings many brand new and updated application exercises in each chapter, ranging in topics from MP3 player usage, degree majors, elections, relevant business decisions, and scenarios involving popular statistics.

An Index of Applications is located immediately after the Detailed Table of Contents, and is organized by discipline to help identify applications relevant to specific fields. Learn more.
