

## Due Diligence

HCH led a publicly held client's due diligence process for the acquisition of the insurance operations of another publicly held company. HCH developed the due diligence program, coordinated with management to identify and contract with various experts including actuaries (reserves and pricing), attorneys, accountants, reinsurance brokers, claims experts and various company personnel and facilitated meetings with the management teams of both companies. HCH also provided assistance to the client's CFO in analyzing various aspects of the proposed deal including validating the target company's financial projections and conducting stress tests and scenario modeling and identifying potential synergies and expense savings.
