TEST YOUR BRAIN

Which number, when written as words, makes this true:

Cleverly, there are exactly ==?== E's in this sentence.

Last issues solution

A farmer was asked how many chickens he had sold at market that day. His reply was:

"I've had four customers today, and each bought half of my remaining chickens, plus a half chicken."

The farmer sold all of his chickens at market that day. How many chickens did the farmer sell?

Answer:

15 chickens.

The first customer bought $15 \div 2 + \frac{1}{2} = 8$ (leaving 7)

The second customer bought $7 \div 2 + \frac{1}{2} = 4$ (leaving 3)

The first customer bought $3 \div 2 + \frac{1}{2} = 2$ (leaving 1)

The first customer bought $1 \div 2 + \frac{1}{2} = 1$

If you have anything you would like the Watchem community to know, via the Watchit (Birthday greetings, for sale, wanted to buy, a thought of the Day, a Brain teaser, meeting etc,) please let us know.
