

SERMORELIN

Oral & Injectable Dosage Forms
for Age Management
for Weight Management

Olympia Pharma is comprised of a state-of-the-art FDA 503B pharmaceutical outsourcing facility, and a 503A pharmacy. Both facilities provide access to high quality age management and nutritional medications.

OVERVIEW

Sermorelin Acetate is a "growth hormone-releasing hormone" (GHRH) that is produced naturally by the human brain to stimulate production and release of growth hormone by the pituitary gland. The increased volume of human growth hormone (hGH) causes an increase in the production of Insulin-Like Growth Factor-1 by the liver. During aging, GHRH declines causing a decrease in the secretion of pituitary hGH which leads to growth insufficiency which can erode health & vitality. Benefits may include:

- ✓ Increase of lean body mass
- ✓ Reduction of body fat through lipolysis
- ✓ Increase of strength and endurance
- ✓ Accelerated healing from wounds or surgery
- ✓ Improvement of sleep quality
