Summer 2017

Pearson Edexcel GCE In Biology Spec A (9BN0) Paper 03 General and Practical Applications in Biology

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information, please visit our website at <u>www.edexcel.com</u>.

Our website subject pages hold useful resources, support material and live feeds from our subject advisors giving you access to a portal of information. If you have any subject specific questions about this specification that require the help of a subject specialist, you may find our Ask The Expert email service helpful.

Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: <u>www.pearson.com/uk</u>

Summer 2017 Publications Code 9BN0_03_1706_MS All the material in this publication is copyright © Pearson Education Ltd 2017

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question Number	Answer		Additional Guidance	Mark
1(a)	A description that makes reference to the following:		Biodegradable / can decompose must be qualified if given as both an advantage and a disadvantage	
	 Advantage – being sustainable / {can decompose / is biodegradable} 	(1)	ALLOW renewable or more plants can be grown	
	 Disadvantage – less strong / {can decompose/ is biodegradable } 	(1)		(2)

Question Number	Answer	Additional Guidance	Mark
1(b)	An answer that makes reference to the following:		
	 the (pulling) force the fibre can withstand before breaking (1) 	ALLOW mass or weight instead of force	(1)

Question Number	Answer		Additional Guidance	Mark
1(c)	An answer that makes reference to four of the following:			
	• pieces of rope of same length and {width / diameter } (1)		
	 (stored at) a range of temperatures above and below 18°C (3) 	C 1)		
	• humidity at 60% / ropes stored for same period of time (:	1)		
	• {masses / force / weights} applied until rope breaks (1	1)		(4)
	calculate change in tensile strength	1)		()

Question Number	Answer	Additional Guidance	Mark
1(d)	An answer that makes reference the following:	ALLOW correctly labelled diagram	
	 sclerenchyma (fibres) on the outer side of the {vascular bundle / phloem} (1) 	ALLOW sclerenchyma outside vascular bundle	
	 xylem (vessels) on the {inner side / inside} of the vascular bundle (1) 	ALLOW xylem in the vascular bundle	(2)

Question Number	Answer	Additional Guidance	Mark
2(a)	 A description that makes reference to the following: women requiring {pain relief / surgical intervention} (when they gave birth) condition of mothers 	e.g. same age / same number of	
		babies / no pre-existing pain medication / same gestation period	(2)

Question Number	Answer	Additional Guidance	Mark
2(b)	An explanation that makes reference to the following:		
	• {control / placebo} (1)		(2)
	 to allow a comparison with {A and B / the other groups} (1) 		1

Question Number	Answer	Additional Guidance	Mark
2(c)	An answer that makes reference to the following:		
	• TENS provides pain relief (1)	ALLOW TENS is effective	
	 high frequency {most effective / more effective than low frequency} (1) 		
	 quantified difference between before TENS and after TENS to show that A was the largest (1) 	{4.8 / 65.8%} pain relief reduction for group A but only {2.8 /38.4% for group B} / {2.3 / 37.7% for group C}	(4)
	 there was overlap between the {low frequency TENS / B} and {TENS with no pulses / placebo / control / C} 		(+)

Question Number	Answer	Additional Guidance	Mark
2(d)	A description that makes reference to four of the following:		
	 (repeated stimulus) decreases {sensitivity / permeability} of pre-synaptic membrane / calcium channels not opening (1) 	ALLOW calcium channels less or not responsive	
	• so {fewer / no} Ca ²⁺ ions move into pre-synaptic neurone (1)		
	 so {fewer / no} vesicles {move towards / fuse with} (pre- synaptic) membrane (1) 		
	 so {less / no} neurotransmitter {released / can diffuse across gap} (1) 		
	 {action potential / depolarisation} less likely to occur in post- synaptic neurone (1) 		(4)

Question Number	Acceptable Answer	Additional Guidance	Mark
3(a)(i)	An answer that makes reference to the following:		
	 as heart rate increases, so does incidence of {both conditions / CHD and cancer } (1) 	ALLOW converse	
	• relationship between heart rate and CHD quantified (1)	e.g. 1.95x increase up to 99 bpm / 1.88x increase at >99	
	• relationship between heart rate and cancer quantified (1)	e.g. 4.0x increase up to 99 bpm / 3.8x increase at >99	
	 greater increase in incidence of cancer with increased heart rate (1) 	ALLOW converse	(5)
	 at a heart rate >99bpm there is a reduction in incidence of both conditions / plateaus / little difference (1) 		(5)

Question Number	Answer	Additional Guidance	Mark
3(a)(ii)	 An answer that makes reference to the following: mid heart beat rate is more common in the (general) population / heart rate is normally distributed in the population 	ALLOW high and low heart rates are less common	
	 fewer people available at low and high heart rate because of other health risks 		(2)

Question Number	Answer		Additional Guidance	Mark
3(a)(iii)	An answer that makes reference to two of the following	ng:		
	 still (statistically) a large sample size 	(1)		
	 wide range of heart rates considered 	(1)		(2)
	 percentage incidence used (rather than number) 	(1)		

Question Number	Answer	Additional Guidance	Mark
3(b)	A description that makes reference to three of the following:		
	 {nucleus / nuclear envelope / nucleous} breaks down (1) 	IGNORE chromatin	
	• spindle (fibres) formed (1)		
	• {chromosomes / chromatids} condense (1)	ALLOW become visible	(3)
	• Centrioles migrate to (opposite) poles of the cell (1)	ALLOW opposite ends	

Question Number	Answer	Additional Guidance	Mark
4(a)(i)		Example of calculation	
	• correct answer to four significant figures (1)	6.44 ÷ 10 = 0.644 (mm)	(1)

Question Number	Answer		Additional Guidance	Mark
4(a)(ii)	An explanation that makes reference to the following:			
	 divide change in mean length by time 	(1)	ALLOW (growth) rate = change in mean length ÷ time	(2)
	 comparison between the rate for 3% and 5% 	(1)	ALLOW grow faster in 5%	

Question Number		Answer		Additional Guidance	Mark
4(b)(i)	•	(symmetrical) bell-shaped curve drawn	(1)		
					(1)

Question Number	Answer	Additional Guidance	Mark
4(b)(ii)	• specimen 7 = 1.277		
	AND		(1)
	$\Sigma x_1^2 = 12.198$ (1)		

Question Number	Answer	Additional Guidance	Mark
4(b)(iii)		Example of calculation	
	• Top line of formula correctly calculated (1)	9.055 – 9.006	
	• correct answer to two significance figures (1)	= $0.0054 / 0.00544 / 5.4 \times 10^{-3}$	(2)

Question Number	Answer	Additional Guidance	Mark
4(b)(iv)		Example of calculation	
	• top line of formula correctly calculated (1)	0.153	
	• bottom line of formula correctly calculated (1)	0.0336 (0R 0.0337 if 0.00544 used)	
	 correct answer to between three and five significant figures (1) 	= 4.55 (OR 4.54 if 0.00544 used)	
		ALLOW answer between 4.5510 and 4.5540	
		Correct answer with no working gains full marks	(3)

Question Number	Answer	Additional Guidance	Mark
4(b)(v)	An explanation that makes reference to the following:		
	 there was a significant difference between {the 3% and the 5% salt solution / groups} (1) 	IGNORE significant correlation / significant relationship	
	• at the 5% significance level (1)	ALLOW 95% probability there is a difference e.g. '5% chance that the difference is due to chance' or with 95% certainty' IGNORE $p = 0.05$	(2)

Question Number	Answer	Additional Guidance	Mark	
5(a)	An answer that makes reference to the following:	ALLOW phonetic spelling	(1)	
	• thylakoid membrane / grana / granum (1)	ALLOW lamella	(1)	

Question Number	Answer	Additional Guidance	Mark
5(b)	An answer that makes reference to five of the following:		
	• variable {heights / altitude} (1)		
	• {collecting / growing} plants for each sample (1)	ALLOW reference to plant material in place of plants	
	• standardising plant material to be analysed (1)	e.g. same mass / same part of plant	
	• other abiotic factors taken into account (1)	e.g. humidity, wind speed, soil moisture, soil pH	
	• method of extraction of pigment (1)	e.g. use of solvent	(5)
	• method to measure pigment (1)	e.g. use of colorimeter	

Question Number	Answer		Additional Guidance	Mark
5(c)(i)	An answer that makes reference to the following:			
	Similarities:			
	 exposure to UV-B for 20 mins decreases both (mean chlorophyll and flavonoid content) 	(1)		
	Differences:			
	 (longer than 20 min) exposure to UV-B causes chlorophy 	'll to		
	decrease and flavonoid to increase	(1)		(3)
	greater change in flavonoid content	(1)		

Question Number	Answer		Additional Guidance	Mark
5(c)(ii)	An answer that makes reference to five the following:		ALLOW converse statements	
	• higher altitude more flavonoids synthesised (1)	ALLOW greater expression of the	
	• DNA protected from UV-B (1	1)	havonola gene at nigher altitude	
	• reduced risk of mutations (so more growth) (1	1)		
	• reduced chlorophyll (due to more UV-B) (1)		
	• reduced photosynthesis (so less growth) (:	1)		
	• reduced enzyme activity (so less growth) (:	1)		(5)

Question Number		Answer		Additional Guidance	Mark
6(a)				Example of calculation	
	•	width of X to Y \div magnification	(1)	50(mm) ÷ 5 000 000 / 5(cm) ÷ 5 000 000	(2)
	•	correct answer with appropriate units	(1)	10 nm / 0.01 µm	(2)

Question Number	Answer
6(b)	Answers will be credited according to candidates' deployment of knowledge and understanding of material in relation to the qualities and skills outlined in the generic mark scheme.
	The indicative content below is not prescriptive and candidates are not required to include all the material which is indicated as relevant. Additional content included in the response must be scientific and relevant.
	 Comparisons between phospholipid bilayer and proteins in the cell surface membrane: judgement about the relative importance of the phospholipid bilayer and the proteins within that bilayer
	Use of data: most proteins in the cell are associated with the cell membrane
	 Whilst qualitates of phospholipid are the same the proteins have more functions Importance of proteins in the cell surface membrane: immune response e.g. as antigens and therefore body defence, antibodies, MHC proteins receptors e.g. receptor proteins on tip of sperm allowing acrosome reaction when encounters zona, for neurotransmitters regulation e.g. with regards to hormones such insulin signal / transcription e.g. transcription factors, secondary messengers transport e.g. active transport, as channel proteins allowing facilitated diffusion, as {voltage-gated / eq} channels for the nerve impulse / resting potential or / and role of Na⁺-K⁺ pump
	 Importance of phospholipid bilayer in some of: the role of fluidity and structure of cell the membrane inhibiting polar substances moving across due to having a hydrophobic component having both hydrophilic and hydrophobic components which leads to the separation of the aqueous contents of the cell from its aqueous external surroundings allowing diffusion of gases directly across it myelin sheath / nerve impulse

Level	Marks	Descriptor	Additional guidance
0		No awardable content	
1	1-3	An explanation may be attempted but with limited interpretation or analysis of the scientific information with a focus on mainly just one piece of scientific information.	Discussion of one type of membrane protein linked to its role May have lots of irrelevant information
-	1 5	The explanation will contain basic information with some attempt made to link knowledge and understanding to the given context.	Hay have lots of inclevant information
2	4-6	An explanation will be given with occasional evidence of analysis, interpretation and/or evaluation of more than one piece of scientific information.	Discussion of more than one membrane protein linking them to their function Also discussing the role of phospholipids
		The explanation shows some linkages and lines of scientific reasoning with some structure.	
		An explanation is made which is supported throughout by sustained application of relevant evidence of analysis, interpretation	Good discussion of role of proteins and phospholipids – reaching a judgement
3	7-9	and/or evaluation of several pieces of scientific information.	Linking role of proteins and phospholipids
		The explanation shows a well-developed and sustained line of scientific reasoning which is	Number of specific examples of membrane proteins
		clear and logically structured.	Very little if any irrelevant information

Question Number	Answer	Additional Guidance	Mark
7(a)	An explanation that makes reference to three of the following:		
	• methane is a greenhouse gas (1)		
	 greenhouse gases {absorb / trap} {heat / infra red / long wave} energy (1) 		
	 (anaerobic oxidation of methane results in) less methane in the atmosphere (1) 		
	 (the breakdown of methane) could {reduce the greenhouse effect / result in less heat being trapped / reduce global warming} 		(3)

Question Number	Answer	Additional Guidance	Mark
7(b)	An answer that makes reference to two of the following:		
	• only one cell as opposed to potentially many (1)		
	• no nucleus present (1)	ALLOW DNA not associated with histones	
	 no membrane-bound organelles present / absence of named membrane-bound organelle other than nucleus (1) 	ALLOW example e.g. no mitochondrion	(2)

Question Number	Answer	Additional Guidance	Mark
7(c)	An answer that makes reference to the following:		
	 transfer carbon from an {inorganic source / CO₂} into organic compound (1) 	ALLOW correct named organic compound e.g. cellulose / protein	
		ALLOW description of light independent reactions of photosynthesis	(2)
	• that becomes part of the mass of that organism (1)	ALLOW part of biomass	

Question Number	Answer		Additional Guidance	Mark
7(d)	 An explanation that makes reference to four of the following: final acceptor of electrons (and H⁺) (in the electron transport 	ort		
	chain)	(1)		
	 {to allow / in} oxidative phosphorylation 	(1)		
	ATP is synthesised	(1)		
	 (presence of oxygen) allows oxidation of (reduced) NAD 	(1)	ALLOW coenzyme / FAD ALLOW converse	(4)

Question Number	Answer	Additional Guidance	Mark
7(e)	An explanation that makes reference to three of the following:		
	• unfolding due to breaking of bonds (1)	ALLOW breaking of hydrogen or ionic bonds	
	 change in {tertiary structure / 3D shape} / enzyme denatured (1) 		
	• leading to a change in the shape of the active site (1)		
	 substrate no longer able to bind to {enzyme / active site} (1) 	ALLOW not complementary / not fitting / enzyme substrate complex not formed	(3)

Question Number	Answer	Additional Guidance	Mark
7(f)	An answer that makes reference to the following:all the {DNA / exons and introns} (1)	DO NOT ALLOW 'all the genes in the DNA' / 'all the DNA in the genes'	(1)

Question Number	Answer	Additional Guidance	Mark
7(g)	An explanation that makes reference to five of the following:		
	• as a result of a mutation (1)		
	 (cyanobacteria) produce proteins containing the amino acid cysteine (1) 		
	 (cysteine rich proteins) produce {heat stable enzymes / proteins resistant to unfolding} (1) 		
	 other adaptations such as {enzymes with large hydrophobic cores / simpler protein folds / amino acids that do not bond to metal ions } 		
	• high temperatures act as a selection pressure (1)		(5)
	 allowing them to {survive / replicate} and pass advantageous allele to next generation (1) 	ALLOW 'pass alleles for heat tolerance to next generation'	

Question Number	Answer		Additional Guidance	Mark
7(h)	A description that makes reference to two of the following:			
	• (70S) ribosome	(1)		
	larger and smaller subunits	(1)		(2)
	containing protein and rRNA	(1)		

Question Number	Answer	Additional Guidance	Mark
7(i)	An explanation that makes reference to three of the following:		
	 antibiotics reduce the number of other (species of) bacteria (1) 		
	 antibiotics that attack cell walls {cause lysis / are bactericidal } (1) 		
	 antibiotics that attack protein synthesis (machinery) {prevent growth / are bacteriostatic} (1) 	ALLOW attack ribosomes	
	 this reduces interspecific competition from other bacteria for limited resources (1) 		(3)

Question Number	Answer	Additional Guidance	Mark
7(j)	An answer that makes reference to the following:		(1)
	• pyruvate has 3 carbons compared to 2 carbons in acetyl (1)		

Question Number	Answer		Additional Guidance	Mark
7(k)	An answer that makes reference to four of the following:			
	Similarities			
	 to avoid adverse environmental conditions 	(1)		
	 formation of resistant {outer coating / capsule} 	(1)		
	reduce metabolic activity	(1)		
	Differences			
	 sporulation and no sporulation 	(1)		
	 different reasons for entering dormancy 	(1)	e.g. mycobacterium enters dormancy to avoid immune response and Bacillus to survive lack of resources	
	• (only) genetic material is in a protective capsule in Bacil	lus (1)		(4)

Pearson Education Limited. Registered company number 872828 with its registered office at 80 Strand, London, WC2R 0RL, United Kingdom
