

## Thankyou

Thankyou for downloading this resource! We love to share resources that will create a positive impact and reduce behaviours! If you have any questions about this resource, please contact us at [info@newenglandbehavioursupport.com.au](mailto:info@newenglandbehavioursupport.com.au)

## How to construct

For a flexible routine, print pages 2 and 3. Cut Page 2 in half to represent a morning and afternoon routine. Laminate each seperately and apply loop velcro dots to the blank spaces. Cut the task labels from Page 3 individually and laminate. Apply the hook velcro dots to the back of the task cards. Apply the relevant task cards to the routine.

For a fixed routine, print page 4 and cut in half to represent a morning and afternoon routine. Laminate seperately.

## How to use

Visual routines should be placed in an accessible part of the house, such as your fridge or a cleared notice board. Encourage the person to interact with the routine board by saying "let's have a look at what's next" and praise for all tasks achieved. To strengthen the moveable task routines, use a finish box to put the completed task cards into, which supports a clear indication of the task ending (and all behaviours associated within that task).
