

RANCH READY BULL SALE

At the Ranch, Simmie, Sk

FRIDAY
MARCH

12

2021

1:00PM

Welcomes you

TO THE RANCH READY
17TH ANNUAL BULL SALE

March 12 2021 . 1PM . at the Ranch, Simmie, SK .

Welcome to the 2021 edition of the Braun Ranch Ready Bull Sale. What a year it has been. We lucked out last year and just got ahead of the covid restrictions. Although no one really knows what 2021 sale season will bring, we will have our sale on March 12, 2021 in our sale barn, at the ranch. At the time of printing our sale catalogue, we're leaning towards a video sale. With the removal of the handling system in the back of the barn, this will allow us to double our capacity. Hopefully by sale time, we'll start to see the light at the end of the tunnel with covid restrictions.

Once again, the sale will be broadcast with DLMS.ca. Please register ahead of the sale to bid, if you can't attend sale day.

We have a lot of confidence in our group of bulls on offer. They are backed by some great cow families. Most are sired by home raised bulls. Several in fact, that have sold through our sale in previous years, to both purebred and commercial producers. We feel this is the most consistent set of bulls yet. Also are two new sire groups. Both bulls are backed with strong cow families with longevity.

Feel free to stop in for a cow tour anytime before the sale. The coffee is always on and the door is always open. Call, text or email. We'll do our best to try and help you select your next bull, any way we can. Videos, pictures and more info can be found on our website at www.braunranch.com

Like Braun Ranch on facebook as well. You'll find there are several pictures of the bulls and our cows. We will be posting pictures of the dams and or sisters as they calve.

Thank-you so much for your interest, we couldn't do it without you.

Craig & Carrie Braun:

Pictures & Videos available online at: www.BraunRanch.com

Terms: Cash or cheque payable at par on sale day unless prior arrangements have been made. US funds at current rate of exchange announced sale day. Braun Ranch reserves the right to draw semen, for in herd use, on all sale bulls.

Announcements: any announcements made from the block take precedence over the catalogue.

Guarantee: All animals are purchasers responsibility as soon as sold. All cattle are guaranteed breeders. Please notify us as soon as you suspect a problem. Standard Hereford Assoc guarantee applies.

Liability: Everyone attending the sale does so at their own risk. The owners, sale staff and representatives assume no liability legal or otherwise.

Delivery: There will be a \$100 credit, per bull, for those buyers who take home their bull. We're happy to deliver bulls free of charge, within 300 miles. Delivery will be at our convenience before we get busy seeding and A. Ling. American purchases will be delivered into Montana and North Dakota. There will be a \$300 fee on all American purchases under \$5000 to cover health testing and brokerage fees.

Location: The sale will be held at Craig & Carrie's yard. Half a mile west of Simmie, then one mile south, take the first road to the west. Look for two red barns, south side of the road.

BULL DEVELOPMENT:

We don't creep feed our calves and never have. We cut calves at birth, branding, weaning and before they go to grass, as yearlings. We have no aspirations of selling "the most bulls" but we do strive to sell the best bulls out of the best cows we can raise. About 40-45% of our bull crop is offered annually in our sale. The rest make up a dandy load of curly haired, thick topped rugged steers. The yearling bulls are grown out on free choice hay, supplemented with a growing ration for a modest 3lbs/day gain. The two year olds went to grass mid May. They remained on native pasture until late September. We are really happy about the condition the bulls carried coming off grass, especially for such a dry summer. This group is easy fleshing, hard and athletic. Weaning weights were taken on Aug. 28, 2019 and Sept. 7, 2020. We do this when the calves are given their pre-weaning shots. Catalogue weights are adjusted 205 and 365 day weights adjusted by the Canadian Hereford Assoc.

EPDS & CULLING:

We cull our cows and bulls hard. We expect our mature cows to wean a bull calf with an adj ww of 600lbs plus. First calvers are given a little leeway.

We don't put a whole lot of emphasis on EPD's. We print them in the catalog so buyers can compare, if they like. We feel the breed organizations push them, but don't do a good job of explaining how to use them. Some producers use EPD's to promote cattle as being in the top 10% of the breed for a certain trait. That's fine. However, for example, let's look at milk numbers.

More often than not, a cow with a really high milk number will require more feed to maintain herself, her calf, along with her ability to rebreed. We're more focused on raising cattle that thrive in ranch conditions. Let's look at ww and yw EPD's. Sure, we all want to sell more pounds. However, at the end of the day, we can't wean a 1000lb calf off a 1200lb ranch cow. It's also been our experience that a really high yw EPD can lead to a larger cow. BW EPD's are the most applicable in our opinion, if an actual scale weight is recorded and submitted. All our calves, both purebred and commercial, are weighed with a scale. We've found the tape is not accurate. You'll find our EPD's will be around breed average. However, we feel our cows are anything but average.

Our cows sure aren't perfect, but we're getting closer to where we want to be every year.

Electric Express was our pick of Ulrich's Herefords 2019 sale. We were intrigued by "Peter's" picture in the January digest. So we made the road trip to check him and his dam out. 16E is a good footed bull with great hair, length and a big hip. He has thrown very moderate birth weights here and could be used on heifers. His dam is still in production at Ulrich's at 13 years old.

Standard 213B was the lead off two year old bull in our 2016 sale, selling to Wilson Bros., McCord, SK. That same spring, we hand bred a couple second calvers to him before delivering him. The following year after, we didn't waste anytime purchasing half interest in 213B back. His calves might be our thickest sire group yet. Owned with Wilson Bros.

Zam was purchased from the good folks at YV Ranch. We feel the Nixdorff family is focused on breeding similar qualities as Braun Ranch. Zam has matured into a big powerful performance bull, backed by a great 10 year old cow. She has raised three bulls for purebred herds and has been a donor cow for YV Ranch.

Duramax was retained from our 2016 calf crop. He's a long bodied, yellow bull with an exceptional foot under him. For a mature bull, Duramax moves like a cat. A big reason for keeping 122D was to increase the Starlet cow family influence. Check out his 3/4 sister 49B. She is the donor dam of Lots 1-3.

BR 15Z Lady ET 168C

Heavy Hitter's dam hit another one out of the park. This guy will do it all. Sire performance and build a cow herd. He's backed by some of the best cows we've ever raised. His dam 168C, grandam 179Y and great grandam 155S are all donor cows here. These cattle are consistent. Heavy Hitter's full brother, Guns smoke 126G won the 2019 Hardisty field day, against over 160 of Western Canada's best Hereford bull calves.

Guns smoke also topped last years sale, selling to Mrnak Herefords, North Dakota. His maternal grandsire, Crossover 135C won the 2015 Hardisty field day and topped our sale. Famous 145F, a flushmate to 168C won the 2018 Hardisty field day and went on to be our second high seller in 2019. Only to be outsold by Old School 101F, Heavy Hitter's maternal brother. These cattle are uniform and rise to the top.

98	691	+6.2	+48.2	+80.6	+11.5	+35.6

Here's a cow maker, out of the great 179Y herself. He is one of the quietest bulls in the group. Super deep bodied with a perfect foot under him. A little extra chrome on this guy but don't let that deter you. Whoever gets 29H will be glad they did, especially once his daughters are in production. 14 sons out of 179Y have sold through our bull sale so far. The only cow that has had a bigger impact here, is her dam, 155S. Both mother and daughter have sold well over \$100,000.00 worth of bulls.

78H is a deep bodied, long 157B son. His dam is a larger framed 213B daughter.

SIMMENTAL BULLS

Over the last few years, Carrie has added a few purebred Simmental cows to the herd here at Braun Ranch. We have been fortunate to gain some rental pasture close to home. This has allowed us to increase our purebred Hereford cow numbers and make room for the Simmentals. We feel having another breed to compare to can have a positive effect on things. Not to worry, the Horned Herefords aren't going anywhere. The Simmentals will have to meet the same requirements with the same inputs as the Herefords, around here.

Gibson's Finest is a full blood brother to Lot 34. 213B really clicks on the 15Z/155S females. 234G is moderate, thick, stout and easy keeping. We have retained a full brother, Forty Creek 234F, in partnership with the Nixdorff family at YV Ranch. We have also sold the semen rights to Forty Creek to South Africa.
