# David Beltran

I have always had a passion for taking care of my own skin resulting from battling cystic acne and rosacea growing up, while dealing with the social trauma of being bullied for the way my skin looked. I decided to open my own private skincare practice to help individuals enhance their inner beauty, rebuild their self-confidence, self-esteem, and help change the lives of individuals through the science and art of skincare.

My intent is to help as many people as I can, focusing on the demographics that are typically forgotten, and those with chronic skincare problems such as acne and rosacea, hyper-pigmentation and scars from skin trauma. My goal is to create an environment that everyone feels comfortable in and to offer affordable treatments from facials, chemical/enzymatic peels, body sugaring hair removal, and other Med-Spa services such as skin resurfacing, scar revision, and micro-needling.

I offer customized treatments using cosmeceutical products by Lira Clinical and clinical treatments created just for you. I continue my education and I'm always looking for the next best products and cutting-edge treatments to offer my clients. Unlike those big spa's Skin Science and Esthetics prides itself on offering individual, one-on-one services that make you feel and look amazing right after your treatment.

I am committed to providing excellent customer service to all my clients and like to treat the skin not only from a facial standpoint but also from with-in. After all, outer beauty is only a reflection of your inner beauty. Give your skin a work-out, schedule your appointment today. Healthy skin starts with you, BE BRIGHT • BE BEAUTIFUL!!!
