Spielvogel's engaging, chronological narrative weaves the political, economic, social, religious, intellectual, cultural, and military aspects of history into a gripping story that is as memorable as it is instructive. About the Author Jackson J. He received his Ph. The organizational structure is built on a chronological narrative that would make taking chapters out of order somewhat nonsensical. That being said, if an instructor was teaching a version of the course where certain topics were not included or that extended beyond

the end of the text, it would be fairly easy to take chapters out or add some from the next volume to achieve the desired coverage.

At the chapter level, more subheadings would be helpful. The sequencing is logical and consistent with other introductory texts in the field, though occasionally the flow within a section is a bit disrupted. For instance, in the section on Egypt, the political chronology of the Old Kingdom, Middle Kingdom, and New Kingdom is divorced from the discussion of continuity mostly cultural that follows in a way that some historians might find less than optimal.

The selection of maps and photographs is well chosen to illustrate the chapters, though a few more illustrations would be welcome. While these maps and photos are clearly labeled, citation of sources for each item clearly visible in the descriptive text with the titles would be welcome. Right now the citation list appears at the end of each chapter which makes it less integral and less visible to students who need to learn about proper citation both in OER and for other formats. Providing some statistical or data visualization items could expand the usefulness of the text for explaining to students the different methods of historical analysis available to historians. Within the confines of the topic of Western Civilization, which is necessarily focused on Western Europe, this text appears to be mostly inclusive.

The author makes a clear statement in the introduction that he has expanded coverage of areas that interacted with and influenced Europe, as well as looking in later volumes at the impact both positive and negative European expansion had upon the world in a larger sense. He also states that he has attempted to expand his coverage of women in history, though this is still in a somewhat imperfect state given the brevity of the text and the focus on mostly political and intellectual history.

See the sections on Rome for an example of this, where scholarship has revealed more about women and gender in Roman society, but the text here has only limited coverage of this kind of information. The chapters covered in this first volume are well-organized and the major topics are addressed but sometimes without sufficient space more in "Consistency" section. I was especially happy to the ancient world given several chapters instead of I was especially happy to the ancient world given several chapters instead of just chapters as many books do.

Since the book is apparently marketed in three parts, I think it's important to provide an index for each part. Certain institutions or programs may use only volume 1, for example, and there is no index for it. Most sections I found to be accurate but there were a few errors, some more troubling than others. Jews, Christians, and Muslims do not worship the same god as the Introduction claims. There are substantial differences -- Trinitarian God vs.

Allah is One, Deity of Christ, etc. If the intent was to inform students that the three 3 largest monotheistic faiths have much in common due to their Abrahamic heritage, then that needs to be said. Claiming they all worship the same god is a gross simplification and requires far too much "cleaning up" from the professor to my mind.

Either this needs to be removed or given a fuller treatment with far more nuance. The explanation regarding the Trinity is also a bit muddy and it felt like the author was not quite sure how to explain it. I also find using terms like "party line" to discuss a religious dogma to be in poor state and this risks giving students an overly politicized view of religion. Of course, religion and politics mixed often in that time period, but again I thought nuance was lacking here. Overall the sections on religion need the most work. Another area that needs more nuance is the so-called "Dark Ages" and the long since worn out characterization of the Germanic tribes as barbarians. The author appears to be aware of this by continually putting it "barbarians" in quotes and then explaining it in one paragraph. The term, however, should be replaced by the actual names of the tribes for their distinctions to be noted.

They were not one homogenous group. There's no reason to perpetuate the Roman stereotype of them. Note it and move on to addressing them by name. A colleague of mine has read it as well and made some additional observations I'd like to highlight. The sections involving Latin terms also need to be cleaned up a bit. Most Coloni were "veterani" or their descendants who were settled in conquered provinces to secure Roman power. They kept the peace and were given land as incentive for military service. They were by definition free Roman citizens, in contrast to the rustici or nativi who were non-citizens and often suffered under early forms of serfdom. A few topics deserve more treatment, in particular the time between the Arab Conquest and the Crusades. More should be said of the Carolingians, the Holy Roman Empire, etc. I think it's relevant and appears like it would be easy to update. I don't not say this as a criticism necessarily.

If anything, such a relationship makes updating even more streamlined. I will include these next remarks here because of the relationship to Wikipedia. I considered placing them in the first section as well. I would greatly appreciate a section "For Further Reading" so that the reliance on Wiki would be mitigated a bit. See some of my comments above, but overall I think it is well-written for an early Undergraduate textbook. I would like a bit more precision and nuance on certain topics some addressed above but the overall prose is lucid and accessible. I think this is written in a more readable prose for Freshman than the vast majority of textbooks. Terminology is fine so far as I could tell.

I do think the framework needs to be tweaked some see comments above about the time periods between the Arabic Conquest and the Crusades. No issues here. The headings are intuitive and provide a generally fair amount of reading for each section. Easily digestible for undergrads. They are logical and clear other than the last chapter or two on Islam and the Early Middle Ages which feels rushed see comments above. It's inclusive. The section on women in Egypt was great to see but so short. Much more could be said there and in other regions and times. See also my previous comments on religion. My other major concern is that there is a lack of primary source citations. Brett rated it it was amazing Jul 21, Brian de Junco rated it liked it Dec 29, Zhu Xiaoyi rated it it was amazing Apr 17, Rena rated it really liked it May 17, Matt Minton rated it really liked it Jun 27, Ashley Griffith rated it really liked it Apr 18, Harrison rated it really liked it Sep 18, Astra rated it really liked it Jun 10, Hayley Salefski rated it did not like it Sep 01, Venice rated it it was amazing Nov 08, Robert Breckenridge rated it liked it Sep 27, Bryna rated it it was amazing Apr 01, Biographyguy rated it it was amazing Aug 10, Jac rated it did not like it Apr 29, Jonathan K rated it it was amazing Oct 09, Kristen Clark rated it it was amazing Aug 23, Devon Clement rated it liked it Apr 29, Alistair rated it liked it May 13, There are no discussion topics on this book yet.
