

SMART TRADE SHOWS TURN INTO SMART TRADE CENTERS

Executive Summary

The Global Trading Network & Numondo Trading PLC – have been focused on our mission to

connect the dots between African countries and the US. With our regional focus in Ethiopia, Ghana, Atlanta, DC, Seattle and Los Angeles. We will scale our program by using our dynamic Smart Trade Shows. We will use all of our technology expertise to enhance & maximize the success of our trade shows, this will give investors a proof of concept as each tradeshow is an example of global commerce that can occur daily at a Smart Trade Center in Addis Ababa or Atlanta Georgia.

We will expand our trade shows regionally throughout the US, Ethiopia, other African countries and the Caribbean and the world wherever there is a distressed economy. The Brains of our **SMART TRADE CENTER CONCEPT is our UFUMBUZI APP WITH DASHBOARD & OUR WEBSITES THAT CONNECTS CLIENTS BETWEEN CONTINENTS.**

We are working jointly with the organizations, governments, and people of several African countries in a Rebranding campaign to streamline the import and export processes between

African Countries and the US. Let's design a MOU and discuss a long term Trade Show/Conference system leading to a full Tradecenter in your region. Our guiding principle is, “we don't invent the wheel; we focus on streamline and improving systems.” What is needed is our AI, APP and websites that streamline our Logistics, Distribution & Infrastructure. Our soft infrastructure & state of the art business offices and transportation systems in multiple countries, specifically the U.S. & African countries and several regions in each country, training programs, transportation agreements, fulfillment centers, well trained sales staff, and

customer support. This allow us to capture market share & take advantage of the African Growth and Opportunity Act (AGOA) and “favored nation” status from the IMF and World Bank, plus all of the other things needed to provide our customers with great products at a great price, where they want and when they want on an ongoing, sustainable basis.
