## Section B

Answer all questions in this section.

| $\mathbf{0}$ | 1 | Draw the ray diagram for a Cassegrain telescope. Your diagram should show the |
| :--- | :--- | :--- | paths of two rays, initially parallel to the principal axis, as far as the eyepiece.

| $\mathbf{0}$ | $\mathbf{2}$ The Kielder Observatory in Northumberland includes two optical telescopes |
| :--- | :--- | :--- | attached to the same mount, so that they can be used to view the same object. Some of the properties of these telescopes are summarised in Table 1.

Table 1

| Telescope | Type | Objective diameter/mm |
| :---: | :---: | :---: |
| A | refractor | 70 |
| B | reflector | 400 |

| $\mathbf{0}$ | $\mathbf{2}$ | $\mathbf{1}$ The telescopes are used to view the same object. |
| :--- | :--- | :--- |

Suggest which telescope in Table 1 produces the brighter image.
