AT THE RANCH, SIMMIE, SK 2020 1 PM

RANCH READY BULL SALE

Building Uniformity **AND CONSISTENCY**

Welcomes you

TO THE RANCH READY
16TH ANNUAL BULL SALE

March 13 2020 . 1PM . at the Ranch, Simmie, SK . lunch at 11AM

Welcome to the 2020 Ranch Ready sale. It's been a challenging and stressful year for a lot of folks in agriculture. With high feed prices, drought in some areas, too much rain in others followed by a never ending harvest. However, cattle prices are off to a good start this year. We're looking forward to full dugouts and plenty of green grass in 2020.

We have a lot of confidence in our bulls, we offer. Most are sired by home raised bulls, several which sold through our sale. We feel strongly that the Hereford is a maternal breed. The bulls are required to sire replacement females with tidy udders that breed back quickly, while raising quality calves in ranch conditions. Our bulls are also required to sire a uniform set of steers that weigh up.

Feel free to call, text, email or better yet, stop in for a visit anytime. We're happy to help you out in any way we can. Videos of the bulls can be found on our website, www.braunranch.com. For the first time this year, we will be broadcast online at DLMS.ca

Thank-you so much for your interest, we couldn't do it without you.

----------------	----------------

Terms: Cash or cheque payable at par on sale day unless prior arrangements have been made. US funds at current rate of exchange announced sale day. Braun Ranch reserves the right to draw semen, for in herd use, on all sale bulls.

Announcements: any announcements made from the block take precedence over the catalogue.

Guarantee: All animals are purchasers responsibility as soon as sold. All cattle are guaranteed breeders. Please notify us as soon as you suspect a problem. Standard Hereford Assoc guarantee applies.

Liability: Everyone attending the sale does so at their own risk. The owners, sale staff and representatives assume no liability legal or otherwise.

Delivery: There will be a \$100 credit, per bull, for those buyers who take home their bull. We're happy to deliver bulls free of charge, within 300 miles. Delivery will be at our convenience before we get busy seeding and A. Ling. American purchases will be delivered into Montana and North Dakota. There will be a \$300 fee on all American purchases under \$5000 to cover health testing and brokerage fees.

Location: The sale will be held at Craig & Carrie's yard. Half a mile west of Simmie, then one mile south, take the first road to the west. Look for two red barns, south side of the road.

Auctioneer:

BULL DEVELOPMENT:

We don't creep feed our calves and never have. We cut calves at birth, branding, before weaning and usually cull a few more, from the coming two year old group, before they head to grass as yearlings. After weaning, the calves are grown out on free choice hay and supplemented with a growing ration, aiming for a modest 3lb/day gain. Last spring, this group of two year olds on offer, went to grass early May where they remained on native grass, without any other supplement until the end of October. The bulls spend the remainder of the fall on a hay flat where they continue to graze. We supplement the bulls with free choice hay and a mix of oats and malt sprouts. The bulls are hard muscled and athletic.

EPDS & CULLING:

We cull our cows and bulls hard. We expect our mature cows to wean a bull calf with an adj ww of 600lbs plus. First calvers are given a little leeway. This past October, we sold our steers direct. After making the 375km trip, the steers came off the truck weighing 715lbs.

We don't put a whole lot of emphasis on EPD's. We print them in the catalog so buyer's can compare, if they like. We feel the breed organizations push them, but don't do a good job of explaining how to use them. Some producers use EPD's to promote cattle as being in the top 10% of the breed for a certain trait. That's fine. However, for example, let's look at milk numbers. More often than not, a cow with a really high milk number will require more feed to maintain herself, her calf along with her ability to rebreed. We're more focused on raising cattle that thrive in ranch conditions. Let's look at ww and yw EPD's. Sure, we all want to sell more pounds. However, at the end of the day, we can't wean a 1000lb calf off a 1200lb ranch cow. It's also been our experience that a really high yw EPD can lead to a larger cow. BW EPD's are the most applicable in our opinion, if an actual scale weight is recorded and submitted. All our calves, both purebred and commercial, are weighed with a scale. We've found the tape is not accurate. You'll find our EPD's will be around breed average. However, we feel our cows are anything but average. Our cows sure aren't perfect, but we're getting closer to where we want to be every year.

CARCASS TRAITS:

In the fall of 2018, the CHA initiated a steer trial with Olds College. We loaded the trailer with six of our steers, 3 from Matt Hansen, all sired by BR 15Z Battle Royal 155B, as well as three steers from long time customer, Wilson Bros. Over the years, Wilson's have purchased over 65 bulls from us. We were very happy with the results from our genetics. Especially seeing as we haven't focused on carcass in our program, but more on the type of cattle that work for us.

Trial Results:

- ~Matt Hansen was awarded Champion & Reserve Champion for top carcass value in the jr. straight bred division.
- ~Braun Ranch was Reserve top carcass value in the straight bred division
- ~Wilson Bros. claimed Champion top avg daily gain in the straight bred division, along with the third highest gaining steer.

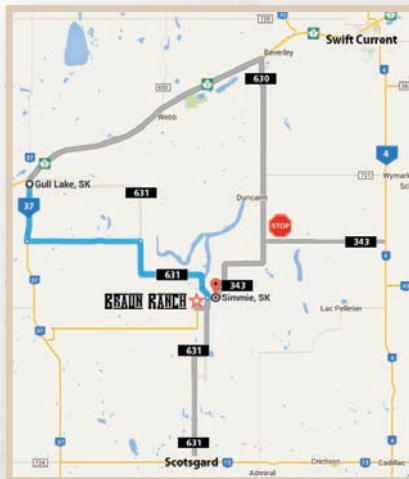

In conclusion of the feed trial, The twelve Braun Ranch influence bred steers had 25% more AAA carcasses than the trial average.

SALE DAY *Directions*

Swift Current: take highway #4 south, 18 miles. Head west on highway #343. At the stop sign, head south, remaining on #343. Turn west into the "town" of Simmie. On the west side of town, at the T intersection, turn south on 631 grid. Go 1 mile south, then turn west onto TWP road 114. The sale barn is the first yard on the south side.

Gull Lake: Follow highway 37, 5 miles south of Gull Lake, turn east on the Ears Grid. Follow for 10 miles, then turn south on 631 grid. Follow 631 to TWP road 114, turn west. Sale barn is the first yard on the south side on the road. Look for a big red barn.

Shaunavon/Cadillac: Take high way #13 to Scotsgard, then turn north on grid 631. In 15 miles, turn west on TWP road 114. Sale barn is the first yard on the south side.

Standard 213B was the lead off two year old bull in our 2016 sale, selling to Wilson Bros., McCord, SK. That same spring, we hand bred a couple second calves to him before delivering him. The following year after, we didn't waste anytime purchasing half interest in 213B back. His calves might be our thickest sire group yet. Owned with Wilson Bros.

Gunsmoke exemplifies our belief of “Building uniformity and consistency”. He is as correct, stout and deep bodied as you’ll find combined with a great hair coat with perfect Hereford markings. His dam, 168C, granddam 179Y and great granddam 155S are cookie cutters of what we feel is the ideal Hereford cow. Gunsmoke was Champion at the 2019 Hardisty Field Day over 160 of Western Canada’s top Hereford bull calves.

His maternal grand sire, Crossover 135C, also won Hardisty Field Day back in 2015 and topped our bull sale the following spring. Famous 145F, a flushmate to 126G’s dam, also won Hardisty in 2018 and went on to be our second high seller in 2019. Only to be out sold by Old School 101F, Gunsmoke’s maternal brother. These cattle are uniform, consistent and rise to the top. Selling full possession, 2/3 semen interest.

Geronimo is quite the bull. Long spined, heavy boned with plenty of thickness, short marked curly yellow hair and full eye pigment. The cows which these flushmates sire, should go on to be outstanding. Our donor cow, Lady 168C, had 4 bulls calves born in 2019. 126G, 166G and BR 69D Stanmore ET 157G were her embryo calves. We have decided to retain 157G for next years sale, allowing our 2 year old customers, a shot at these genetics. Her natural calf, BR 157B Sensation 242G, will be staying here, to join his sire, BR 028X Sensation 157B, in our herd bull line up. All four brothers made the trip to Hardisty for the 2019 Field Day. They went on to claim three 1st, one second, Reserve Jr. Champion, Senior Champion and overall Grand Champion. These bulls will sire uniformity into their offspring.

Sale feature here. This is what a Hereford should look like. Thick, rugged, lots of curly Hereford hair, good footed and lots of bone. 32G's full sib, "The Hulk" was a feature in last years sale, selling to Randy and Rowdy Benson, North Dakota. Lot 9's dam, 27C, is sired by 187A, a full brother to our donor cow, 179Y. Once again, a pedigree stacked with consistency. Selling full possession, retaining 1/4 in herd semen interest.

Check out the power and shape in this stout, moderate, yellow 213B son. 758 lbs adjusted 205 wt with just a 90 lbs birth weight. His dam 32D, is a beautiful uddered Sensation 028X second calver. We used 32D's first calf on a group of heifers spring 2019. His maternal grand dam, 20Z raised a sale topper for Log Valley Ranch. She has also produced a bull for Clint Mitchell. Great grand dam, 4R and her full sister, 17U were great cows for us. Both producing every year for 12 years. Longevity and consistency in this pedigree.

The best of both worlds here. Canadian pedigree on the bottom crossed with Line 1 on the top. Lots to admire about this long, yellow calf. His dam, Starlet 49B, is a favorite around here. She joined the ranks of the donor cow line up last spring. We're looking forward to her embryo calves arriving in 2020. 49B has raised four bulls so far. Her first calf, Extra Deep 46D, was our second high selling two year old to Log Valley Ranch. We used him on heifers as a yearling and Log Valley was gracious enough to allow us to use him as a two year old, before delivery. He has sired some top replacements for us. Her second bull was the high selling two year old, in last years sale to X-X Ranch, North Dakota. Her third bull is offered in the two year old group this year, as lot 35.

If you want to decrease your mature cow size, while maintaining good weaning and yearling weights, take a look at this early maturing bull. This mating was a bit of an oops. 58Y was turned out with a group of cows but somehow we managed to miss that one of his best daughters, 49B was in that group. Well, everything happens for a reason. Lucky for us, she produced this super stout, moderate, yellow bull. 49B has joined our elite line up of donor cows and we are looking forward to her first ET calves hitting

the ground this spring. She is also the dam of BR 106Z Extra Deep 46D. He's a 106Z son we used on our own heifers as a yearling and two year old. He was purchased through our sale by Log Valley Ranch for their purebred Horned Hereford heifers. Starlet 49B also raised the high selling two year old bull in last years sale, selling to X-X Ranch, North Dakota. She also is the dam of Lot 14, a 5110C son.
