Author: Charles G Morris
ISBN: 9780133908923

Sensation and Perception 4. States of Consciousness 5. Learning 6. Memory 7. Cognition and Mental Abilities 8. Motivation and Emotion 9. Life-Span Development

Morris received his B. He joined the University of Michigan in where he served until his retirement in From—, he served as Associate Chair of the Department of Psychology. Upon his retirement in , he was appointed Emeritus Professor. Morris has written more than two-dozen books, numerous articles, and more than thirty papers and presentations. It is colorful and engaging without being busy or distracting. New figures and photographs have been carefully selected to complement the text material. It is increasingly true today that, as valuable as a good

textbook is, it is still only one element of a comprehensive learning package. Throughout the many editions of this book, we have labored to produce not only a well-written text but also a full range of supplemental learning tools.

The supplements package that accompanies the Fifth Edition is the most comprehensive and impressive yet. Both are accessible at. The Companion Website portion of this new resource provides materials to help students review chapter content and prepare for tests. In addition, chat rooms and message boards allow students to share their ideas about psychology with students from their own classroom or from colleges across the country. Other materials are referenced by icons in the margins of the text and can be found in The Psychology Place, which is accessible through each chapter of the Companion Website. Interactive exercises, reports of interesting research, articles from Scientific American, and Op-ed pieces are provided that will enhance the course for motivated students.

The Instructor's Resource Manual, the Practice Test and Review Manual, and our new Media User's Guide reference these materials, which can be made a part of the classroom experience or used as homework assignments. On-Line Course Management. For instructors interested in distance learning, Prentice Hall and Pearson Education are proud to offer a fully customizable, on-line course with www links, on-line testing, and many other course management tools.

See your local Prentice Hall representative or visit our special Demonstration Central website at for more information. For each chapter the manual contains a Chapter Outline; a list of Learning Objectives which correspond to the exercises in the Practice Test and Review Manual; Lecture Suggestions describing additional topics of interest; suggested Demonstrations and Activities such as class projects and experiments; and Student Assignments including reports and out-of-class exercises. Each chapter also contains a list of the ABC News videos, multimedia resources, and transparencies available to accompany the text plus Handouts for use with the Demonstrations and Activities. Finally, each chapter ends with suggestions on how to use the associated multimedia materials in either classroom presentations or as homework assignments.

To facilitate instructors in creating tests, each question is page-referenced to the textbook, is described as either factual, conceptual, or applied, and is identified as being new, from the previous edition, or revised. We will continue our effort to improve and expand the Test Item File for future editions, and as always we welcome your comments, suggestions, and teaching feedback. Send them directly to: Charles G. The questions in the Test Item File are available on both platforms and allow instructors complete personal flexibility in building and editing their own customized tests.

Advances in the most recent version of this software now allow instructors to load their tests onto the World Wide Web or a Local Area Network in an online testing format. Prentice Hall offers a telephone test preparation service through which instructors can call a special, toll-free number and select up to questions from the printed Test Item File available with the text. The test and an alternate version if requested, and answer key are mailed or faxed within hours of the initial request. PH Color Acetate Transparencies for Introductory Psychology Series V contains illustrations, figures, and graphs from the text as well as images from a variety of other sources.

PowerPoint Slides. Scores of illustrations, figures, and graphs from the text have been made accessible via the popular PowerPoint programs from Microsoft. Instructors can download these images from the Faculty Section on the Companion Website, edit them, and project them onto a screen while delivering lectures, or clip them for inclusion on web-based learning systems. Prentice Hall has assembled a collection of feature segments from award-winning news programs. The following libraries are currently available to qualified adopters: The Alliance Series is the most extensive collection of professionally produced videos available with any introductory psychology textbook. Contact your local Prentice Hall representative for details.

Serves as a guide for new instructors or teaching assistants to help them manage the myriad complex tasks required to teach effectively from the start. The Third Edition has been updated to reflect the explosive growth of technology for the classroom and provides many excellent suggestions for integrating the Web into the course. Each chapter contains an Overview to introduce students to the chapter; Class Notes Outline with space for students to take notes from the text and during lecture; a Learning Objectives exercise to test students' understanding of the main themes; a multiple choice Pretest and Posttest for gauging students' progress; Short Essay Questions to develop writing skills; Language Support Section for extra support in English; and Flash Cards of vocabulary terms. Each chapter also reviews the multimedia materials available with this edition with special exercises relating these resources to material in the text.

Prentice Hall and the New York Times have joined forces to bring students a complimentary newspaper supplement containing recent articles pertinent to introductory psychology. These articles augment the text material and provide real-world examples. They are updated twice a year. Also you will find test banks for the following chapters: The Science of Psychology 2. The Biological Basis of Behavior 3. Sensation and Perception 4. States of Consciousness 5. Learning 6. Memory 7. Cognition and Mental Abilities 8.
