Author: Han-Way Huang
ISBN: 9780766816008

Clustering: Changes to cluster analysis are also localized. The introductory chapter added the K-means initialization technique and an updated discussion of cluster evaluation. The advanced clustering chapter adds a new section on spectral graph clustering. Data: The data chapter has been updated to include discussions of mutual information and kernel-based techniques. Exploring Data: The data exploration chapter has been removed from the print edition of the book, but is available on the web. Brace yourself. By Alejandro Velasco S Susan Blackmore is sharp and relentless in her quest to unveil confusion and misunderstanding regarding what consciousness is and what -or who- the self is. Her own views take

unmistakeable shape as she reviews and examines -critically- the views of some of the most relevant authors on the matter. She includes a section on meditation and the Buddhist view on consciousness and the self. She is one of very few authors that dares take a challenging stance regarding common misunderstandings of the Buddha's teachings.

After reading this book, the Buddhist teaching of anatta no substance, or no-self reveals a radical and liberating scenario. You owe it to yourself to take this course By Richard Kollmar Even if you do not find the topic to be the most fascinating subject in philosophy, psychology and neuroscience, you will be surprised and enlightened on nearly every page of this excellent textbook. Practical exercises to expand your understanding of your own experience are combined with recent experimental studies and cutting-edge theory. Best of all, the reader is given everything she needs to overcome the illusion of consciousness altogether! Your life will change. Posting Komentar.
