

# Identification Assistance/Guide

The City of Argonia and KDHE understand that some residents may have to make an educated guess on their service lines. This guide is to help assist you in identifying your lines and plumbing. We truly appreciate your cooperation.

## Copper

Copper looks like a penny  
Usually soldered but may have  
brass compression or flared fittings

## Brass

Brass has "threads".

Photos Courtesy of DC Water

## Lead

Lead pipes widen at base and  
often form a "bulb."

## Galvanized Iron

Magnet  
sticks

Galvanized pipes have  
"threads" at connections.
