Skin Enhancement

Secret RF/PRP Add On (Microneedling)

Secret RF is microneedling with radio frequency to create small channels in the skin and deliver energy to the deeper layers of the skin where treatment is most effective with minimal damage to the skin's surface. It addresses aging skin, photodamage, fine lines and wrinkles on the face and neck, scars and stretch marks. It is suitable for all skin types with little to no down time.

Typically needs 3 treatments 4 weeks apart. Maximum results are 3 months after the last treatment.

PRP can be added on to this treatment if patient desires. This is where the patient's own blood is spun down and the platelet rich plasma, which is high in stem cells and activating factors, is both injected into the deep layers of the skin as well as massaged onto the surface after the treatment to soak down into the channels that were created. These channels typically close after 5 hours.
