

Int'l School of Hydrocarbon Measurement

<http://www.Osages-You-Need-To-Know.com>

February 22, 2015

I know it would be impractical for all Shareholders to attend this conference, but it sure would be nice. At least we should see to it that our entire MC and the appropriate people from the BIA take advantage of this opportunity to educate themselves on the proper measurement of our royalty oil and gas. Without proper measurement, we will continue to lose millions of dollars each year in royalty payments.

Ray McClain, Osage Mineral Estate Beneficiary

INTERNATIONAL SCHOOL OF HYDROCARBON MEASUREMENT

Oklahoma City, Oklahoma
May 12-14, 2015

THE 90TH INTERNATIONAL SCHOOL OF HYDROCARBON MEASUREMENT offers you the opportunity to keep current on the latest changes and developments in the field of hydrocarbon measurement.

The 2015 school will offer over 260 technical classes that include fundamental classes and special hands-on workshops covering a wide range of Gas and Liquid Measurement/Flow topics as well as an extensive educational exhibit area presented by leading manufacturers in the measurement industry.

You will find a broad diversity of expertise in our instructors whose backgrounds represent a blend of technical training and industry experience.

In addition to taking classes you will have the opportunity to network with professionals in the industry who can offer you practical advice and new ideas.

We look forward to personally seeing you in Oklahoma City at the 2015 school.

Respectfully,

The ISHM Committee
