The Merlyn Ionic Collection
Your Shower, Your Space

The Merlyn Ionic Collection features an extensive range of shower enclosures, trays and bath screens to suit every bathroom and every budget.

We spent many years researching our customers, installers and plumbers in the UK and Ireland. From this research we developed a range that is stylish, innovative, fast and easy to fit. The Ionic collection pairs precision engineering with the highest quality standards.

This range offers fantastic choice and functionality, you can be sure to find an enclosure to suit your bathroom space and budget. From the contemporary frameless Essence to the framed classic Express this collection has been developed to meet the highest quality standards while maintaining a very stylish look and feel. Create your beautiful bathroom today by selecting a Merlyn Ionic shower enclosure.

![MerShield Stayclear logo]

Mershield Stayclear

Merlyn treats products in the Ionic Collection with a special protective coating to ensure the glass maintains its sparkle. This comes as standard on Essence, Express, Wetroom Panels and most of our Bath Screen range.

Mershield Stayclear acts as a protective coating which when applied to glass, helps the glass to remain shiny and new without the need for tiresome cleaning. When cleaned correctly it helps prevent the build up of limescale and soap deposits making the shower glass "Easy to Clean". Please see tips for keeping the glass in pristine condition.

Without Mershield Stayclear Protective Coating

Without Mershield Stayclear protection water and soap deposits cling to the glass surface causing a build up of grime, requiring more vigorous cleaning.

With Mershield Stayclear Protective Coating

The Mershield Stayclear coating provides a larger contact angle for the water droplet on the surface and makes the drops smaller than drops falling on an untreated surface. This ensures the droplets roll away much faster down the surface, minimising deposits left behind.

Natural glass surface

Mershield Stayclear coating
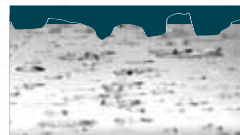

Mershield Stayclear coating creates a smooth layer over the surface of natural glass, lowering surface friction, making it easier for water, soap and lime deposits to run off the glass.

Tips on how to keep your glass in pristine condition

It is important to clean your glass after every use – wipe down with a soft cloth.	Ensure that any residual water on the glass is removed after every use.
Install the enclosure in a well ventilated area.	Clean the glass regularly using soapy water.
Do not allow limescale to build up in hard water areas.	DO NOT use abrasive products on any surfaces.

Essence Frameless

Frameless Elegance

Ionic Essence is truly unique in its appearance with its fusion between stylish beauty and precision engineering. We have spent a great deal of time developing this range that not only exudes style; it also stays true to the basic Ionic principle: built to last.

Some additional features include concealed rollers to ensure it looks just as good on the inside as it does on the outside, discreet seals to help retain its frameless look, extra strong rollers that have gone through rigorous testing procedures along with many other little details that have been incorporated to ensure this product fits as seamlessly as possible for the installer.

Features

- Height 2000mm
- Stunning frameless design
- Reversible*
- Concealed fixings
- Exclusive Essence fixings kit provided
- Chrome double handle

Wetroom Panels

Flexibility for your Space

The Ionic range of Wetroom Panels offer you the choice to mix and match many combinations of shapes and sizes to any space you require. At Ionic Merlyn, we understand that every wetroom space is different, which is why we have designed a modular system of wetroom panels that can be combined to fit any area. We have broken the range down to 17 key components with additional fitting options which you can build together to make up the full wetroom of your choice. It's as simple as A, B, C.

- 3M support post can be retro-fitted to glass thicknesses of 6mm, 8mm and 10mm

How it Works

If you wanted to make up a Walk In Wetroom for an area to fit on to a 1200mm x 800mm tray or floor. You pick a panel E (700mm) and a B (800mm), this also includes the recommended 500mm minimum opening for the Walk In.

E + F =

700mm   800mm   1200mmx800mm Walk In

500mm

Minimum Opening

We recommend a minimum opening of 500mm for any wetroom area.

500mm min

36 Showerwalls

37 Showerwall with Vertical Post

38 Walk In

39 Walk In with Swivel Panel

Flexibility for your Space

With innovative sizes and panels built with luxurious 8mm glass, this range is sure to impress.

40 Cube

41 Showerwall x 2 with Corner Profile

Affordable Shower Enclosures

Ionic Source is our exciting range of affordable 6mm shower enclosures created by Merlyn. This range has been developed to offer our customers an exceptional quality shower enclosure without the hefty price tag.

Ionic Source has a fresh, contemporary look and feel. With simple clean lines, these showers will remain timeless for years to come. Standing at 1850mm high with 6mm* toughened glass with easy fit frame, robust quick release easy clean rollers, secure clunk closing and discreet modern fittings, the attention to detail and emphasis on quality is clearly evident throughout this range.

03 Easy Fit Steps

Step 01
Align the horizontal and vertical profiles together.

Step 02
Slot the horizontal profile and screws into upright using guide channel until flush.
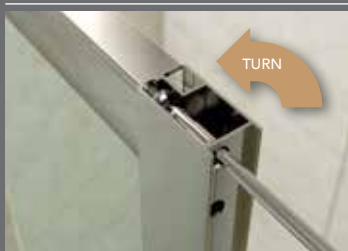

Step 03
Secure screws into position using dedicated access holes.

How SecureSeal works
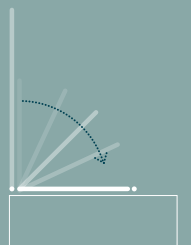

01.
Pull down arm from storage position.
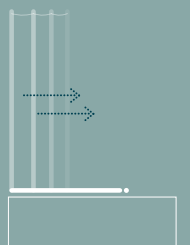

02.
Extend screen and locate panels.
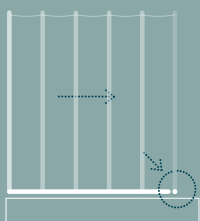

03.
Fully extend and clip into position for a secure fit and tight seal.

.SecureSeal.
by M E R L Y N

The Ultimate Leak-free Bath Screen

The SecureSeal by Merlyn has been designed with a leak-free sealing arm which extends from the profile to create a complete seal between the bath and screen. When not in use the arm simply folds away back into the profile.

SecureSeal by Merlyn offers functional and easy to use designs to complement any bathroom space. With glass screen heights of 1500mm and 6mm glass, our SecureSeal by Merlyn range allows you to enjoy peace of mind in a leak-free shower experience for years to come.

This range has been designed with the same superb materials and unrelenting attention to detail demonstrated across all Merlyn ranges.

Bathscreens

Simple Shapes

Ionic Bath Screens are the perfect solution for in-bath showering. Innovative design and contemporary aesthetics bring this bathroom favourite to life with modern shapes and features to enjoy for years to come.

HydraSEAL

We have cureated an exciting new feature called HydraSEAL, and added to 3 of our featured bath screens. HydraSEAL acts as an extra barrier to reduce water escaping from your bathscreen during your showering experience. HydraSEAL is available on our MB1, MB2, MB3, MB3A and MB3B bath screens.

90mm fast flow waste, includes hair trap and chrome cover.

Technical Section

We have produced this product section to help you with your purchasing decision. For further information please contact your local stockist, details of which can be found at www.ionicbymerlyn.com

PRODUCT INFORMATION

All products are manufactured in accordance with EN 14428 and utilise toughened safety glass to EN 12150.

All doors feature adjustable wall profiles to compensate for out-of-true walls and have micro adjustment features for fine tuning to obtain a perfect fit and operating action.

Aluminium sections are extruded to BS 1474 from alloys complying with BS 6463 and coated to BS 6464.

All enclosures, wetrooms and panels are Power Shower approved – will retain water under normal showering conditions.

Water retention is maintained in all products under normal showering conditions.

A selection of Ionic enclosures are frameless in design. Spray/mist may escape therefore we would recommend use of these enclosures with tiled floors.

Opened cartons can not be returned. Returns carry a £40 box charge or £60 per unit where the sale is less than 30 days old. Returns over 30 days old will not be accepted.

All products are supplied complete with full installation instructions and the necessary fixings.

Check with your dealer for accurate matching of material samples.

Product descriptions do not imply the use of precious or valuable materials.

Our policy of reviewing product design and development on a regular basis means Merlyn reserve the right to change product specifications and prices without notice.

Only shower enclosures, panels and bath screens and some trays are covered by guarantees. Please contact the Ionic sales team for more details.

Glass shattering and parts subject to wear are not covered by your guarantee.

For full details on all product ranges please contact Ionic Showering.

Trays shown in this catalogue are for illustrative purposes only.

Images are for illustrated purposes only. The colours and finishes shown in the catalogue are as accurate as possible within the limits of the printing process. The positioning of all showering heads in the brochure is for illustrative purposes only.

All descriptions, specifications and particulars contained in this brochure are intended merely to represent a general idea of the products described herein and none of these form part of any contract to give rise to any independent or collateral liability upon the company.

BATH SCREEN INFORMATION

Ionic Bath Screens are not designed to fit on baths with stepped fronts, roll top rims or integral soap dishes.

Fitting of screen on baths which have raised head rests or shapes is not recommended.

There must be no items causing obstruction with the seal and bath, as any of the above may cause leaks.

When choosing your Bath Screen, please ensure that if your bath has bath handles, that they do not interfere with the bath rim area where your screen will be placed.

When choosing an in-swing or folding Bath Screen, please ensure your swing area is not interfering with any brassware or internal shower features. Similarly, when choosing an out-swing, please ensure the out-swing area is free from any obstructions.

The Ionic MB72 Panel Hinged Bath Screen is handed so please ensure you state whether you require a right or left handed configuration when ordering.

Ionic Bath Screens are suitable for standard pressure showers and are not recommended for use with power showers.

It is recommended that the shower head position is situated on the same wall to which the Bath Screen is fixed and in the centre of the shower area.

CLEANING

It is important to clean your Ionic shower door after every use.

Wipe down all the glass and metal parts with a soft cloth.

Do not allow lime scale to build up in hard water areas.

Ensure that any residual water on the glass is removed after every use.

Clean the glass regularly using soapy water.

Do not use abrasive products on any surfaces.

Install the enclosure in a well ventilated area.

For more information on Mershield Stayclear glass please see page 06 of this brochure.

INFORMATION AND MAINTENANCE

Always read the instructions on the packaging, chrome is vulnerable to acid attack and some strong household cleaners including strong disinfectants, denture cleaners, hair dyes, wine making chemicals and photographic chemicals may contain acid. These materials may have a varying effect on the surface from black spots/streaks (which cannot be removed) to pitting the surface. Contact with these materials should be avoided.

IMPORTANT SHOWER TRAY INFORMATION

Although shower door and enclosure sizes are related to tray sizes it is important to note that most shower trays are tiled down to the rim, often over an "up-stand". The finished installation space may be less than the nominal tray size.

Ionic shower units are made to suit this remaining space.

The guide below may be helpful in taking measurements to determine the shower door or enclosure size required. Dimensions given in this publication are in millimetres, are approximate and may vary with adjustment. They are subject to change without notice.

Please note that when a tray is fitted it is essential that the tray is level before any doors or enclosures are fitted.

Tray upstands: ensure strong and secure joints between shower tray and walls, even in the event of floor settlement. Tiling must be finished over the recessed upstand as shown in the diagram below.
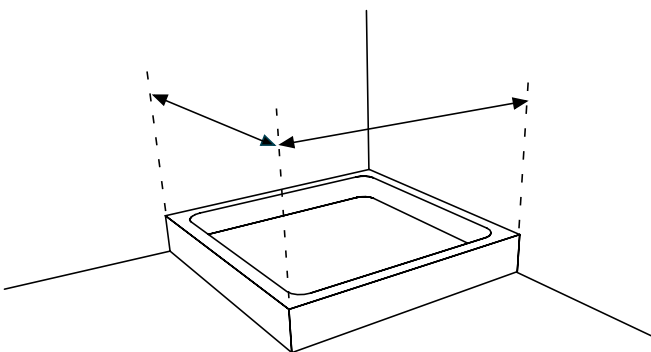

Cleaning: clean after every use with warm soapy water and wipe dry with soft cloth, never use a gritty or abrasive cleaner.

Take the measurements after the tray is installed and the walls are tiled.
