The security and privacy of your personal data is one of our primary concerns and we have taken every precaution to protect it. Shippensburg, PA. Oral surgery is Oral and maxillofacial surgery is surgery to correct a wide spectrum of diseases, injuries and defects in the head, neck, face, jaws and the hard and soft tissues of the oral and maxillofacial region. Specialization in surgery is oral and maxillofacial surgeon. Endodontics, orthodontics, pediatrics, oral and maxillofacial surgery, oral and maxillofacial radiology, periodontics, pediatrics, and general dentistry. Yes, of course. They must be recognized by the ADA. At the moment there are nine. Dentistry is a job with many opportunities, some jobs related to dentistry are: dental public health, endodontics, oral and maxillofacial pathology, oral and maxillofacial radiology, oral and maxillofacial surgery, orthodontics and dentofacial orthopedics, pediatric dentistry, periodontics deals with the tissues in the mouth, and prosthodontics.

OMS is typical. OMFS also works. MaxFax is the trendy name. The latest in facial surgery is jaw distraction surgery, and this forms part of the surgical armamentarium of orthognathic surgery. The question which is often asked is: What is the difference between an "oral surgeon" and an "oral and maxillofacial surgeon"? The quick answer is that there really isn't a difference, oral surgeon just rolls off the tongue a little easier than the later. Unfortunately, what we sacrifice in that efficient remark is understanding on the part of our patients and other professionals.

Oral, being the tissues related to the mouth, and Maxillofacial, being the soft and hard tissues related to and surrounding the jaws and face. This involves surgical correction of diseases such as infections, tumors, metabolic changes, autoimmune, developmental, etc, pertaining to the mouth and face. Oral surgery involves also simple procedures like some extractions that could be performed by a general dentist. There is no sub-specialty for pediatrics within oral and maxillofacial surgery.

Oral and maxillofacial surgeons would be the ones who treat peds pts. Oral and Maxillofacial Surgery. Also orthodontics and cosmetic dentistry. In severe cases of malocclusion, surgery may be necessary and the patient would be referred to yet another specialist, an oral or maxillofacial surgeon. Oral surgeons have to aware not to disturb the Parietal and Oral-Maxillofacial nerves.
