

P3 SHIELD - APPLY ONCE
**PROTECTION FOR
ONE MONTH.**

Prevent and Protect

WE PROVIDE THE ONLY PRODUCT WITH A ONE TIME APPLICATION EVERY 30 DAYS.

P3 Shield offers a patented and proven single step solution to disinfect bacterial and viral growth. P3 Shield leads the way to successfully combating Covid and including flus, colds and bacterial contaminations. Our product is non-toxic as well as safe to apply to wood, metal, glass, cloth, upholstery, leather or tile.

Once P3 Shield is sprayed, nano particles bond to the surface and retain it's effectiveness for a minimum of 30 days (see independent lab test below). Daily disinfecting is no longer necessary. Viruses and bacterias are killed on contact. It is odorless and colorless.

Independent lab tests confirms P3 Shield yielded a much better result against the SARS CoV-2 than the chlorine bleach formulation which declined 30 minutes later, whereas P3 Shield was significant at 30 days with only one application.

P3 Shield is committed to working with government agencies, municipalities, healthcare facilities, schools, churches and more to protect infrastructure and the public from the spread of COVID-19.

P3SHIELD COSTS PENNIES PER SQUARE FOOT

THE VALUE OF P3SHIELD TECHNOLOGY:

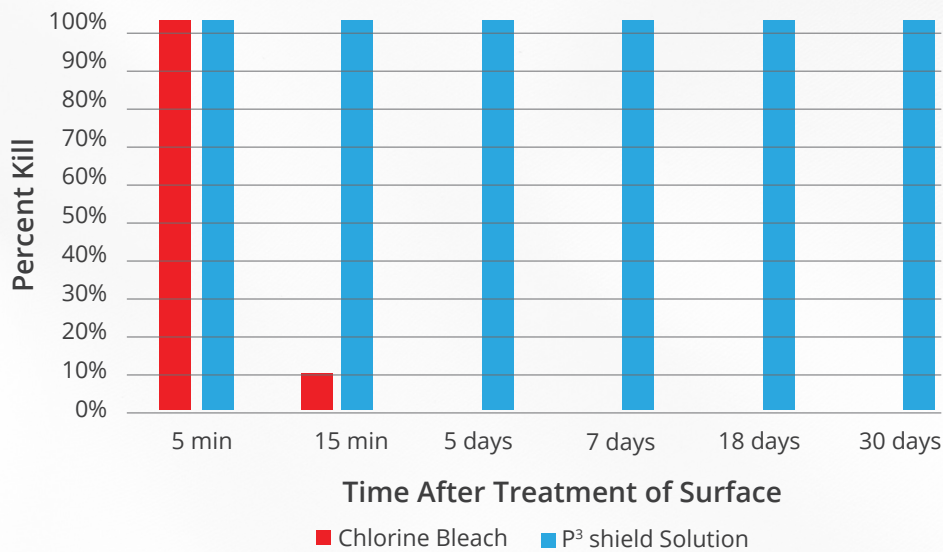

- Eliminates viruses and bacterias on contact
- One-time application every 30 days
- Reduced costs of bulk sanitizing products
- Reduced costs of sanitizing time and overhead
- Increased level of COVID-19 protection
- Protection for students, employees and public

Once applied, standard cleaning processes can continue with just soap and water.

P3 Shield has a cost efficient and sustainable technology for long-term protection from COVID-19, flus, colds and bacterias.

Reduction of staph aureus on surface After Treatment With Chlorine Bleach and p³ shield Solution

Arc Point Labs Study 12-02-2020.

Validation of P3 Shield solution over 30 days compared to a standard chlorine disinfectant. Live viruses of COVID/ SARS2, Streptococcus and monoclonal antibodies.

P3Shield is an exclusive distributor for Medetech Corporation, Medecide™ Product Solution. The Founder and CEO of Medetech Corporation is the Founder & CEO of Oxi-Science LLC.

- Medetech Corporation developed these unique solutions (US Patent #10,028,482 [2018]) to take full advantage of the superior germ-killing effectiveness of chlorine (Cl) atoms.
- The technology does this by binding active Cl into biodegradable coatings that endure on disinfected surfaces.
