

Glue-Lam Erectors, Inc.

"Installation of Wood Products Since 1968"

Active Member

Introduction:

Glue-Lam Erectors, Inc. is a family-owned company. We specialize in the supply and installation of custom laminated wood & solid timber structural wood systems.

We provide the following services:

Design:

We will sit down with architects and structural engineers early in the design phase to assist with the design. We offer budget pricing and preliminary design at no cost.

Products:

- **Laminated Wood** – Our primary focus is to sell and install custom laminated wood structures. Our firm represents Structural Wood Systems (SWS) located in Greenville, AL (www.structuralwood.com). SWS is a leader in the manufacturing of custom glulam beams. SWS can also manufacture 2" solid timber wood decking.
- **Solid Timber** – We sell and install custom solid timber projects. (See enclosed solid timber products).
- **Wood Decking** – Our firm is a distributor for "Lock Deck" laminated wood decking. When 3" or larger decking is called for, we recommend using laminated wood decking. (See enclosed "Lock Deck" information).

Structural Wood Repairs:

Our firm works with Lysaght & Associates, Structural Engineers (www.lysaghtassociates.com) to develop solutions for glulam and solid timber wood structures that need structural repair. We repair structures that have been damaged, for example by termites, water and/or fire. Our firm will travel nationwide. (See enclosed structural repair information).

Installation:

Rory Wray, President/CEO/Co-Owner oversees the installation of all products that we sell as well as all structural wood repairs. Rory started in the glulam wood business in 1978 and has supervised the installation of many large and complicated glulam and solid timber wood structures.

The material sales combined with our installation services is what sets Glue-Lam Erectors, Inc. apart from our competitors. Please do not hesitate to call or email for additional information.
