In 2017, Founders Dmitri Howie, Stephen Luke, and Mark Millner envisioned a community for Houston, where the creation of a 'nation' could be done for the purposes of Vlad Tepes history, as well as community development and unification.

Dracul is one out of three micronations in the Houston area, primarily the most popular and successful of the three.

We operate in a democratic type government, providing various jobs and opportunities to those who join us.

**Dracul was founded in 2017, in
the City of Houston, Texas**

**Our mission is to preserve Vlad
Tepes history, as well as provide
a friendly community to those
around the world.**

**Dracul has over 90 "citizens",
which take part in free and open
elections, every four years.**
