

ROBOTIC PALLETIZING CELLS are found in end-of-line areas in many markets including food and beverage, packaging, bag handling and stack/de-stack of items in general industries. These cells address common production issues:

1. Ergonomic working conditions for your employees
2. Increasing production without occupying valuable floor space
3. Quality and rework issues
4. Employee retention

Sunshine Automation & Tooling are Certified Value Providers (Integrators) with ABB Robotics. We have helped companies for over 25 years increase bottom line profits by reducing downtime, increasing production capability, enhancing working conditions and reducing dependencies on temporary labor. From simple palletizing cells to fully automated conveyance, palletizing and wrapping systems, we have the capability to scale the solution to your needs.

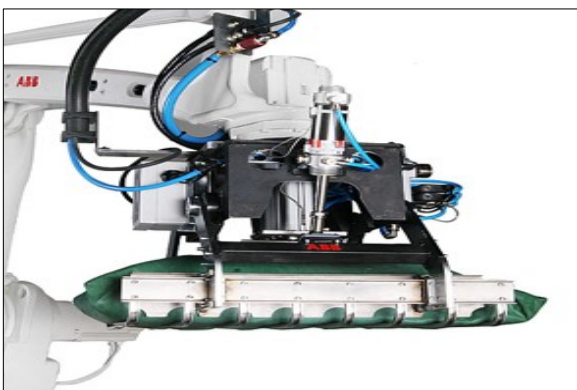

We can be easily reached at 941.351.6330 to discuss your process—to see if we can beneficially apply our automation domain expertise to help you and your team.
