

I was born and educated in Kuwait.

Over the course of my 18 years of teaching experience, I have learned that there are many fun and engaging ways to use Mathematics as a tool to help students achieve success in their pursuit of being 21<sup>st</sup> century learners. I believe that a deep understanding of important mathematical skills, and utilization of sound mathematical habits, is the key for students to be able to understand and interpret the world around them.

Best practices flow beyond Mathematics. As a Mathematics and Arabic language learning coach, I look forward to supporting teachers in their understanding of instructional practices which keep students engaged as learners.

Please feel free to contact me for any questions or suggestions.
