

Folkestone and Hythe Birds

Tetrad Guide: TR13 Z

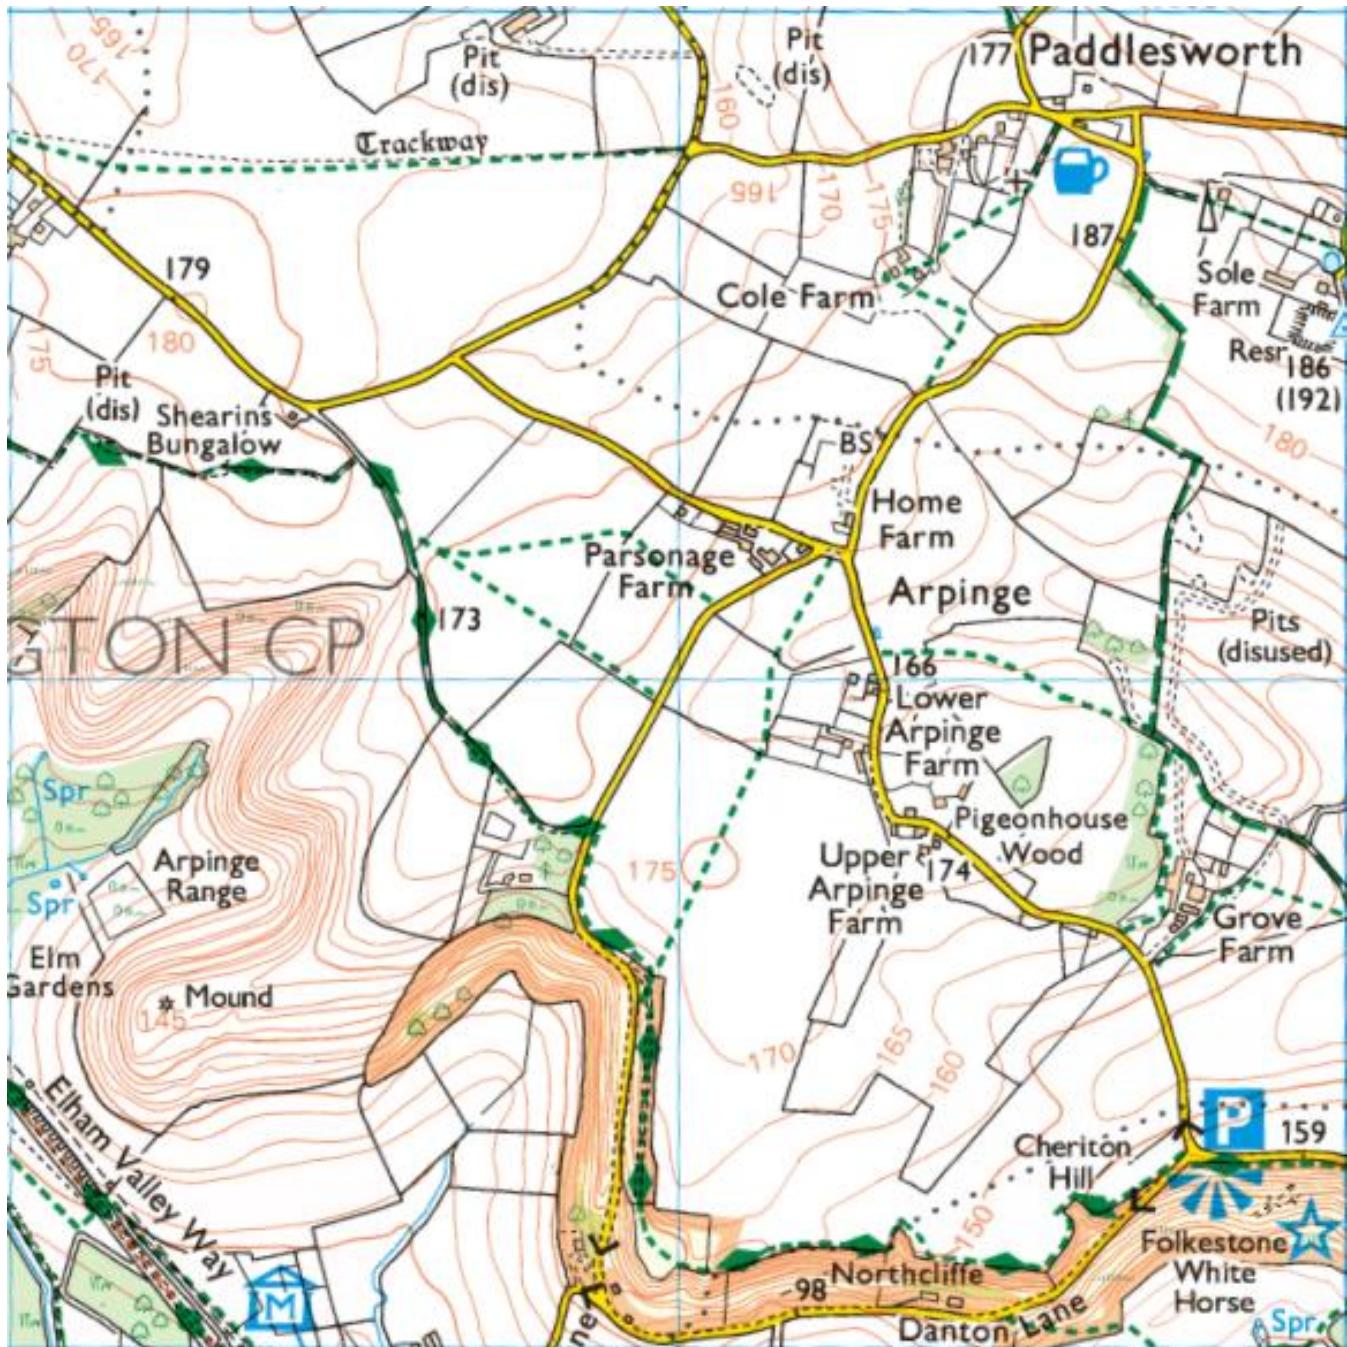

(Arpinge Range, Peene Quarry and Cheriton Hill)

Introduction

The tetrad TR13 Z includes a section of the Folkestone Downs escarpment between Arpinge Range and Cheriton Hill, a small woodland in the extreme south-west corner (Wick Wood) and farmland inland of the escarpment ridge, which contains another couple of small, wooded areas.

Habitats and birds

The section of the Folkestone Downs escarpment has provided most of the interest in this tetrad. Despite being largely under-watched the area has seen some interesting birds, with Peene Quarry having produced a Ring Ouzel in April 2016, a Red Kite in June 2014 and a Honey Buzzard in August 2013, whilst a Great Grey Shrike was seen at Danton Lane in October 1975. Stonechats are regular winter visitors and Wheatears may occur on passage.

The area would appear to have potential as a site for observing birds migrating along the downs and Cheriton Hill and Peene Quarry provide fine vantage points. On a visit during the wintering bird survey for the Bird Atlas on the 7th November 2010 a good selection of species were recorded heading west along the escarpment, including Stock Doves, Sky Larks, Meadow Pipits, Pied Wagtails, Redwings, Fieldfares, Redpolls, Siskins, Linnets, Goldfinches, Bramblings, Chaffinches and Starlings.

Access and parking

There is a small lay-by off the minor road just to the north-west of Peene Quarry and a slightly larger parking area on Crete Road West just to the east of the turning to Arpinge (shown on the map above). A section of the Elham Valley Way crosses the south-eastern corner of the tetrad, with parking to the south in TR13 Y.

Bird species diversity

The tetrad is land-locked, without any areas of water and has been relatively under-watched, which has resulted in a low diversity of species being recorded, with the overall total of 80, ranking at 28th amongst the 31 local tetrads as the table below demonstrates. The number of breeding and wintering species relate to those recorded in the 2007-2013 BTO/KOS atlas fieldwork.

	Total	Rank/31
Breeding species	40	26 th
Wintering species	50	27 th
Species recorded	80	28 th

The full list of species that have been recorded is provided as Appendix 1.

Other Natural History

The tetrad contains part of the Folkestone Escarpment SSSI – an extensive area of chalk grassland and scrub located on the steep escarpment between Etchinghill and Capel-le-Ferne. This site is one of the largest remaining areas of unimproved chalk downland in Kent.

The areas around Arpinge Range, Peene Quarry and Cheriton Hill hold a good selection of butterflies including Dingy Skipper, Silver-spotted Skipper, Wall, Green Hairstreak, Marbled White, Brown Argus, Adonis Blue and Chalk Hill Blue. Brimstones are also seen regularly, as are the migrant species Clouded Yellow and Painted Lady.

Moths include the rare Straw Belle, which restricted to a few sites on the North Downs and one in Surrey, and several other species that are characteristic of downland, including *Agonopterix pallorella* (Pale Flat-body), *Acleris aspersana* (Ginger Button), *Aethes tesserana* (Downland Conch), *Cochylis roseana* (Rosy Conch), *Moitrelia obductella* (Kent Knot-horn), *Oncocera semirubella* (Rosy-striped Knot-horn), *Pyrausta cingulata* (Silver-barred Sable), *Pyrausta nigrata* (Wavy-barred Sable), *Eudonia truncicolella* (Ground-moss Grey), Orange-tailed Clearwing, the Annulet, Chalk Carpet, Small Purple-barred, White Spot and Burnet Companion.

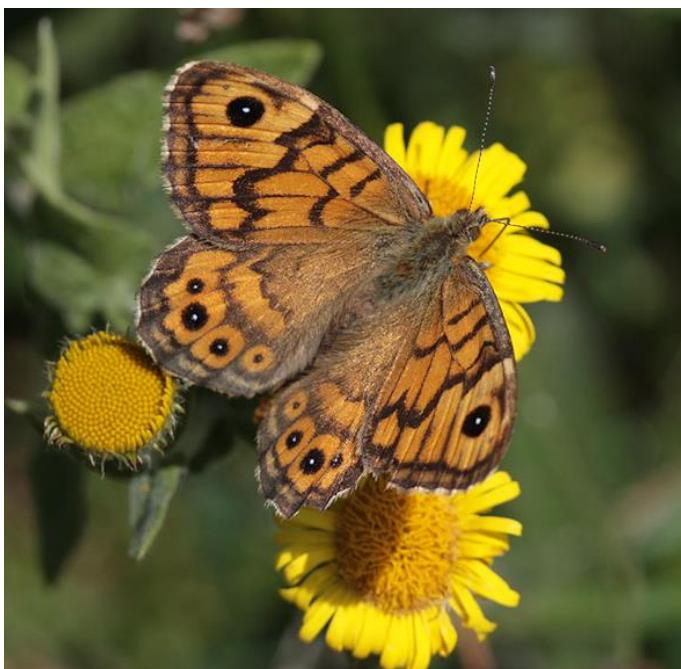

Trapping along the disused railway line close to Wick Wood in 2018 revealed the presence of the rare pyralid moths *Catoptria verellus* (Marbled Grass-veneer) and *Agroteria nemoralis* (Beautiful Pearl) which are both now presumed to be resident here, whilst Map-winged Swift was another notable capture, followed by a Netted Pug in 2019.

The migrants *Udea ferrugalis* (Rusty-dot Pearl), *Nomophila noctuella* (Rush Veneer), Hummingbird Hawk-moth, Silver Y and Pearly Underwing have also been noted. Adders may also been found along the escarpment. A list of all species recorded in the tetrad is provided below in Appendix 2.

General History

Peene Quarry was formerly used for excavating chalk for the manufacture of quicklime, which was used for mortar for building and for whitewash. An old lime kiln can still be seen alongside the lane beneath the quarry.
