

CROSSBLOCK STETHOSCOPE COVERS AND DISPENSER

PART NUMBER: Dispenser M-329-1 / Roll M-329-2

The CrossBlock Dispenser houses up to 400 CrossBlock stethoscope covers. These covers provide an effective, practical, and low-cost solution to decrease Healthcare Associated Infections (HAIs). Stethoscope contamination occurs after a single physical examination and current decontamination compliance is poor. Multiple studies show stethoscopes threaten patients by transmitting pathogenic organisms that cause HAIs, a significant cause of patient morbidity and mortality. Setting a new standard for patient safety, CrossBlock is a practical solution for Hospitals, Long Term Care Facilities, Physician Offices, Humanitarian Operations and other medical centers.

FEATURES and BENEFITS

- Simple, intuitive hands-free application and removal
- Improves/enhances infection control procedures
- Applies in seconds
- The CrossBlock disposable stethoscope cover fits all common stethoscopes
- Highly visible to increase patient confidence and aid in compliance
- Compact, lightweight design; does not cause acoustic interference
