

Five Legacy Group Presents

COVID SAFETY AND RETURN TO CHURCH

Bishops, Pastors and Church Leaders

As the COVID-19 Vaccine continues to roll out, the virus begins to variate, and Churches start to open. COVID return to church, safety guidelines will be critical to avoid spread of the virus throughout your congregation. Many parishioners are hesitant on returning to church due to uncertainty and fear. What better way to place everyone's mind at ease than to let Five Legacy Group determine appropriate control measures to implement to keep you and your congregation safe.

We offer onsite assessment of how to phase in your congregation, seating, sanitizing and contact tracing. All services are available by webinar as well. You will be provided with a COVID-19 Certification for insurance purposes should a parishioner decided to sue the church, in the event they contract COVID. You have proof that the possibility of them contracting COVID-19 at your church were slim to none.
