

# P50 – 5Ton Battery Push / Pull System

The UnoLiner P50 is a handheld pulling and pushing system for fast repairs. Its rechargeable Li-ion battery powers this handy device, which has a pulling and pushing capacity of up to 5 tons! It's ideal for narrow spaces because it doesn't need electric cables or hydraulic hoses. The standard P50 kit is outfitted with a plethora of useful accessories that enable a wide range of repair options for a vehicle repair workshop.

There's no need to swap cylinders, users of the P50 save time! This feature also prevents instances of hydraulic oil leakage that may occur during cylinder switching. Practical, compact, and lightweight, the P50 meets and exceeds the requirements of what constitutes an invaluable addition to your vehicle repair tools.

Pushing and pulling in one handy device
