

# Breakdown Stand Assembly Instructions

Presented by Over The Edge and  
[Aquariumframeswholesale.com](http://Aquariumframeswholesale.com)

# NOTE

- Please read all instructions before assembling your stand
- If you have any questions after reading through these instructions, please contact us via phone at (810) 724-0961 or email **[overtheedge2010@gmail.com](mailto:overtheedge2010@gmail.com)**

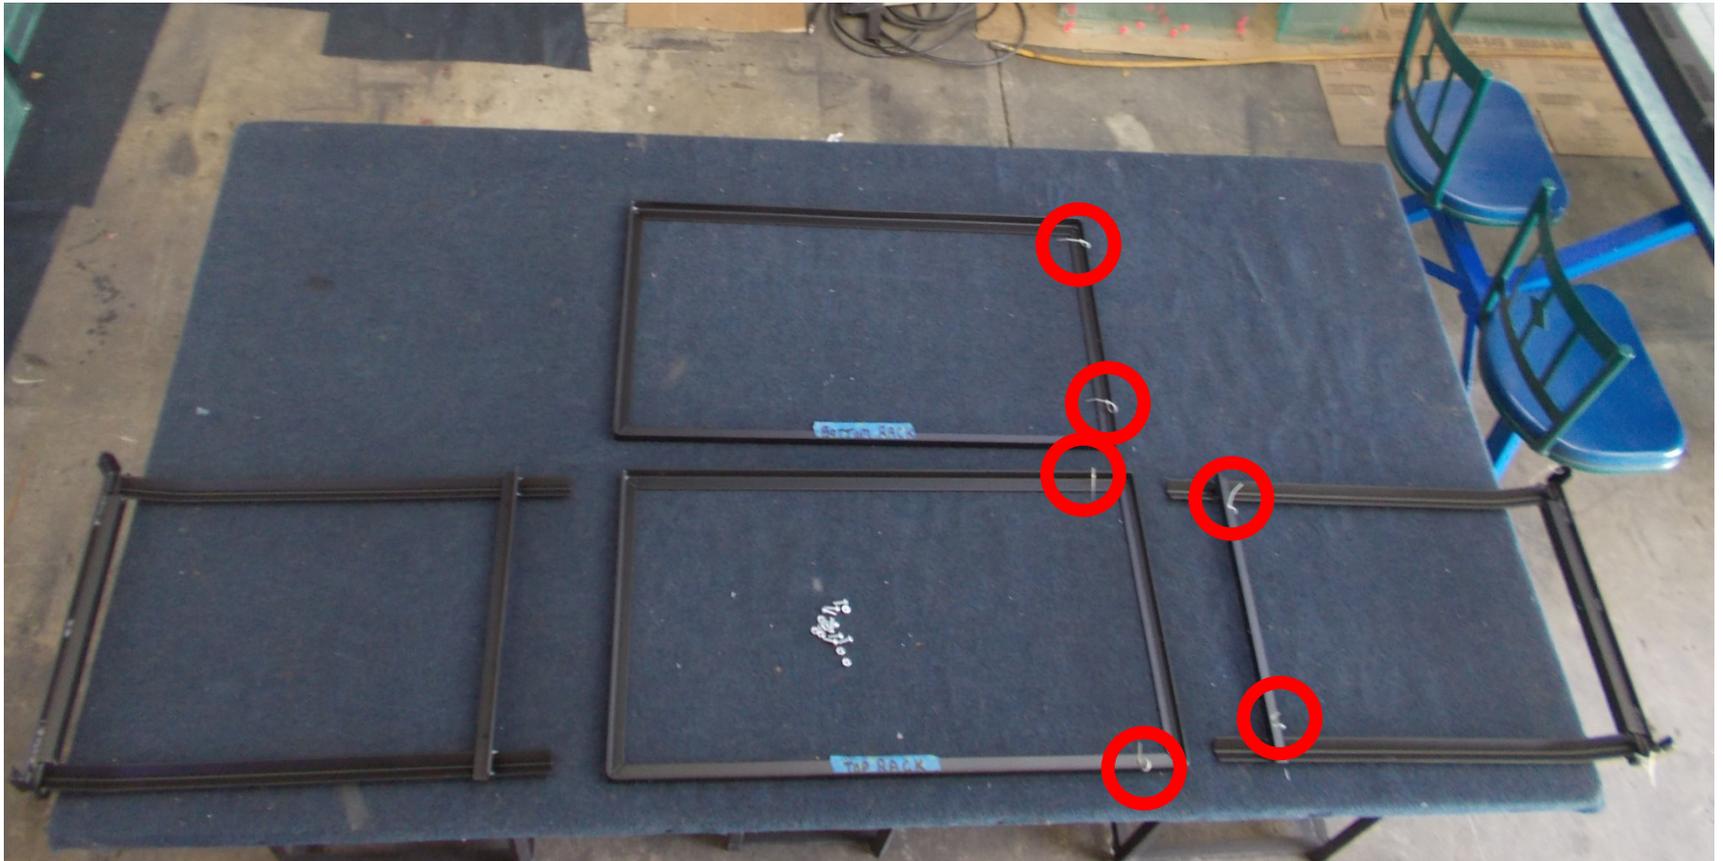

# Tools Needed

- Rubber Mallet
- Large Phillips Head Screwdriver
- 7/16 Wrench

# Step 1

- Lay out pieces as shown here
- Note location of zip ties outlined in Red.
- DO not remove ties until instructed to do so

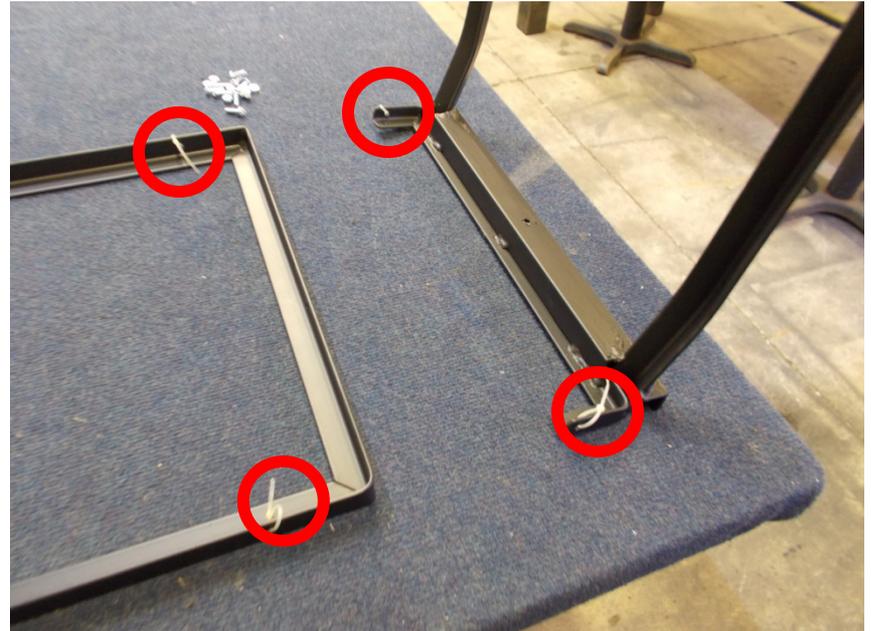

# Step 2

Set piece marked “top rack” so that words “Top Rack” are facing upwards as shown

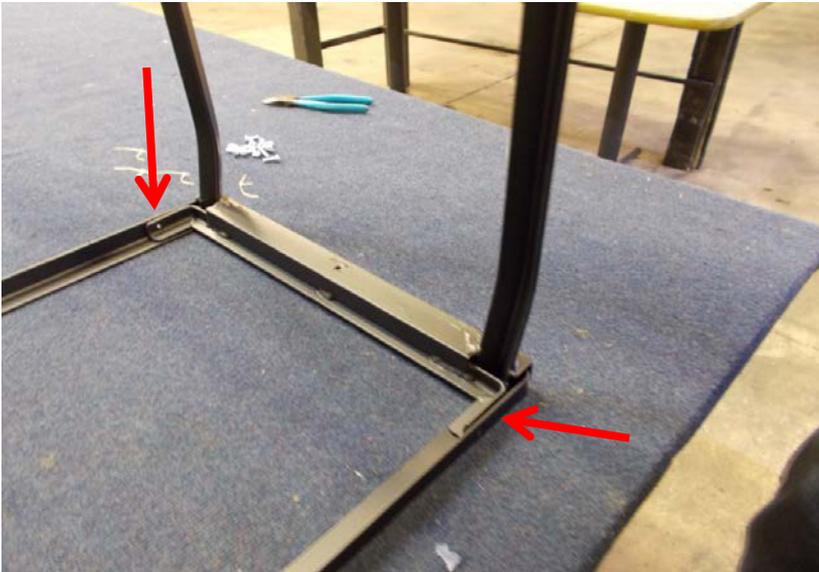

# Step 3

Remove zip ties (outlined in red) from Top Rack and leg

# Step 4

- Insert leg into top rack
- Holes in leg and top rack should line up
- You may have to tap leg into place using rubber mallet

# Step 5

- Insert Nuts and Bolts into leg brackets and slightly tighten

# Step 6

- Repeat steps 3 through 5 for other leg.
- After installing other leg, your stand should be as shown below

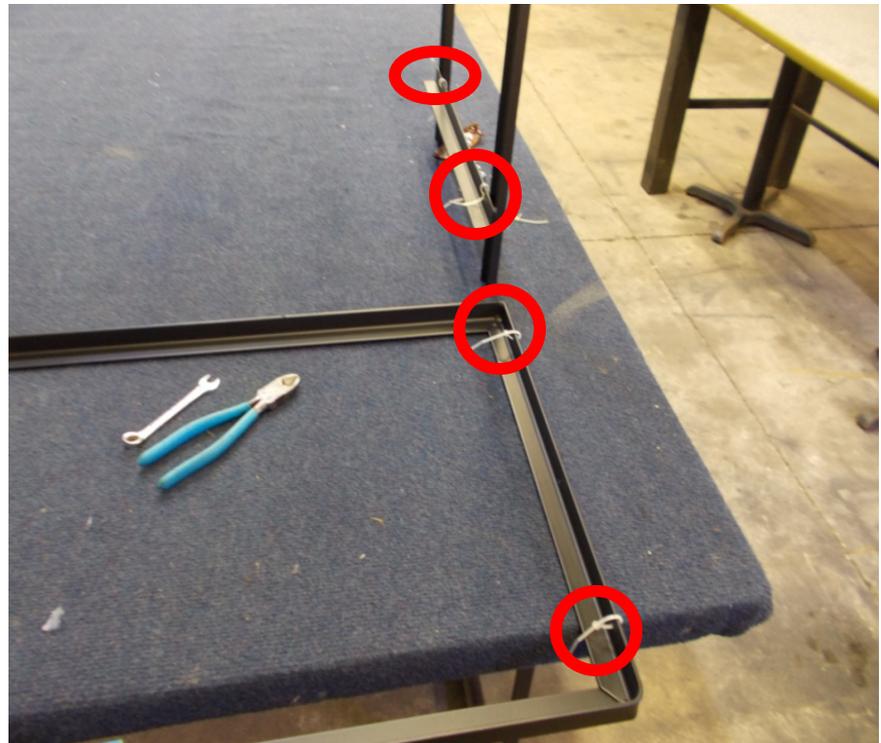

# Step 7

- After installing both legs, flip stand so that it is standing upright, as shown

# Step 8

Set piece marked bottom rack so zip ties are on same side as the leg as shown in picture below marked in red

# Step 9

- Flip over piece marked bottom rack so that words “Bottom rack” are facing downwards as marked in red Below

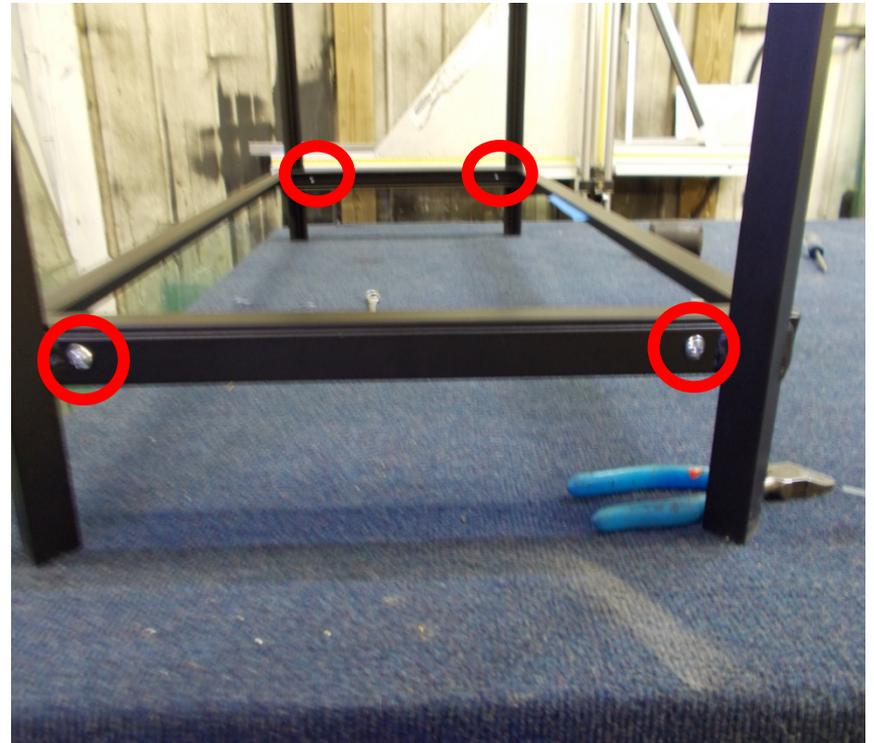

# Step 10

- Insert bottom rack between the legs

# Step 11

Inserts bolts into bottom rack. There should be 2 bolts in each side of stand as shown below

# Step 12

- Tighten all 8 bolts on the top and bottom of the stand as shown here

# Your Stand is Complete!

- Congratulations you have just assembled your own breakdown aquarium stand
