No Sew Fleece Blankets

Materials:

1 yard of 2 different 56-60" wide fleece

1 pair scissors

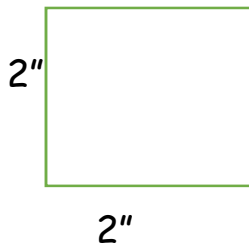

Tag board, old file folder, etc. for template

Pen or pencil

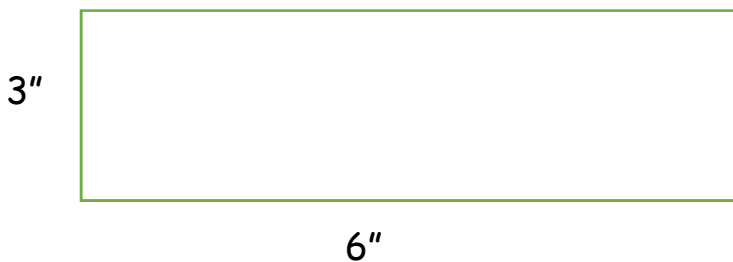

Ruler

Method:

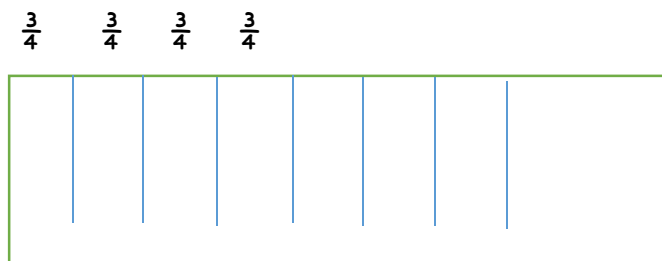

1. Cut a 2"x2" square from the folder - this is the corner template

2. Cut a strip 3" wide x 6" long for the fringe template.

3. Draw a line 2" long every $\frac{3}{4}$ " along the 6" side. Cut along the lines.

4. Lay the two pieces of fleece on top of each other, wrong sides together. Make sure they are the same size. Trim if needed. You may want to pin them together to be sure they don't shift during the cutting.
5. Use the corner template and cut out the corners.
6. Use the fringe template to cut along all four sides.
7. Start at one end and tie the fringe ends together until all four sides have been tied.

Finished and no sewing!
