Premium Standard Features And Options

Floor System - Our Floors are made to stand the test of time with the weight you put on them. On the bottom we have a 4x6 Runner, then the 2x6 Floor Joist. Both are pressure-treated against Termites and Rot. Our floor joists are 16-inch on center on all buildings except for the Garage's, they are 12-inch on-center to support the weight of your car. Our floor joists are nailed as well as screwed with a 6-inch screws to hold them fast to each runner. We then use 3/4 inch LP Legacy sheeting as your sub-floor.

Fastening System

Our Floors and all exposed fasteners are held together with hot dip galvanized nails and deck screws. All of our nails are ring shank; this has a similar effect as a screw.

Diamond Tread Plate

Our diamond Tread Plates are on the edge of the floor by each door opening to protect the edge of the floor from being chipped out.

Roof

Our Roofs are built to look good even up close. With a 40 year paint warranty and professional trim, bringing leak-proof results. A vapor barrier is installed between sheeting and metal.

Rafters - Our Rafters are 'HEAVY' placed on 16-inch centers to help with snow load and ice build-up that we may only get a few times a year, but why take a chance? We also place Hurricane straps on every other rafter so those strong winds won't tear your roof off.

Metal Siding

Our Metal siding is a 29 Gauge metal with a 40 yr. paint warranty. All metal buildings have a moisture barrier between the metal and the wood. **For metal siding, add 10% of barn price.**

Treated T1-11 Siding

Our T1-11 Siding is treated against termites and rot. It is also stained with a 5 year 'cedar tone' stain. **Treated & painted barns, same price.**

Walls - Our Wall studs are 16-inch on center with a double stud every 4-foot where the siding joint is at. Also our wall will have sheetrock backers in place for you to finish out your building. Also all our buildings come with double inter-locking top plates.

Painted Siding - LP SmartSide is rot and termite resistant and is used for all our painted barns.

New Pro Series

Pro Series
