SUMMARY

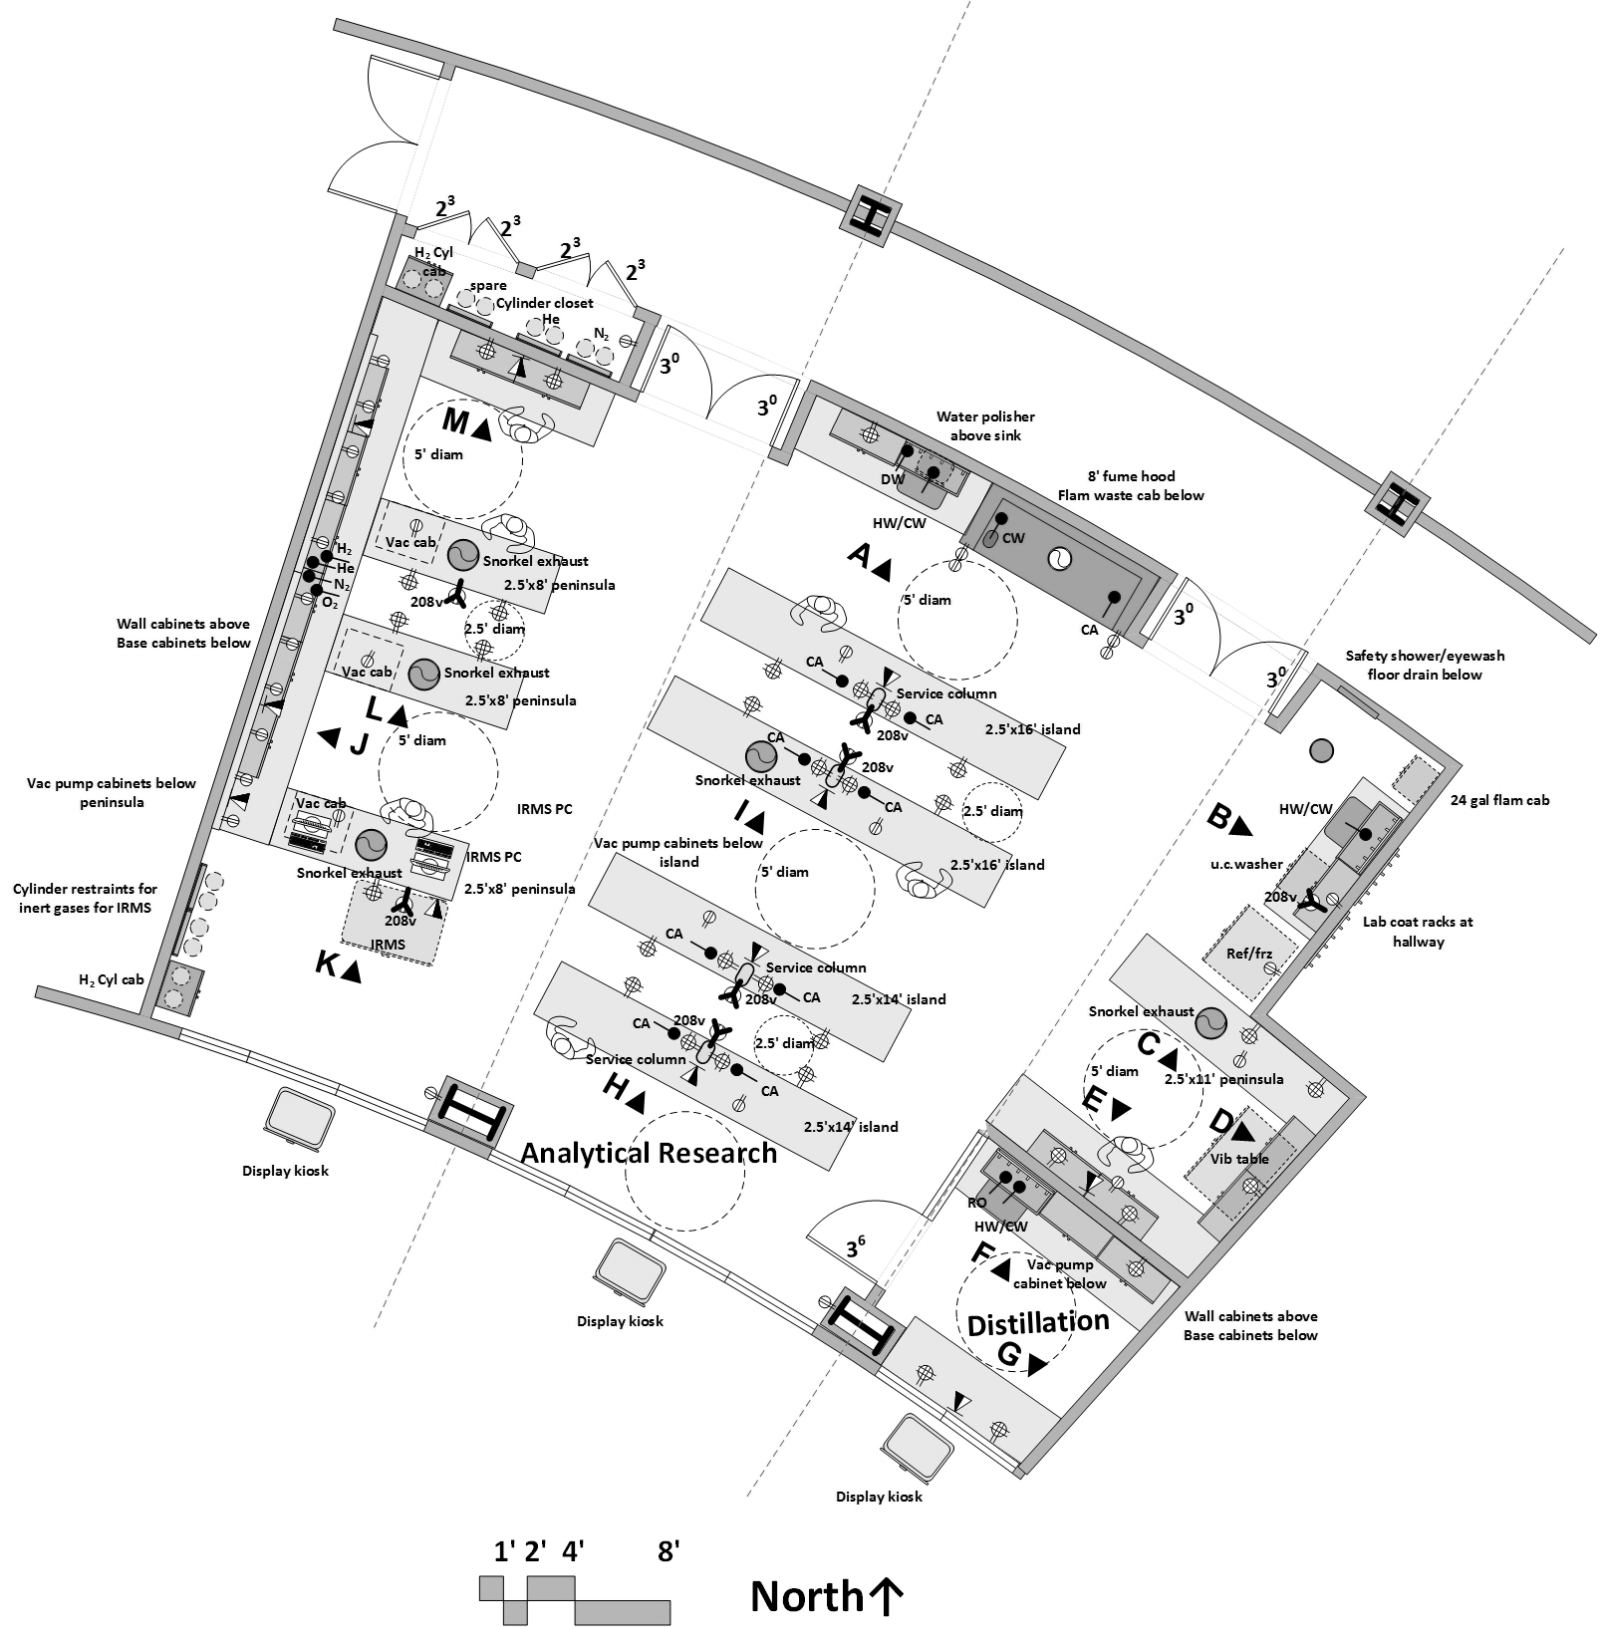

This document provides the basis of design for the new analytical laboratories that will be in the new YLEO Global World Headquarters in Lehi, Utah. The laboratory design noted herein is based upon meetings held with YLEO science personnel on 2017 July 21, August 16, and September 08.

Additional comments received via to date via email have been incorporated into this document.

All electrical outlets and plumbing fittings have been noted.

All different lab elevations have been noted herein.

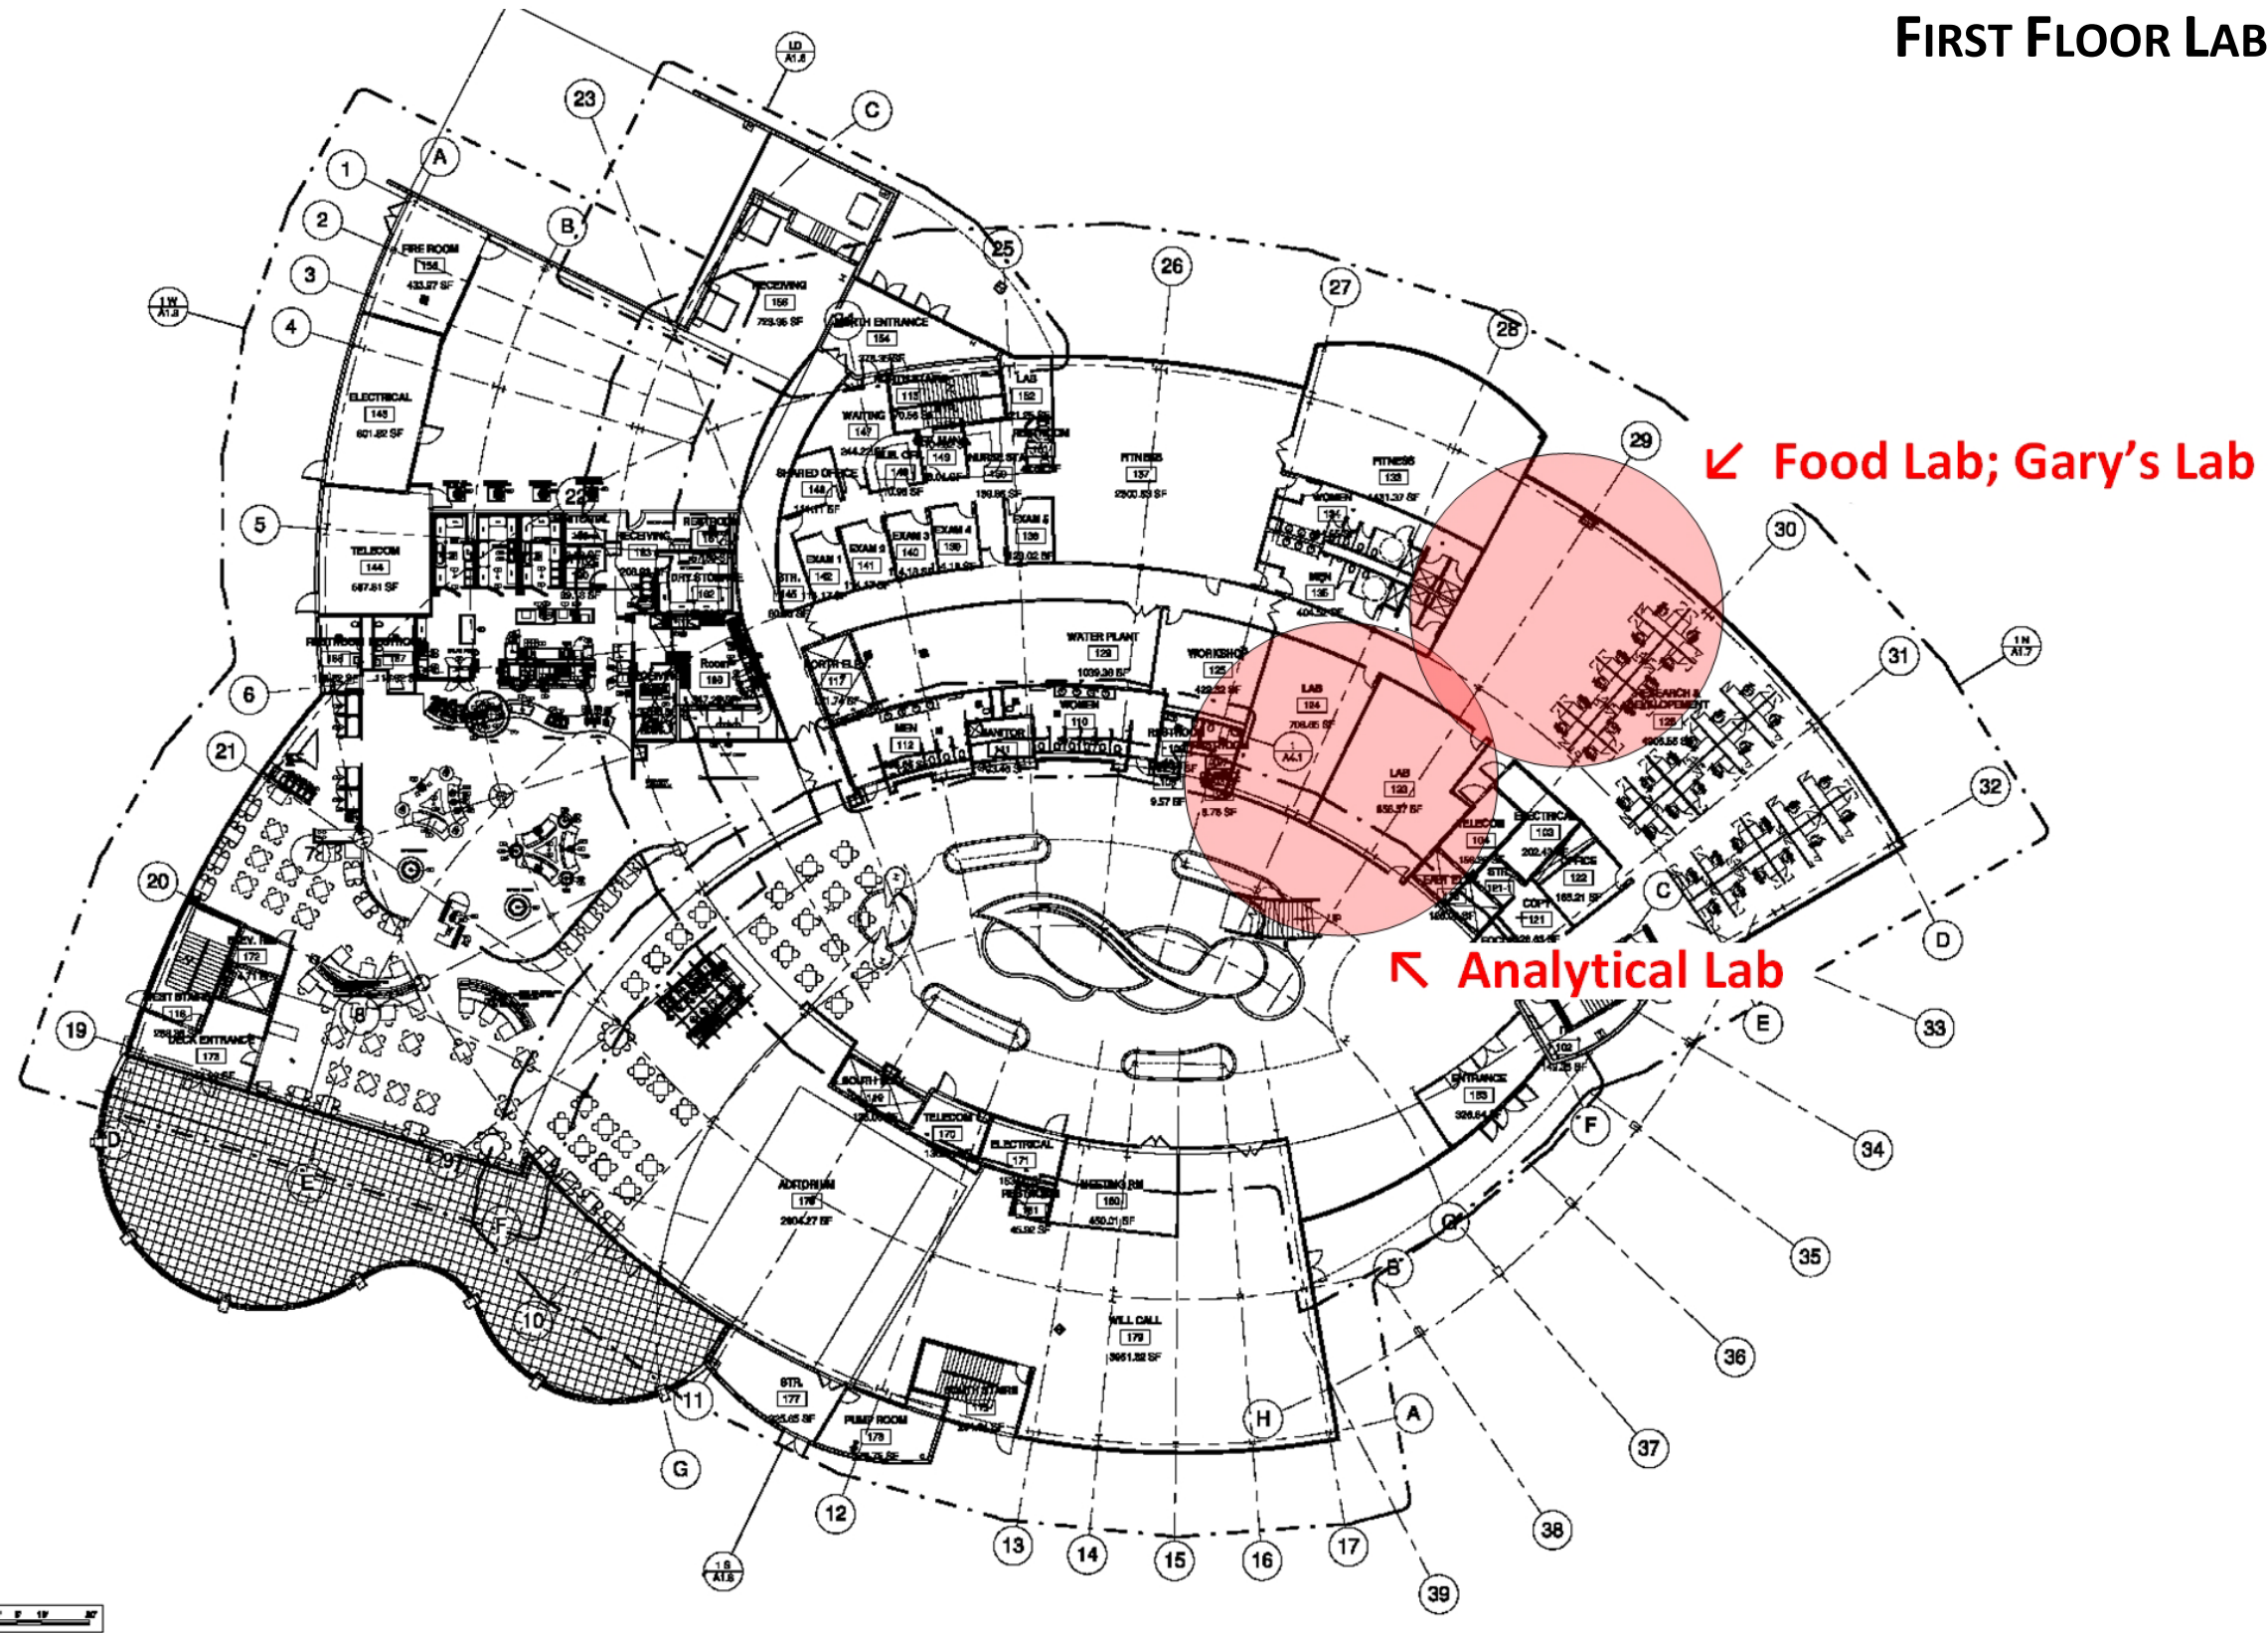

Typical interior lab elevations have been included.

	PW Pure water valve		Lab coat racks at hallway				
	Floor drain 8" diameter						

ANALYTICAL LABORATORY

ARCHITECTURAL

Occupancy: B
 Floor: sheet vinyl with integral base; Walls: gypsum board and enamel paint
 Ceiling: 12' acoustic tile
 Doors: 3⁰/3⁰x8⁰ pair at hallway; 3⁶x8⁰ at Distillation Room
 Windows: at atrium
 Daylight attenuation: at atrium windows as required by Owner
 Acoustic Attenuation: NC 40 or less; Security: key or card reader access

STRUCTURAL

Vibration attenuation: 2,000 microinches per second or less
 Isolate slab at lab perimeter to prevent transmission of vibration from adjacent elevator at east side and workshop at west side.

MECHANICAL

Hours of operation: 6 am to 10 pm
 Temperature: 70 deg. F, +/- 2 deg. F; 100% exhaust- no recirculation of air
 Fume hood exhaust on emergency power supply
 (8) air changes per hour minimum occupied (air change rate may be higher due to equipment heat gain)
 (12) air changes per hour for Distillation Room
 (4) air changes per hour unoccupied
 Pressure: negative to corridor; Distillation room negative to Analytical Lab
 Humidity: Ambient
 Equipment Heat Gain: 25 btuh/sf
 1200 c.f.m. exhaust at fume hood (VAV); General lab exhaust at ceiling
 Do not locate air diffusers above benchtop instruments

ELECTRICAL

110v fourplex and duplex outlets (maximum of four duplex per circuit)
 208v/20amp outlets at each peninsula/island and Distillation Room
 Stand-by power for equipment; Emer power for fume hood exhaust
 Local UPS power in lab; Data & Wireless data
 Lighting: indirect LED @ 600 LUX; Task lights below wall cabinets
 Provide light switches at door

PLUMBING

Hot/Cold water (HW/CW) at sinks with vacuum breakers
 Pure water point-of-use water polisher at sink
 Domestic water feed at point-of-use water polisher
 Disposal (1/2 hp) at each sink
 Hydrogen, Oxygen, Helium, Nitrogen cylinder gases
 All gas piping to be stainless steel 316L hospital grade
 1/2" diameter from cabinet/manifold to valve
 Run piping behind casework at perimeter walls
 Compressed Air at islands
 Domestic water and drain at safety shower/eyewash

CONTRACTOR FURNISHED EQUIPMENT

Wood (bamboo) casework - base cabinets, wall cabinets, tall cabinets
 Epoxy resin tops and sinks; Faucets & fittings
 Chemical fume hood; Safety shower/eyewash; Fire Extinguisher
 Cylinder restraints; Cylinder cabinet (Hydrogen gas)
 Snorkel exhaust units
 Point-of-use water polisher at sink; Undercounter washer

OWNER FURNISHED EQUIPMENT

Chairs; Benchtop analytical instruments
 IRMS instruments; Vibration table

EQUIPMENT CUT SHEETS

CHEMICAL FUME HOOD CUT SHEET

Protector® XStream™ Laboratory Hoods

Protector XStream Laboratory Hood 9840600 is shown with SpillStopper Work Surface 9849800, Protector Acid Storage Cabinet 9901100 and Protector Standard Storage Cabinet 9900100. Blower, ductwork, work surface and base cabinets must be ordered separately.

All models conform to the following regulations and standards:

- SEFA 1-2002
- NFPA 45-2000
- ASTM E84-01
- ASHRAE 110-95
- ANSI Z9.5-1993
- UL 3101-1/61010-1
- CAN/CSA C22.2 No. 1010.1
- UL 1805
- CE Conformity Marking (230 volt models)†

Fixture models feature:

- Two pre-plumbed service fixtures with forged brass valves, lower right side with brass tubing for gas and lower left side with copper tubing for cold water. Components for converting either or both fixtures to air and vacuum are provided. **Inlet tubing is not provided.**
- One pre-wired 115 volt, 20 amp electrical duplex receptacle on lower right side.

All models require (not included):

- **Remote Blower.** See back pocket.
- **Ductwork.** See back pocket.
- **Work Surface.** See pages 92-95.
- **Base Cabinet or Stand.** See pages 96-106.

Optional accessories for on-site installation include:

- **Service Fixture Kits.** See page 107.
- **Electrical Duplex Kits.** See page 108.
- **Guardian Jr. and Digital Airflow Monitor Kits.** See page 108.
- **Distillation Grid Kits.** See page 110.
- **Sash Stop Kits.** See page 108.
- **Snuffer Fire Extinguishers.** See page 110.
- **Ceiling Enclosure and Rear Finish Panel Kits.** See page 109.

† U.S. Patent No. 6,461,233
† pending

‡ Heights of switches, electrical receptacle and service fixtures meet requirements of ADA.

■ Exclusive Feature

All models feature:

- Modified by-pass airflow design.
- Ergonomic air foil with aerodynamic Clean-Sweep* airflow openings.
- Upper Dilution Air Supply.*
- Glacier white, dry powder epoxy-coated steel exterior.
- Chemical-resistant, fiberglass-reinforced, composite panel liner and pre-set Rear Downflow Dual Baffle System* with flame spread less than 25 per ASTM E-84
- 3/16" thick tempered safety glass vertical-rising sash with epoxy-coated aluminum sash handle with large radius and perforations.*

- Removable front and side panels and front and interior service access panels for access to plumbing and electrical wiring.
- Pre-wired T8 fluorescent lighting, ADA-compliant light and blower switches for 115 volt, 60 Hz operation.
- Sash stop located at 18" sash opening position.
- Epoxy-coated stainless steel, 12.81" ID exhaust connection(s).

Contact Labconco at **800-821-5525** or **816-333-8811** for ordering information on explosion-proof lighting and other sash configurations and for blower sizing assistance.

8' fume Hood: 1200 cfm VAV 6' Fume Hood: 800 CFM VAV

Ordering Information

Protector® XStream™ Laboratory Hoods

ASHRAE 110-95 tests show less than 0.05 ppm leak rate when tested at 4.0 fpm; at OSHA-approved 60, 80, and 100 fpm face velocity and sash positions of 18" and 28". To ensure performance at 60 fpm, Labconco engineers challenged the Protector XStream Hood at less

than ideal conditions such as 30 fpm cross drafts, modified ASHRAE test procedures and average face velocities lower than 60 fpm. Contact Labconco for a technical paper with complete ASHRAE test data.

**International electrical configuration

- **SSBF2160** Recessed Safety Station with Drain Pan, Stainless Steel Shower Head
- **SSBF2162** Recessed Safety Station with Drain Pan and Daylight Drain, Stainless Steel Shower Head

SSBF2160

Provide hard drain connection in wall for eyewash unit.

Provide floor drain for shower.

Canopy Hoods

Canopy Hood 4799000. Blower and ductwork must be ordered separately.

The Canopy Hood is specifically designed to vent non-toxic materials such as heat, steam and odors from large or bulky apparatus such as ovens, steam baths and autoclaves. The hood may be installed on a wall or suspended from the ceiling for peninsular and corner locations. **For most efficient performance, the hood should be installed no more than 12" above the equipment to be ventilated.** Coupled with a blower and ductwork, the Canopy Hood can operate at a wide range of exhaust rates.

Features:

- Glacier white, epoxy-coated steel construction
- Integral baffle
- Fully assembled, complete with mounting hardware for installation on wall or suspended from ceiling. **Threaded rod is required.**

Both models require (not included):

- **Ductwork.** Contact Labconco for recommendations
- **Remote blower.** Contact Labconco for recommendations.

5 SERIES WALL HOODS – 18" HIGH

Viking Professional 5 Series – VWH

APPEARANCE AND DESIGN

- Backlit LED knobs extend and illuminate to control lighting level and fan speed, then fully retract when not in use
- Seamless design provides a refined finish to your kitchen
- Tough-box ventilator housing protects blower and quietly removes smoke and odor
- Quietest hood and ventilator combination in the industry
- Multi-speed ventilator control knob allows precise adjustment to desired fan speed
- Maintenance-free ventilators never need to be cleaned with the commercial-type hood filters doing the dirty work
- Cook with peace of mind as the built-in heat sensor activates the ventilator to full power if cooking temperatures reach uncomfortable levels
- Ventilators must be purchased separately and are available in internal, external, and in-line models (See Ventilation guide for compatibility) Must use Viking ventilator kits with Viking hoods

INTERIOR, EXTERIOR, OR IN-LINE VENTILATORS

- Wall and island hoods
 - Interior-power ventilator kits – 300 CFM (VINV300), 600 CFM (VINV600), or 1,200 CFM (VINV1200)
 - Exterior-power ventilator kits – 900 CFM (DEV900), 1,200 CFM (DEV1200), or 1,500 CFM (DEV1500)
 - In-line-power ventilator kits – 900 CFM (DIL900) or 1,200 CFM (DIL1200)
- See specification chart for compatibility
- One ventilator, one duct run for any size hood/ventilator

MODEL NUMBERS

- VWH53048 – 30" W. Wall Hood
- VWH53648 – 36" W. Wall Hood
- VWH54248 – 42" W. Wall Hood
- VWH54848 – 48" W. Wall Hood
- VWH56048 – 60" W. Wall Hood

COLOR FINISHES

- Available in seven exclusive color finishes
- Stainless Steel (SS), Black (BK), White (WH), Apple Red (AR), Burgundy (BU), Cobalt Blue (CB), Graphite Gray (GG)

WARRANTY

- 2-year full – complete product
- 90-day full – cosmetic parts such as glass, painted items and decorative items
- 5-year limited – ventilator motors

ACCESSORIES

- DCW30SS – Wall Hood Duct Cover for 30" Hood

FLAMMABLE CABINET CUT SHEET

Analytical Lab

Flammable Liquid Safety Storage Cabinet, 24 Gal. Yellow, One Door, Manual Close (Space Saver)

[View Gallery](#)

Model Number:
1923

UPC Code:
048441333943

Description:
Eagle's 24 Gallon, Manual-Closing, Space Saver Safety Cabinet is constructed of 18-gauge steel. The sides, top, bottom, and doors are double-walled with a 1 1/2" air space between walls. Includes two vents, each have 2" threaded fittings and fire baffle and cap. Standard Flammable Liquid Safety Cabinets come in yellow high gloss powder finish with red warning, plus grounding attachment, 3-point latch system, and 2" raised, leakproof door sill. Each shelf is adjustable, supported by 4 brackets, and can support 350 pounds. (All Eagle metal cabinets meet NFPA Code 30 and OSHA requirements).

Capacity:
24 gal. (90.9 L)

Color:
Yellow

Door Style:
Manual Close

Inside Dimensions:
20"W x 15"D x 62"H (50.8 x 38.1 x 157.5 cm)

Lock:
True

Number of Shelves:
3

Shelf Depth:
14 3/4" (37.5 cm)

Shelf Model Number:
1919

Uniform Fire Code:
False

Dimensions

Width:
23" (58.5 cm)

Depth:
18" (45.8 cm)

Height:
65" (165.1 cm)

Weight:
224 lbs.

Approvals:

Compliance:

Do not vent flammable cabinet.

Provide domestic feed water valve

Milli-Q® Integral water purification pathway

The Milli-Q® Integral system uses regular tap water as feed, and produces pure and ultrapure water delivered by independent POD dispensers.

- | | | |
|--|---------------------------------------|---|
| 1. Tap water feed | 11. RO reject solenoid valve | 21. Flow meter |
| 2. Strainer | 12. Permeate conductivity cell | 22. E-POD® dispenser and final polisher |
| 3. Inlet solenoid valve | 13. 3-way solenoid valve | 23. 185/254 nm UV lamp |

| 5. Pressure regulator | 15. Elix® resistivity cell | 25. Milli-Q® product water resistivity cell |
| 6. Booster pump | 16. Thermistor | 26. Thermistor |
| 7. Feed water conductivity cell | 17. Check valve | 27. Milli-Q® water TOC monitor |
| 8. RO cartridge with sanitization port | 18. 254 nm UV lamp | 28. Q-POD® dispenser |
| 9. RO reject recycling | 19. PE Reservoir, ASM and Vent filter | 29. Final polisher Application Pak |
| 10. Drain | 20. Delivery pump | 30. Recirculation solenoid & check valve |

For scientists who work with a variety of applications requiring both pure (Type 2) and ultrapure (Type 1) water, the Milli-Q® Integral water purification system provides the perfect solution. The system's comprehensive and optimized sequence of water purification and monitoring technologies allows both pure and ultrapure water to be produced directly from potable tap water – in a single unit. Milli-Q® Integral system users gain in convenience and also save on capital expense and lab space.

Pure and ultrapure water from tap – in a single unit

The Milli-Q® Integral system is a compact solution that combines the production of Type 2 (pure) water and Type 1 (ultrapure) water in a single unit – eliminating the need for a pretreatment stage upstream of the ultrapure water system.

Dual POD (Point-of-Delivery) concept

The Milli-Q® Integral system's POD dispensers are designed to save space and increase convenience for users. Users can customize their lab installations by placing Q-POD® ultrapure water dispensers and E-POD® pure water dispensers exactly where they're needed. For additional convenience, the ergonomic POD units have been specially designed to accommodate the shape and height of the most commonly used laboratory glassware.

As many as three independent POD dispensers per system can be conveniently located at different places in the laboratory. The versatile POD dispensers can be adapted to a variety of laboratory applications with our range of point-of-use Application Paks, which remove specific contaminants just before water is dispensed.

Lower running costs and water waste with exclusive Elix® technology

The Milli-Q® Integral system combines proven and superior Elix® electrodeionization (EDI) technology with the best-in-class Milli-Q® solution. Milli-Q® Integral system users benefit from pure and ultrapure water of consistently high quality – as well as lower running costs and water waste, thanks to EMD Millipore's patented Elix® technology.

Elix® EDI technology provides consistent production of superior quality pure water with no need for added softeners, chemical regeneration or the replacement of DI cartridges.

The Elix® module is built using electrodes and mixed bed ion-exchange resins separated by anion- or cation-permeable membranes. The ion-exchange resins are permanently self-regenerated in the Elix® EDI module via a weak electrical current, ensuring constant high water quality at a low operating cost. This low energy process rejects little water, allowing users to save on tap water and electricity consumption. No special maintenance or chemical regeneration that would deteriorate the resin beads is needed. This unique process has become the new standard for the production of Type 2 water, and is replacing both distillation and conventional deionization units in the laboratory.

Integrated Elix® technology provides Milli-Q® Integral users with consistently high water quality at optimal operating cost. Following prior purification by RO technology, water produced by the Elix® module has a resistivity level greater than 5 MΩ·cm @ 25 °C – a value that exceeds the resistivity of double distilled water. The pure water produced may be used for basic laboratory needs, such as buffer and reagent preparation, microbiology media preparation, histology, dissolution testing (with UV detection) and glassware rinsing.

Elix® electrodeionization (EDI) module

ICE MACHINE CUT SHEET

Gary's Lab

CU0415 - 50 lb Self-Contained Ice Machine

Self-Contained Under Counter Cuber with Storage

Features and Benefits

- Reliability:**
 - 3 Year parts and labor warranty.
 - Assembled in the USA.
 - Corrosion resistant exterior.
- Ease of Use:**
 - Slide back door allows easy access to ice in the bin.
 - Intuitive control panel allows for quick and easy operation.
 - Ice scoop included.
- Compact Design:**
 - Only 15" wide, the ice maker can be placed in the tightest locations.
 - Optional floor mount kit allows for installation under 34" ADA counter tops.
- High Production:**
 - Produces up to 58 lb (26 kg) per day and stores 36 lb (16 kg), meeting the ice demands for many different applications.
- Quality Ice:**
 - Unique evaporator produces crystal clear cubes.
- Environmentally Friendly:**
 - Low energy consumption.
 - Meets US Safe Drinking Act low lead requirements.
 - Non-ozone depleting R-134A refrigerant.

VACUUM PUMP CABINET CUT SHEET

Analytical Lab

Requires vent per Div. 23.
Requires power per Div. 26.

Protector Vacuum Pump Storage Cabinets Models 9907000, 9907100

1. **Cabinet** – Features 18 gauge steel exterior sidewalls. The cabinet shell has been epoxy coated to provide a durable chemical resistant surface.
2. **Door Assembly** – Cabinet features one manual closing, non-locking door. The door is of 18 gauge epoxy coated steel and features a strike and latch assembly to hold it in position once closed.
3. **Vent Connection.** Cabinet features two vent connections on the back wall of the cabinet. These vent openings have been left open and venting is left to the discretion of the customer.
4. **Electrical Connection** – Cabinet features 115V, 60 Hz electrical outlet to provide power for the vacuum pump.
5. **Leveling Feet** – Four individual leveling feet provide adjustability to level the cabinet per the requirements of your laboratory floor.

Tournant™
Semi-Professional Kitchen Sink Faucet
K-77515

Features

- Semi-Professional style faucet with an easy to clean coated hose and removable coil.
- Unique three-function sprayhead allows you to tackle tasks such as cleaning, rinsing and filling with Sweep® Spray, BerrySoft® spray, and aerated stream.
- Sweep® spray creates a wide, forceful blade of water for superior cleaning.
- BerrySoft® is a light spray that gently washes fruits and vegetables.
- DockNetik®, a magnetic docking system that securely locks the sprayhead into place.
- Ceramic disc valves exceed industry longevity standards, ensuring durable performance for life.
- MasterClean™ sprayface features an easy-to-clean surface that withstands mineral buildup.
- High-arch gooseneck swing spout and 360-degree spout rotation offer superior clearance for filling pots and cleaning.
- Single lever handle is simple to use and makes adjusting water temperature easy.
- Temperature memory allows faucet to be turned on and off at the temperature set during prior usage.
- 1.5 gpm (gallons per minute) maximum flow rate at 60 psi.

Material

- Premium metal construction.
- KOHLER finishes resist corrosion and tarnishing.

Installation

- For single-hole installation. (3-hole escutcheon available, sold separately model number K-99272.)
- Flexible supply lines simplify installation.

Gas Cylinder Cabinets "Hard Hat" Series

Matheson's new "Hard Hat" cabinet is designed for outdoor use and installation. It is ideally suited for handling gas applications in refinery environments. The cabinet incorporates several structural features making it weatherproof and is constructed from stainless steel materials to withstand harsh weather effects. The "Hard Hat" cabinet is available in standard sizes to accommodate up to three cylinders.

- Rain gutter above cabinet door prevents rain from entering cabinet
- Stainless steel hinges and hardware
- Rain hat to cover stack
- Special Zinc Chromate primer to prevent rust and corrosion
- Removable top panel for service access
- Automatic door closure to ensure containment of leaks
- Lockable access panel and wire reinforced safety glass viewing window have steel frames and are fully gasketed
- Non-protruding paddle type latch prevents accidental opening and snagging. It slams and latches at three points and is fitted with a lock for security
- Neoprene gaskets fit snugly around door to ensure positive seal
- Standard inlet air louver or optional diffuser plate fitted with inlet filter (p/n VEN-0101-XX) lets air into the cabinet
- Fire sprinkler head for extra protection with a fuse rating of 155°F
- Cylinder restraints ensure all cylinders are held securely during storage and operation
- Low profile, one-inch reinforced threshold makes cylinder installation and removal easy

Specifications for Hard Hat Series (Meet or exceed Article 80 UFC requirements)

Cabinet:	12 gauge cold rolled steel
Gaskets:	Neoprene with oil resistant adhesive
Window:	1/4" wire reinforced safety glass
Paint:	2-part polyurethane: interior and exterior - light gray
Cabinet Floor:	Zinc-plated steel
Doors:	1 and 2 cylinders cabinets - one door with left hand stainless steel hinges 3 cylinder cabinet - double door with off-center post
Integral Sprinkler:	Fuse rating of 155°F and flow capacity of 35 GPM @ 40 psi
Water Pipe Connection:	1/2" NPT Female

Gas Delivery Equipment

Gas Cabinet Dimensions and Options Hard Hat Series

Gas Cabinet Options

- **Adjustable Cylinder Shelf** (see table for part number) - mounted on the U-Channel tracks. The shelf provides a convenient means of installing small cylinders. Perforations in the shelf allow cabinet air to sweep around the entire cylinder.
- **Fusible Link** (see table for part numbers) - installed in the center of the cabinet door. Offers immediate response in the event of a fire. Once the heat melts the fusible link, a guillotine damper blocks the inlet air supply.
- **Cylinder Scales** - recommended for use with all liquefied gases. Provides the weight of contents remaining in the cylinders. Manual and electronic cylinder scale models are available. (See pages 431 - 432)

Model No.	Description

Automatic Changeover Regulator System

F7900 Series

F7900 Series

SPECTRA GASES 7900 and 7910 semi-automatic changeover system is designed to allow the user to replace expended gas cylinders while maintaining a continuous gas supply to the point of use.

Standard Features

- **CHANGEOVER REGULATOR:** Made of high quality materials and cleaned for high purity service. When adjusting the selection knob on the face of the system, the variable regulator pressure is changed from one side of the fixed pressure to the other. The low and high pressures are set at equal values on either side of the fixed regulator, resulting in a swapping of the source gases from on-line to standby whenever the control knob is rotated.
- **LINE REGULATOR:** It is installed on the outlet of the changeover regulator to provide the user with a constant delivery pressure. This regulator is adjustable by the user and delivery pressure is displayed via an outlet pressure gauge.
- **RELIEF VALVE:** It has been installed on the low-pressure side of the line regulator to protect downstream components from damage in the improbable event of a catastrophic regulator failure.
- **FLEXIBLE HOSE ASSEMBLY:** Source gas is supplied to the changeover system via high-pressure flexible hoses. These hoses are provided with the appropriate cylinder connection for the intended gas application.
- **PRESSURE GAUGES:** For low cylinder pressure. (Optional indicating pressure switches are available).

Automatic Changeover Regulator System (continued)

F7900 Series

Features

- Outlet Valve(s)
- Inlet Valves
- Pressure Switches (optional)
- Purge capability
- Pigtail provided

Specifications

Regulators: All Single Stage
Series 7900 - Brass Regulators
Series 7910 - Stainless Steel Regulators
Overall Dimensions: 8 1/4" W x 8 3/4"D x 9"H
Shipping Weight: 8 lbs.
Inlet Connection: Specify
Outlet Connection: 1/4" compression
Regulator Inlet Gauges: 0-4000 psig
Max. Inlet Pressure: 3000 psig
Operating Temperature: -40°F to +165°F
Flow Coefficient: Cv = 0.06 (All Modules)

Materials of Construction:

Body: Brass (7900), stainless steel (7910)
Bonnets: Nickel-plated brass
Diaphragms: Stainless Steel
Note: These regulators are oxygen cleaned to 3000 psig and have a leak integrity of less than 2 x 10⁻⁸ atm. cc/sec. Helium.

LOCAL EXTRACTOR

TERFU

Local extractor with friction joint for worksites where great flexibility is important, in 2" and 3" diameter

TERFU is a local extractor with friction joints designed for use in worksites where great flexibility is required, e.g. laboratories and the electronics industry.

The friction joints with ball bearings make positioning convenient and simple.

The TERFU is a very flexible local extractor that stays in position when adjusted, due to the easily adjustable joints, 360° swivel, brackets and support springs.

All necessary adjustments of joints etc. can easily be made with one hand. The smooth aluminum tubes and easily dismantled plastic joints facilitate cleaning the inside of the suction tubes. Should it be necessary, the complete extractor can easily be dismantled.

The standard TERFU is supplied with an air tight damper and delivered with white plastic joints & anodised aluminum tubes, for table, ceiling or wall mounting.

TERFU Ø3" diameter is available with recyclable polypropylene (PP) tubes. For the PP-design, all metal components that will be in contact with the air flow are made of stainless steel.

TERFU is also available in ESD design with ESD approval according to EN 100015-1.

Movex also offers a range of fans, accessories and automatic control devices for our local extractors

SteamScrubber® Laboratory Glassware Washers

SPECIFICATIONS & ORDERING INFORMATION

SteamScrubber Laboratory Glassware Washer 4400330 is shown with 48-Pin Insert 4591601, Petri Dish Insert 4589701, Bulk Tube Insert 4542100, Utensil Holder 4542500 and BOD Bottle Insert 4589201.

- Type 304 stainless steel top, door, tank, upper, middle and lower wash arms. Freestanding models also have stainless steel exterior sides and top.
- One-piece, stainless steel, fine mesh particle drain filter
- Four leveling feet
- 3/8" Female NPT inlet fitting for hot tap water connection
- Factory-installed drain hose and band clamp
- Two year warranty on parts and labor
- Made in the U.S.A.
- IQ/OQ available. Visit www.labconco.com or call 800-821-5525.

All models conform to:

- UL 3101-1/61010-1
- CAN/CSA C22.2 No. 1010-1
- CE Conformity Marking (208/230 Volt models only)

All models require:

- Minimum inlet water temperature 49° C (120° F)
- Recommended inlet water temperature 60° C (140° F)
- Minimum purified water pressure 0 psi
- Water consumption per fill 3.4 gallons (13 liters)
- Hot tap water pressure at the washer 20-120 psi (138-827 KPa)
- Hot tap water flow rate 1.25 gallons (4.7 liters) per minute
- 3/8" OD copper tubing for connection to the water inlet valve
- Purified water with supply piping minimum 3/8" ID to permit at least 0.9 gallon (3.4 liters) per minute flow

Options include:

- Freestanding and undercounter styles
- Water temperature to 82° C (180° F) on 115 Volt models and 93° C (199° F) on 230 Volt models
- Clear tempered safety glass viewing window and 25-watt interior light that illuminates when door is latched

Optional accessories and companion products on pages 18 - 22 include:

- Base Stand
- Upper and Lower Spindle Racks
- Baskets and Inserts
- Freestanding-to-Mobile Conversion Kits
- Drain Water Cooling Kit
- LabSolutions Detergents and Rinse
- ScrubberMate Cart, Glassware Carts and Carboy Caddy
- WaterPro RO Stations and accessories

All models feature:

- Upper and lower standard open racks of Type 304 stainless steel
- LCD information center, Display button, Run/Cancel button, scroll buttons and selection buttons to program and monitor cycles
- Pump to recirculate 96 gal/min (363 liters) when operated on 115 Volts, 60 Hz and 230 Volts, 50 Hz and 112 gal/min (424 liters/min) on 230 Volts, 60 Hz
- Drain pump to evacuate over 7 gal/min (26 liters/min)
- Purified water pump to bring non-pressurized or pressurized purified water into the tank for up to six pure water rinses
- Steam generator that produces hot vapor before the WASH 2 cycle (RINSE ONLY and PLASTIC programs excluded)
- Aluminum-backed insulation and fiberglass blanket for thermal and sound insulation
- Operation at 58 decibels
- Manual-fill detergent dispenser for powder or liquid detergent
- Manual-fill rinse aid solution dispenser
- Forced air drying programmable up to 99 minutes and from 38-70°C (100-158° F)
- Seven factory-set cycle programs: RINSE ONLY, PLASTIC, GLASS, GLASS PLUS, SCIENCE, SCIENCE PLUS, and DRY ONLY. All 208/230 Volt models have three additional programs for a total of ten: INTENSE, INTENSE PLUS and EXTREME.
- Two user-set cycle programs
- Alarms with display for HOT GLASS, PLEASE WAIT, WATER LOW, WATER HIGH, OVERFLOW, LIQ DETER, RINSE AID DRAIN FAIL and LOW TEMP. Audible alarms self cancel after one minute.
- User-set delayed start (up to 8 hours)

SteamScrubber® Laboratory Glassware Washers

FEATURES & BENEFITS

For washing and drying primarily beakers and other wide-mouth or specialized glassware.

Steam generator. Produces hot vapor to penetrate and soften dried contaminants for more effective cleaning.

Forced air drying system. Hot air is blown into the tank to dry glassware. No separate dryer or oven is needed.

Dual pumps, one for washing and one for draining, reduce the potential for cross contamination.

Powerful pump recirculates water at a high rate to dislodge dried contaminants for thorough cleaning. Water recirculates at 96 gal/min (363 liters/min) on 115 Volt, 60 Hz and 230 Volt, 50 Hz models and 112 gal/min (424 liters/min) on 230 Volt, 60 Hz models.

Versatile rack options. The standard open racks are interchangeable with optional upper and lower spindle racks. Additional racks are sold separately. See page 18.

User-set delayed start (up to 8 hours) may be programmed so that the washer operates during off-peak hours when electricity may be less expensive and more plentiful.

Up to 6 pure water rinses may be programmed. A built-in purified water pump draws from a storage tank or pressurized source for final rinses.

360° rotating upper, middle and lower wash arms distribute water and detergent.

Full two year warranty. Is provided against defects in materials and workmanship.

Attractive and durable Type 304 stainless steel door and tank. Freestanding models also have stainless steel sides and top.

Detergent dispenser for powder or liquid detergent. Releases a manually premeasured amount ensuring clean labware.

Quiet, energy-efficient operation at 58 decibels. Aluminum-backed, sound-deadening insulation and fiberglass blanket absorb noise and optimize internal tank temperature to conserve energy.

INCLUDES Upper and lower stainless steel standard open racks. Accommodate a variety of accessory inserts holding the broadest range of glassware. Inserts are sold separately. See pages 18 and 19.

Sanitizing high heat. Water temperature reaches 93° C (199° F) on 230 Volt models to sanitize glassware and for enhanced washing, rinsing and faster drying.

Rinse solution dispenser. Allows manual addition of mildly acidic rinse to alter pH and eliminate alkaline detergent carry-over. The dispenser holds approximately 170 milliliters, enough for 40 or more cycles.

Alarms sound and/or display on the LCD to alert the user to abnormal or unsafe events such as HOT GLASS and OVERFLOW.

Optional clear tempered safety glass viewing window with 25-watt interior light allows observation of the cycle in progress. Available standard on some models.

ETL-listed. Washers carry the ETL mark signifying they are certified to UL Standard 3101-1/61010-1 and CAN/CSA C22.2 No. 1010.1.

Exclusive Labconco feature

CE Mark. Washers conform to the CE (European Community) requirements for electrical safety and electromagnetic compatibility.

DISHWASHER

VDW302WSSS – 24"W. DISHWASHER W/ WATER SOFTENER W/ STAINLESS STEEL PANEL

WASHER CUT SHEET

Food Lab

Multi-Level Washing

- Variable pressure wash adjusts water volume, pressure, and temperature according to load size and soil levels
- Multi-level washing with three spray arms ensures clean dishes
- Turbidity sensor monitors the soil level of the dishes for superior quality
- Triple filtration system removes the smallest particles for clean water circulation
- Flow-through water heater is concealed to provide a safer alternative to exposed heaters

Turbo Fan Dry

- Fan circulates air for efficient drying performance

Quiet Clean™ Performance Package – 45 dB

- Three layers of insulation – bitumen, cotton, and full side walls create one of the quietest dishwashers on the market

Loading

- Industry-leading heavy gauge top and bottom dish baskets hold even the heaviest dishes
- Upper Smart Size™ Rack is designed to allow cleaning of cutlery while washing tall items simultaneously in upper rack
- Holds up to 14 international place settings along with silverware and cutlery
- Top rack is adjustable with or without dishes for versatile loading

24" Wide Dishwasher

- Adjustable stemware shelves can be used for holding ladles or other small utensils
- Foldable tines provide versatility for the loading of pots, pans, and uniquely sized items in top and bottom racks
- Bottom rack has six split, foldable tines with variable setting from flat to vertical
- Sliding cutlery basket can be moved horizontally to any position

Exclusive Smart Size™ Rack

- Smart Size™ Rack allows room for tall items in upper basket and can be used simultaneously with lower rack
- Removable basket fits most standard drawers
- Take your utensils straight from your dishwasher to your drawer

Built-In Water Softener (VDW302WS model)

- Reduces water hardness to a manageable level to prevent glasses and dishes from etching

Cycles/Options

- Cycles
 - **Pots/Pans Plus** – Extra-heavy soil level
 - **Pots/Pans** – Heavy soil level
 - **Auto** – determines the amount of water and temperature needed
 - **CombiClean** – washes delicate items in upper basket and heavier soiled items in lower basket
 - **Regular Wash** – Normal soil level
 - **Crystal/China** – Less water pressure for – lightly soiled or fine china
 - **Quick Wash** – 35 Minutes!
 - **Rinse/Hold** – Pre-rinse dishes clean
- Options
 - **Half Load** – Energy saving function for use with partial loads
 - **Auto Tablet** – Sensor detects rinse aid and automatically sets drying cycle duration
 - **Delay Start** – Allows delayed activation for up to 24 hours
 - **Sanitize Function** – Raises water temperature in final rinse to meet NSF requirements
 - **High Gloss** – Provides superior drying performance
 - **Intense Wash** – Helps wash heavily soiled dishes
- LCD screen with remaining time indicator
- Cycle run floor indicator light
- LED interior light
- Energy Star Qualified

Finishes

- Available with wrapped Stainless Steel Door Panel installed

Warranty Highlights

- One-year full – complete product
- Ninety-day full – cosmetic parts such as glass, painted items, and decorative items
- Lifetime limited – tank and inner door
- Five-year limited – electronic controls, racks, motor/pump assemblies and water distribution system

24" W. 302 MODEL DISHWASHER

DESCRIPTION	VDW302/VDW302WS
Overall Width	23-9/16" (59.8 cm)
Overall Height from Floor	33-7/8" (86.0 cm) minimum to 35-7/8" (91.1 cm) maximum
Overall Depth	To front of door panel: 22-3/16" (56.4 cm)
Cutout Width	24" (61.0 cm)
Cutout Height	34" (86.4 cm) minimum to 36" (91.4 cm) maximum
Cutout Depth	24" (61.0 cm)
Electrical Requirements	12.0 amps, 115V/60Hz; 4" (102cm) electrical cord with supplied with unit
Water-Heating Element Rating	1240 watts
Inlet Water Temperature	120°F (49°C) required
Drain Hose	6.4' (1.9m) drain hose provided
Drain Hose High Loop Required	Height from floor – 28" (71.0 cm)
Approximate Shipping Weight	97 lb. (44 kg)

7 SERIES BUILT-IN FRENCH-DOOR OVENS

Viking Professional 7 Series – VSOF/VDOF

COMMERCIAL-TYPE COOKING POWER

- Extra-large 4.7 cu. ft. oven is the largest in the industry
- 11 high performance cooking modes for versatile performance include two-element bake, convection bake, TruConvect™ Convection Cook, convection roast, convection broil, hi broil, medium broil, low broil, convection dehydrate, convection defrost, and proof
- **PATENTED** Vari-Speed Dual Flow™ Convection System has the largest fan in the industry; the 8 1/2" two-speed fan works bi-directionally for maximum airflow and excellent cooking results
- Preheat Optional - No need to preheat oven when baking certain foods in Convection Bake mode
- Extra-Large Gourmet-Glo™ Glass Enclosed Infrared Broiler provides superior broiling performance and maximum coverage (upper oven of double)
- Large 10-pass broiler with heat reflector directs heat precisely into food for quicker results (lower oven of double)
- **EXCLUSIVE** Rapid Ready™ Preheat ensures super-fast preheating
- Concealed 10-pass dual bake element provides precise temperature control
- Each oven has six porcelain-coated rack positions and comes standard with three oven racks including two TruGlide™ Full Extension Racks in the single oven and upper oven of double and one TruGlide™ Full Extension Rack in the lower oven of double
- Three halogen lights in each oven offer excellent visibility
- Timed Bake function allows the oven to be set to begin cooking up to 24 hours later and shut off when cooking time is complete
- Meat probe feature in sounds the timer when desired temperature is reached (upper oven of double)

EASY OPERATION AND CLEANUP

- Open either french-door with just one hand and the companion door conveniently opens simultaneously
- Heavy-duty metal knobs are accented with **EXCLUSIVE** CoolLit™ LED Lights in signature Viking blue when unit is turned on
- Concealed 10-pass dual bake element in both oven cavities provides easy cleanup
- Steam clean in only 20 minutes - perfect for light to medium cleaning
- Full self-clean function in lower oven makes cleanup easy

COLOR FINISHES

- Available in seven exclusive color finishes
- Stainless Steel (SS), Black (BK), White (WH), Apple Red (AR), Burgundy (BU), Cobalt Blue (CB), Graphite Gray (GG)

WARRANTY

- 2-year full - complete product
- 90-day full - cosmetic parts such as glass, painted items and decorative items
- 5-year limited - electric elements

VIKING RANGE, LLC 111 FRONT STREET GREENWOOD, MISSISSIPPI 38930 USA

BUILT-IN 5 SERIES GAS COOKTOPS

Viking Professional 5 Series – VGSU

COMMERCIAL-TYPE COOKING POWER

- Highest combined BTU rating in the industry, featuring sealed burners with brass burner rings in a wide variety of sizes
- Powerful 18,000 BTU burner delivers commercial power for high heat sautéing, rapid boiling and quick recovery
- Simmer settings on all burners allows low BTU output for heating delicate sauces
- **EXCLUSIVE** SureSpark™ Ignition System ensures automatic ignition/re-ignition should flame extinguish at any time while cooking

GAS 30" WIDE COOKTOP

- Left front – 18,000 BTU high
- Left rear – 12,000 BTU high
- Center – 12,000 BTU high
- Right front – 6,000 BTU high
- Right rear – 8,000 BTU high

GAS 36" WIDE COOKTOP

- Left front – 18,000 BTU high
- Left rear – 10,000 BTU high
- Center front – 12,000 BTU high
- Center rear – 12,000 BTU high
- Right front – 6,000 BTU high
- Right rear – 8,000 BTU high

EASY MAINTENANCE AND CLEANUP

- Updated commercial-type styling incorporates refined detailing
- Permanently sealed burners prevent spills from entering burner box
- Deep, seamless recessed burner pan retains liquid spills
- Durable laser-etched graphics withstand the rigors of regular cleaning
- Removable knobs, grates, and burner ports/caps make cleanup easy

SAFE-EASY OPERATION

- Child proof, push-to-turn metal knobs for safe use
- Automatic electric spark ignition means no standing pilot to re-light, waste energy or add extra heat to the kitchen
- **EXCLUSIVE** ScratchSafe™ Grate Design provides ultimate protection from scratches and ensures proper placement of the heavy-duty, porcelain-coated cast iron grate

MODEL NUMBERS

- VGSU5305BSS – 30"W. Gas Cooktop; five burners
- VGSU5366BSS – 36"W. Gas Cooktop; six burners

ACCESSORIES

- PGDVGC – Portable non-stick cast aluminum griddle fits securely onto grates for griddling or defrosting food
- WRGVGC – Porcelain-coated cast iron wok ring fits securely over grates to accommodate a traditional wok
- LPKVGC – LP/Propane Conversion Kit

COLOR FINISHES

- Available in Stainless Steel (SS)

WARRANTY

- 2-year full - complete product
- 90-day full - cosmetic parts such as glass, painted items and decorative items
- 5-year limited - gas surface burners

UNDERCOUNTER DRAWERMICRO™ OVEN

Viking Professional – VMOD

PROFESSIONAL FEATURES

- Opens and closes with the touch of a button
- 11 variable power levels
- 12 sensor cook, reheat, and popcorn settings
- Six defrost auto settings
- Two reheat auto settings
- Add-A-Minute allows a minute of extra cooking time to be added with the touch of a button
- Keep warm feature allows food to be kept warm for up to 30 minutes
- Beverage center reheats coffee and tea to suitable drinking temperature
- Melt/soften/warm settings automatically select the correct time and power for each function
- Child Lock safety feature locks the control panel to prevent unwanted operation

FUNCTIONAL OVEN CAVITY

- 1.2 cubic ft. (28.3 liters) oven capacity
 - 17-5/16"W. x 7-1/8"H. x 16-9/16"D.
- 1,000 watts of output power
- Maximum functionality in minimal space
- Interior light

INSTALLATION OPTION

Flexible placement options below an island, peninsula, or standard cabinetry and can also be installed adjacent to built-in oven
