The Law of Partnerships and Corporations. Principles of Law and Economics. Daniel H Cole. Peri Pakroo. Tiziano Bellini. The text provides an

examination of the basic questions, concepts, and legal rules of business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty.

And students need to understand how the concepts tie to their future business careers. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. Critical thinking questions are also included at the end of each case, to tie in this component even further.
