

What you need to know about COVID-19

To prevent COVID-19

Wear a facemask

Stay 6 feet apart

Stay at home when sick

Avoid large gatherings

Travel only if needed

Symptoms of COVID-19

Cough

Headache

Fever

Sore throat

Muscle pain

Shortness of breath or difficulty breathing

New loss of smell or taste

Additional symptoms:

- Chills
- Runny nose
- Nausea
- Vomiting
- Diarrhea

When do symptoms appear?

- Symptoms can range from mild to severe illness and appear two to 14 days after you are exposed to the virus that causes COVID-19.

Seek immediate medical attention if you have:

- Persistent pain or pressure in the chest
- New confusion or an inability to wake up or stay awake
- Bluish lips or face or difficulty/trouble breathing

What to do if you have the virus or have been exposed to COVID-19

For CASES (people who have been diagnosed with COVID-19)

If you are vaccinated or unvaccinated:

- **Stay home** for at least 5 days.
- Isolation can end after day 5 if symptoms are not present or are resolving **and** a negative test collected on day 5 or later.
- If you do not test and symptoms are not present or are resolving, isolation can end after day 10.
- If fever is present, isolation should be continued until fever resolves.
- If symptoms, other than fever, are not resolving, continue to isolate until symptoms are resolving or until after day 10.
- Wear a well-fitting mask around others for a total of 10 days, especially in indoor settings
- Treat yourself with over-the-counter remedies to reduce your symptoms, drink plenty of fluids, and get plenty of rest.
- Stay away from the rest of your household members and do not go out in public— including going to the grocery store, gas stations or other public areas.

For CONTACTS (people who have been within 6 feet of someone diagnosed with COVID-19 for a total of 15 minutes or more over 24 hours)

If you are unvaccinated OR you are vaccinated and booster-eligible but have not yet received your booster:

- Stay home for at least 5 days, after your last contact with a person who has COVID-19.
- Test on day 5.
- Quarantine can end after day 5 if symptoms are not present and a diagnostic specimen collected on day 5 or later tests negative.
- If unable to test or choosing not to test, and symptoms are not present, quarantine can end after day 10.
- Wear a well-fitting mask around others for a total of 10 days, especially in indoor settings
- If you test positive, follow instructions for CASES.
- If symptoms develop, test and stay home.

If you are boosted OR vaccinated but not yet booster-eligible:

- Test on day 5.
- Wear a well-fitting mask around others for 10 days, especially in indoor settings
- If you test positive, follow instructions for CASES
- If symptoms develop, test and stay home.

If you live with others, stay in a specific "sick room" or area and away from other people or animals, including pets. Use a mask if you need to go out of your room and clean any shared spaces between uses. Use a separate bathroom if available.
