	Cherry Hill Tuition A Level Biology AQA Paper 9 Mark Scheme Page 1 of 12				
Question	Marking Guidelines		Comments		
1(a)	 Granum/grana/thylakoid; Stroma; 	2	 Ignore references to membranes, stacks or discs. Allow phonetic spellings. 		
1(b)	 Absorbs/traps/uses light; For photosynthesis; Produces carbohydrates/sugars/ lipids/protein; 	2 max	 Light dependent reaction = marking point 1. Accept any named product of photosynthesis for marking point 3. Reference to light dependent and light independent reactions = two marks 		
1(c)	Correct answer in range of 2.53 – 2.66;; Any length divided by 30000 = 1 mark;	2

Question	Marking Guidelines	Mark	Comments
2(a)(i)	Anaphase	1	
2(a)(ii)	 Sister/identical chromatids/ identical chromosomes; To (opposite) poles/ends/sides; 	2	 Reject: Homologous chromosomes separate. Allow any reference to chromatids/ chromosomes being identical e.g. same DNA
2(b)(i)	 8.4/cells with twice DNA content = replicated DNA / late interphase / prophase / metaphase / anaphase; 4.2 = DNA not replicated / (early) interphase / telophase / cell just divided / finished mitosis; 	2	 Any reference to interphase must suggest towards end of interphase. 'Chromosomes replicate' is not enough for DNA replicates.
2(b)(ii)	2.1;	1

------	------	----

Question	Marking Guidelines	Mark	Comments
3(a)(i)	Synodontis batensoda / S. batensoda;	1	Ignore spellings
3(a)(ii)	Mochokus niloticus;	1	Ignore spellings
3(b)	5;	1	
3(c)(i)	Fertile offspring produced;	1	Allow suitable description of offspring being fertile.
3(c)(ii)	 Attracts/recognises same species; Attracts/recognises mate/opposite sex; Indication of sexual maturity/ fertility / synchronises mating; Stimulates release of gametes; Form pair bond; 	2 max	Attracts mate of the same species = two marks. 3. Allow 'ready to mate'.

Page 4 of 12

Question	Marking Guidelines	Mark	Comments
4(a)(i)	4;	1	
4(a)(ii)	 Change in amino acid/(sequence of) amino acids/primary structure; Change in hydrogen/ionic/ disulphide bonds; Alters tertiary structure/active site (of enzyme); Substrate not complementary/cannot bind (to 	3 max	 Reject = different amino acids are 'formed' Alters 3D structure on its own is not enough for this marking point.
	enzyme/active site) / no enzyme- substrate complexes form;		
4(b)	 Lack of skin pigment / pale/light skin / albino; Lack of coordination / muscles action affected; 	2 max	
4(c)	Founder effect / colonies split off / migration / interbreeding;	1	Allow description of interbreeding e.g. reproduction between individuals from different populations

Cherry Hill Tuition A Level Biology AQA Paper 9 Mark Scheme	

Page 5 of 12

Question	Marking Guidelines	Mark	Comments
5(a)(i)	(Human cells) don't have a cell wall;	1	Accept "they" refers to human cells.
5(a)(ii)	(Affects) protein synthesis;	1	Allow description e.g. 'amino acids not joined together / translation. Reject: affects transcription.
5(b)	 Mutation present/occurs; Resistance gene/allele; Resistant bacteria (survive and) reproduce; Vertical (gene) transmission / Horizontal (gene) transmission / conjugation; 	3 max	 Ignore antibiotic causes mutation. 1. Reference to immunity disqualifies first credited marking point. 2. Must clearly state marking point 2. Do not award by implication e.g. resistance passed on by vertical gene transmission = one mark (marking point 4) Reference to mitosis negates marking point 3 <u>or</u> 4 (not both marks).
5(c)	 <u>Horizontal</u> (gene) transmission; Via conjugation/pilus; Plasmid/Gene/DNA replicated/copied; <u>Plasmid</u> transferred (to <u>S.aureus</u>); 	3 max	Ignore reference to mitosis

Cherry Hill Tuition A Level Biology AQA Paper 9 Mark Scheme Page 6 of 12

Question	Marking Guidelines	Mark	Comments
6(a)	 Amino acid sequences / primary structure; Closer the (amino acid) sequence the closer the relationship; (Protein structure) related to (DNA) base/triplet sequence; 	2 max	More closely related (species) have more similarities in amino acid sequence/primary structure = two marks; Amino acid sequence is related to (DNA) base/triplet sequence = two marks;
6(b)	 Reference to base triplets/triplet code / more bases than amino acids / longer base sequence than amino acid sequence; Introns / non-coding DNA; Degeneracy of code / more than one code for each amino acid; 	2 max	Different (base) triplets code for same amino acids = 2 marks; Degeneracy of triplet code = 2 marks Ignore reference to codon. 3. Allow 'more than one base sequence can code for a protein';
6(c)	 Most closely related to chimpanzee; Least closely related to trout; 	2

Page 7 of 12

Question	Marking Guidelines	Mark	Comments
7(a)(i)	Produces a more reliable mean/average / makes sure sample was representative / reduce effect of extreme values / identify anomalies;	1	Ignore references to chance
7(a)(ii)	Removes bias;	1	
7(b)	Two marks for correct answer of 5.8;; One mark for incorrect answer that clearly shows denominator as 216;	2	
7(c)	 Increase in variety of plants/shrubs/grass; More habitats/niches; Greater variety of food sources / more food sources; 	3	3. Answers only referring to 'more food' should not be credited

Question		Marking Guidelines	Mark	Comments
8(a)	1.	Active transport by endodermis;	3 max	
	2.	ions/salts into xylem;		
	3.	Lowers water potential (in xylem);		
	4.	(Water enters) by osmosis;		4. Allow mark point 4 in any context of water movement in the root e.g. into root hair.
8(b)(i)	1.	Increases then decreases;	2	Allow peak/maximum at any time
	2.	Peak/maximum at 13.00/14.00 (hours)/ 7.8 – 8.0;		between 13.00 – 14.00 or 7.8 – 8.0;
8(b)(ii)	1.	Maximum/overall rate is higher (in branches);	2	Allow converse for all marking points.
	2.	Reaches maximum/peak earlier (in the day) (in branches);		
	3.	Starts higher / ends lower (in branches)		
8(b)(iii)	1.	Movement starts/peaks earlier in branches/higher up;	2	
	2.	Creates tension/'negative pressure'/'pull';		

Question	Marking Guidelines	Mark	Comments
9(a)	 Haemoglobin carries oxygen / has a high affinity for oxygen / oxyhaemoglobin; 	6 max	
	2. In red blood cells;		
	 Loading/uptake/association in lungs; 		
	4. at <u>high p.O₂;</u>		
	 Unloads/ dissociates / releases to respiring cells/tissues; 		
	6. <u>at low p.O₂;</u>		
	 Unloading linked to higher carbon dioxide (concentration); 		7. Ignore reference to incorrect pH in relation to effect of higher carbon dioxide concentrations for marking point 7.
9(b)	1. Allows comparison;	2 max	Do not credit 'temperature affects
	2. (Different temperature) affects		results' on its own;
	enzymes;		2. Allow reference to denaturation of enzymes.
	 (Different temperature) affects respiration/metabolism; 		
	 (Different temperature) affects amount of dissolved oxygen; 		
9(c)	 Increases then levels out / stops increasing / fluctuates slightly; 	2	Allow description of 'fluctuates slightly' in terms of candidate
	2. At 5 (cm ³ dm ⁻³) / 320 (cm ³ g ⁻¹ h ⁻¹);		quoting figures after 320.
9(d)	1. <i>Chronimus longistylus</i> has high <u>er</u> uptake at low (oxygen) concentrations;	2	<i>Chronimus longistylus</i> has higher uptake to (oxygen concentration of) 2 / lower uptake after 2;; (= 2 marks)
	2. (Higher uptake) up to 2 cm ³ dm ⁻³ ;		2. Award mark if candidate uses
			figures from table e.g. higher at concentration 1 (220) <u>or</u> concentration 2 (285).
			Higher uptake at concentration 1 <u>or</u> 2 = 2 marks.
9(e)(i)	More (than in African) lost via gills in Australian lungfish / less (than African) lost via lungs in Australian lungfish;	1	

		Cherry Hill Tuition A Level Biology	AQA Pap	er 9 Mark Scheme	Page 10 of 12
9(e)(ii)	1.	More/most exchange is via lungs (in African lungfish);	2	1. Allow converse	for first point.
	2.	Gills will not function/function less efficiently (in air);		2. Allow water is r to function.	equired for gills

Question	Marking Guidelines	Mark	Comments
10(a)(i)	 Sex; Lifestyle; Body mass; Health; Ethnicity; Genetic factors / family history; 	2 max	Stress, smoking, diet etc are examples of lifestyle. 3. Allow weight for mark point 3. Reject: height.
10(a)(ii)	 Large sample/number / 410 000; Long time period / 8.5/many years; Different countries / more than one country; 	2	Reject: random
10(b)	Correct answer of 209/209.1 = 2 marks;; Incorrect answer but multiplies by 8.5 = 1 mark;	2	Answer of 210 = one mark
10(c)	Age affects risk of cancer;	1	Must relate to cancer not just to illness
10(d)	 Correlation does not mean causal relationship; Tea/coffee contains other substances; Contain different amounts of caffeine; Estimated intake (of tea/coffee); No control group; Only one type of cancer studied; Further studies required / only one investigation/study/group; 	4 max	1. Reject casual for point 1. Reference to 'due to other factors' on its own is not enough for a mark
10(e)(i)	 Treated the same; No caffeine; 	2	 Accept decaffeinated Reject 'placebo.

Cherry Hill Tuition A Level Biology AQA Paper 9 Mark Scheme Page 12 of 12

10(e)(ii)	 Absorb different amounts; Broken down by enzymes/digested; Different blood volumes; Differences in metabolism; Caffeine from a different source; 	1 max	Reject: Different body masses
10(e)(iii)	 Less oxygen/glucose to (cancer) cells; Less carcinogens; Reduces spread of cancer (cells); 	1 max	'Reduces cell division' on its own should not be credited.
