### **Product description**

Activate and revitalize the body!

The application of BIO-Energetic Back Tape causes energy vibrations, which activate the self-healing process, and can thus cause a positive change through the activation of all body cells, which in turn can have a positive effect on the spine itself.

The effect of the BIO-Energetic Back Tape is based purely on a bioenergetic basis by subtle harmonisation of natural energy oscillations.

### **Application:**

Position 3 times a week for two hours at the base of the spine (for example: Monday, Wednesday and Friday).

#### Note:

The BIO-Energetic-Back Tape is "informed" about a particular process, so that the body's cells are energized during use, which can lead to the activation of the self-healing processes. The BIO-Energetic-Back Tape can be used in combination with professional medical care such as physiotherapy etc.

#### **Customer Testimonials:**

"For days I had a pulling or stabbing pain in my right shoulder. Normally, not too much, but this time it was pretty bad and it wouldn't go away!

At the suggestion of the developer, I tried out the back tape, it has then been attached to the area in question. I could feel some relief in the first10 minutes so I got on with my days work and tried to forgot or focus on any change phenomena. After a half-hour approached, I realized that the pain had completely disappeared! It was not a feeling of numbness, like taking pills, nor a feeling like any other unnatural sensations ..my shoulder felt quite normal! Even after dislocations that have previously caused me pain, I could not force the pain!

As per your other products in relation to Bio-Energetics, I hope that your company gets the recognition it truly deserves! To develop and offer products namely for the environment and man kind!

Melin Tafro, Burgkirchen, tafro@gmx.at

"There are two things that happen to me every now and then. One is when again something is triggered in the lumbar region through a clumsy movement and draws a day long aching discomfort for myself. I placed the back tape and left for hours. Then the problem was completely gone (alternatively I could possibly just need to rest a few days lying down, so that the body calms down).

The second is that since an accident my connective tissue every now and then is so warped that my hip gave rise to constrictions in the chest and tension in the neck. So I recently stuck here too the tape in the lumbar region (and again for hours left it in place). As a result, the chest cavity is opened substantially, no more boxed breathing, and overall my body was relaxed so that I could still achieve more flexibility with the usual yoga exercise. The depth work has taken over the..... osteopath. Great product and good for my case as I have for emergencies!

"Dragana Matic, stimmtraining@gmail.com

Thanks for the great product, it's definitely an emergency patch to have with you!

A customer who again can walk up the stairs thanks to the back tape, reported;

"I checked with my doctor to ask could I use the" Back Tape "and he said to go ahead and try it.

Let me tell you a little bit about what's wrong with me right now. In 2003 I broke my L4, L5 while being at work. I made a full recovery within six months, and went back to work. In the course of five years I broke three more discs. I had to stop working and started using a cane for walking. I can only lift up to 10 pounds and I am always in excruciating pain. Usually my pain level is between 6.5-8.

The reason why I wanted to try the back tape was my left shoulder, which started to hurt since February 2015 and it got increasingly painful to where it started going numb frequently in my arm. I could not lift my arm above my shoulder.

After the application of the back tape first I felt a little better and by the third application the left shoulder pain and numbness went away completely. My back pain level was now at a 5 out of 10!

After the fifth application, I wanted to check out how much pain it would be for me to walk up stairs. Previously, in the past 10 years, I have avoided stairs because of the pain. Now, holding the cane in my hand and not needing to use it, I went up 3 flights of stairs with no additional pain or strain!

I can't wait till the eight weeks are over to see how I am feeling after I use the whole package. Right now I am feeling pretty good. Thank you so much! Very happy & I am in your debt.

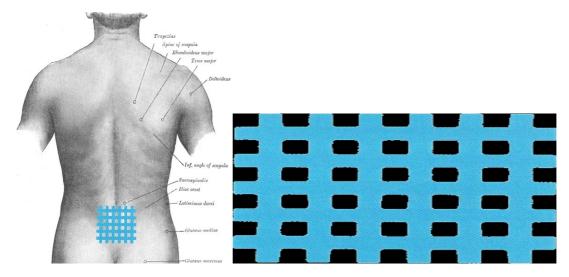

D. Rowland, 26 October 2015, Seattle WA USA

Our unique & patented Bio-Energetic Back Tape has been designed with the health professional in mind and can be used to enhance the various therapies that they already provide to their patients. The tape is used to treat back problems and in particular Scoliosis with the main aim being to use the tape on children in order that problems of the spine are corrected early on.

Bio-Energetic Back Tape can also be used successfully by adults and is very effective in reducing pain and its design enables it to be used by patients in their own home between visits to their physiotherapist etc.

Additional information in relation to test results obtained over a number of years using the back tape on school children is included in this presentation.

# Projektbeschreibung

Nach finnischem Vorbild wurde bei den Schülern die Wirbelsäule prophylaktisch therapiert.

Schüler, Eltern, Lehrer, Therapeuten, Trainer, Schularzt und Gemeindevertreter arbeiteten bei diesem Projekt in optimaler Kooperation mit.

Nach dem Wirbelsäulenpass, einer genauen Statusanalyse wurden die Kinder 6 mal mit der energetischen Wirbelsäulen-Rückenliege therapiert, zudem wurden in Kleingruppen spezielle Übungen für die Wirbelsäule und für die Beinachsen und Füße erarbeitet, die die Schwächen beheben sollen und danach folgte wieder eine Folgeanalyse. Die Ergebnisse daraus können Sie auf den weiteren Seiten sehen. Weiters wurde mit einer Trainerin 6 mal Kinderyoga gemacht.

Den Eltern und Lehrern wurde als Vorbildfunktion das richtige Sitzen, Heben, Tragen, Stehen usw. vermittelt, damit sie dies mit den Kindern umsetzen können.

Das Projekt wird nun fortgesetzt, bis die Kinder wieder einen optimal freien Zustand an der Wirbelsäule erreicht haben.

----

Following the Finnish model, the spine was treated prophylactically across the students.

Students, parents, teachers, therapists, coaches, the school doctor and community representatives worked with optimal co-operation on this project.

After the spine inspection and a precise status analysis, the 15 children were treated with the energetic spine back deck, and also had special exercises for the spine, leg axis and feet and they worked in small groups to resolve the weaknesses and then there followed a further analysis. The results from this you can see on the following pages. Furthermore, these results were obtained with a trainer applying children's yoga.

The parents and teachers were shown how to sit properly, lifting, carrying, standing, etc so as to be role models so that they can implement it with the kids.

The project was to be continued until the children returned to an optimal condition of the spine.

### **Project Description**

Following the Finnish model, the spine was treated prophylactically across the students.

Students, parents, teachers, therapists, coaches, the school doctor and community representatives worked with optimal co-operation on this project.

After an accurate analysis of the status of children they were treated 6 times on the energetic

spine back deck and this was followed by further analysis.

The results from this you can see on the following pages.

Accompanying parents and teachers were shown how to sit properly, lifting, carrying standing, etc.

This was conveyed so that they can implement it with the children as role models. Across the students a short program of 'spinal gymnastics' was developed in the class.
