
A Guide to Service Providers

Occupational Safety and Health Resource Guide

**SAFE
WORK
MANITOBA™**

Occupational Safety and Health Resource Guide

SAFE Work Manitoba offers this list of organizations which provide workplace safety and health resources and/or services as a tool to help employers and workers improve safety in their workplaces.

The listing is divided into two sections:

Section 1

Occupational safety and health issues are listed along with the names of organizations (government, non-profit and private-sector companies and consultants) which offer services and resources to address the issue. The second part of section 1 includes a listing of all organizations, the issues they address and more in-depth information on the issues they can help address through their services. In most cases, the organizations are based in Winnipeg, but many are willing to provide services outside Winnipeg. Some have offices outside Winnipeg as well, and others are based in other communities.

Many organizations referenced in Section 1 charge on a “fee for service” basis.

Section 2

Provides contact information for the organizations listed in Section 1.

The information provided, while as comprehensive as possible, is not necessarily a complete list of all the organizations that provide safety and health assistance. To be included on this list, please contact SAFE Work Manitoba at 204-957-SAFE (7233) or 855-957-SAFE (7233) or visit safemanitoba.com.

Note: *Persons and companies are included in this listing on a voluntary basis. SAFE Work Manitoba does not approve, endorse or accept responsibility for the use of any products or services offered for sale by the listed suppliers. The listing is intended for informational use only.*

Providers

1 Life Workplace Safety and Health Ltd

Health and safety programs - safety management systems development, implementation and continuous improvements, audits, gap analysis, consulting, virtual safety assistant software (mysafetyassistant.ca)

Legal compliance - safety management system

Respiratory safety - respiratory training and fit testing

Risk assessment - consulting

Safety and health training - more than 30 different training courses

AMC Safety

Confined space entry – awareness training

Ergonomics – training, assessments

Health and safety programs – training and development, audits

Library (information) – procedures, policies

Noise control and hearing conservation – noise level testing

Respiratory safety - training and fit testing

Risk assessment - training and inspections

Safety/health training - training (43 courses)

Testing (safety) - inspections and audits

Workplace hazardous materials information systems - worker and trainer training

Work site safety - location specific training

AMEC Environmental & Infrastructure

Air safety – air quality evaluation, testing, laboratory analysis, training

Confined space entry - evaluations, testing and inspections, air monitoring, training

Environmental – phase I, II, III site assessment and remediation, vapour intrusion assessment and testing, hazardous materials

Ergonomics - evaluation

Fire safety - fire plans, evaluations, training

Hazardous chemicals – regulated building materials, compatibility, MSDS/GHS evaluations/auditing/author, training

Health and safety programs – auditing, training, development of safety plans, safety procedures, asbestos managements, training

Legal compliance – audits/evaluations, expert witness

Noise control and hearing conservation – indoor/outdoor noise evaluations, dosimetry, acoustic and vibration evaluation/recommendations

Personal protective equipment – training, evaluation

Respiratory safety – training, fit testing

Risk assessment – conducting risk assessment, toxicology, evaluation and recommendations

Safety and health training – IAQ, asbestos, mould, fire programs, confined space, general safety,

hazardous building materials

Vibration - assessment/evaluations, specifications and planning

Workplace hazardous materials information system - training, evaluation, MSDS/GHS authoring, evaluation, audits

Work site safety – inspections, training, audits, safe work practice development

Case Management Canada Inc.

Risk assessment – risk management services

Change Innovators

Confined space entry - program development and training

Hazardous chemicals - complete program development, training and facilitation

Health and safety programs - complete program development including COR

Legal compliance - audits, gap analysis, inspections, training

Library - online training and resources/website/newsletters

Noise control and hearing conservation - mobile testing, noise survey, training, custom hearing protection

Personal protection equipment - custom hearing protection

Respiratory safety - qualitative and quantitative respirator fit testing

Risk assessment - audits, gap analysis, inspections, consulting, training

Safety/health training - supervisors roles and responsibility, first aid/CPR, respirator, hearing, JHA, SWP, accident investigation, lockout, committee training, TDG

Workplace hazardous materials information system - complete programs and training; also available online

Work site safety - inspections, remediation, audits, consulting, training

Construction Safety Association of Manitoba (CSAM)

Air safety – CO monitoring

Confined space entry – confined space entry, program development and training

Environmental – environmental consulting

Ergonomics – ergonomics consulting, ergonomic training

Fire safety – audits and training, fire protection consulting, fire protection training, fire safety consulting

Hazardous chemicals – transportation of dangerous goods

Health and safety programs – employee and management education, first aid/CPR training, policy/program development, safe work procedures, practices, job hazard analysis, safety and health audits, safety and health consultant, safety inspections

Legal compliance – accreditation preparation, consultation, guidelines and standards, legislative training

Library information – interpretation and application of regulation consulting, research/information on health and safety topics, resource library

Noise control and hearing conservation – hearing and noise equipment, program development and training

Personal protective equipment – policy development, program development

Respiratory safety – program development and training, respiratory protection consulting

Risk assessment – policy/program development

Safety equipment – training

Safety/health training – audits, confined space entry, CPR, construction safety, fall protection, fire protection procedures, first aid, employee and management education, equipment safety, fall protection, first aid, industrial, powered lift, safe work practice/procedure development, safety inspection, site hazard assessment, spill control

Testing – sound pressure level

Workplace hazardous material information system – consulting and training

Work site safety – investigations/audits, site assessment

Corporate Health Works Inc.

Confined space entry - training

Ergonomics - training

Fire safety - fire safety plans

Hazardous chemicals - WHMIS/GHS, consulting/training

Health and safety programs - development of programs

Legal compliance - training

Noise control and hearing conservation - noise level surveys, audiometric testing, hearing conservation program

Respiratory safety - respirator fit testing

Risk assessment - consultation, training

Safety and health training - forklift, fall protection, overhead crane, TDG/IATA

Workplace hazardous material information system - training

Work site safety - inspection, audits

E.K. Gillin and Associates Inc.

Air safety - industrial hygiene test, IH program development

Confined space entry – confined space entry, attendant and rescue program development and training services

Environmental – compliance and systems auditing, air emission modelling, spill training

Ergonomics – ergonomic program development, CES designation, office and industrial ergonomics assessments

Hazardous chemicals – hazmat and spill program development and training

Health and safety programs – program development, implementation and auditing services

Legal compliance - auditing services, investigating services

Noise control and hearing conservation - noise exposure monitoring, hearing protection assessments, program development

Personal protective equipment – program development and assessment

Respiratory safety – program development, respiratory fit testing

Risk assessment – EHS risk assessments, corporate due diligence, statistical assessments

Safety/health training – full service EHS training covering end user

Testing – air, noise, light, temperature and ventilation testing services

Workplace hazardous material information system – WHMIS/GHS from basic to end user to train the trainer, advanced knowledge levels

Work site safety – program development and mentoring services

Eastman Safety Training Centre

Environmental – Red Cross eLearning: transportation of dangerous goods

Fire safety – Red Cross eLearning: Fire safety

Safety and health training – Red Cross emergency & standard first aid/CPR/AED & Re-certs

Workplace hazardous material information system – Red Cross eLearning: WHMIS & WHMIS refresher

Work site safety – Red Cross eLearning: lockout/tagout

Elias Occupational Hygiene Consulting

Air safety - air quality assessment, testing & lab analysis, training, ventilation assessment, asbestos testing

Confined space entry – program development, training

Environmental – environmental risk assessments, remediation site monitoring, vehicle emissions

Hazardous chemicals – asbestos/lead/mould testing and remediation planning, exposure assessment and control, WHMIS/GHS program

Health and safety programs – program/policy development and auditing; laboratory safety, asbestos management, job hazard analysis, safe work procedures development

Legal compliance - legislation/regulation/guideline compliance, audits, expert testimony provided by CIH, ROH and CRSP

Noise control and hearing conservation - noise exposure assessments, noise level survey, personal exposure assessments, training

Personal protective equipment – policy/program development, PPE assessments, training

Respiratory safety – policy/program development, respiratory protection assessments, fit testing, training

Risk assessment – evaluate and mitigate risks, chemical exposure assessments and toxicology review, job hazard analysis

Safety/health training – asbestos, confined space, chemical, mould, hearing conservation, PPE, respiratory protection, WHMIS

Testing – asbestos, chemical exposures, ventilation efficiency, compressed breathing air, vehicle emissions

Workplace hazardous material information system – WHMIS/GHS program development, inventory creation, safety data sheet authoring, training

Work site safety – job hazard analysis, safe work procedures, inspections, audits

Elite Safety Services Inc.

Air safety - provision of breathing air for supplied air requirements

Confined space entry – confined space training and rescue team provision

Fire safety – industrial fire brigade training, fire extinguisher and fire watch training

Hazardous chemicals – NFPA 472 training programs for hazardous materials response

Health and safety programs – all levels of training for provincial, federal and OSSA requirements

Respiratory safety – air trailers and respiratory protection training and fit testing

Risk assessment – hazard assessments, fall protection and confined space assessments

Safety/health training – all levels of training for provincial, federal and OSSA requirements

Testing – all levels of training for provincial, federal and OSSA requirements

Workplace hazardous material information system – WHMIS/GHS courses, spill response training

Work site safety – provision of CSO/NCSO staff for on site requirements

Enabling Access

Ergonomics – ergonomic assessments and education

Health and safety programs – ergonomics policy development, disability management

Risk assessment – job demands analysis, functional capacity evaluations, post-offer pre-placement testing, return to work programming, functional capacity evaluations

Safety and health training – education on nutrition, manual material handling, occupational vibration exposure, managing stress, aging workplace, yoga in the workplace

Work site safety – work site safety

EP Safety and Health Consulting and Associates, Incorporated

Confined space entry – risk assessment, evaluation/inventory, training (theory and practical), tailored to audience

Ergonomics – risk assessment, job hazard analysis, safe work procedures, training

Fire safety - fire extinguisher training, fire emergency planning

Hazardous chemicals – WHMIS, GHS training, risk assessment, exposure monitoring

Health and safety programs – program development, auditing, compliance inspections

Legal compliance - supervisor training, auditing (using specific tool specific to the organization upon consultation)

Fire Plan Strategies Inc.

Fire safety – assist owners to comply with fire safety planning, training, and signage requirements of fire code

Legal compliance - assist owners to comply with fire safety planning, training, and signage requirements of fire code

Risk assessment - fire risk inspection can be provided by certified experienced fire inspectors

Safety/health training – assist owners to comply with fire safety planning, training, and signage requirements of fire code

Human Factors North Inc.

Ergonomics – ergonomic assessments and review

Health and safety programs - manual materials handling training and recommendation

Risk assessment – musculoskeletal disorder risk assessment (office and industrial)

Safety/health training – ergonomic awareness training; office or industrial ergonomics workshops

Laser First Aid

Hazardous chemicals - WHMIS

Safety and health training - first aid; CPR/AED training

Workplace hazardous materials information system - WHMIS

LJrN Occupational Hygiene Consulting

Air safety - indoor air quality, mould, asbestos, radon, bacterial, industrial hygiene, compressed breathing air

Confined space entry – assessment, training, program development, auditing

Environmental – hazardous building materials and pre-demolition assessments (asbestos, lead, mould, radon)

Hazardous chemicals – worker exposure testing, metals, gasses, solvents, asbestos, mould abatement inspections

Health and safety programs – audits, training, asbestos management plans, safe work procedures, consulting

Legal compliance - compliance audits, CIH designation, improvement order compliance

Personal protective equipment – evaluation, training, consulting and recommendations

Respiratory safety – training

Risk assessment – pre-demolition assessment, risk assessment, toxicology evaluation and recommendation

Testing – compliance audits, air, worker exposure, ventilation, heat stress, asbestos, mould, metals, welding

Vibration – assessment and recommendations

Workplace hazardous material information system – training, evaluation, audits

Work site safety - inspections, training, audits, safe work procedures, hazardous materials, abatement inspections

Machine Safety Services

Legal compliance - machine guarding, e-stop, safe zones, colour coded moving parts

Safety equipment - shop equipment, production equipment, machine safety equipment

Safety/health training - the audit process provides the information to train employees on the equipment standards

Work site safety - work site will meet provincial safety guidelines

Manitoba Association of Optometrists

Personal protective equipment – prescription safety eyewear/glasses

Manitoba Brain Injury Association Inc.

Health and safety programs – prevent alcohol and risk-related trauma in youth (P.A.R.T.Y.) Program

Manitoba Heavy Construction Association Work Safely

Confined space entry – program development and training

Environmental - environmental awareness and emergency response training

Health and safety programs – COR training and auditing, policy/program development, safe work procedures and practices, job hazard analysis, toolbox talks, safety and health audits, safety and health consultants

Legal compliance – legal compliance

Library information – research/information resource

Noise control and hearing conservation – program development and training

Personal protective equipment – program development and training

Risk assessment – program development and training

Safety equipment – program development and training

Safety/health training – COR safety and health training, construction safety, industry specific training

Workplace hazardous material information system – WHMIS

Work site safety – site assessment, program development and training

Manitoba Trucking Association

Hazardous chemicals - TDG

Health and safety program – professional drivers improvement course

Legal compliance - commercial driver hours of service, cargo securement, long combination vehicle course for driver

Maximize Human Capabilities

Ergonomics – ergonomic assessment and training

Health and safety program - job demands analysis, functional capacity evaluation, pre-employment testing

Safety/health training – back care training, injury prevention training

Peter Neufeld Consulting Inc.

Confined spaced entry – confined space entry and rescue training, confined space assessments

Fire safety – emergency response planning and training

Hazardous chemicals – emergency response training

Health and safety programs - develop health and safety programs and consulting

Personal protective equipment – inspect fall protection equipment

Respiratory safety – fit testing and training

Risk assessment – risk assessment

Safety/health training – confined space, fall protection, WHMIS

Workplace hazardous materials information systems – assessments and training

Work site safety – construction safety management & consulting

Pinchin Ltd

Air safety - indoor air quality evaluation, testing and training, asbestos, radon, mould and occupational hygiene air monitoring program,

Confined space entry – program development, training, assessment, auditing

Environmental – phase I, II, III site assessment and remediation, hazardous building materials

(asbestos, lead, radon, legionella), pre-demolition

Hazardous chemicals – asbestos, asbestos consulting, worker training, mould assessment and removal, laboratory analysis, hazardous material assessment and abatement, health and safety programs - asbestos, mould and safety program development, development of safe work procedures

Fire safety - emergency, fire and fire life safety: plan development, evaluations and training

Health and safety programs – employee and management training, policy/program development, safe work procedures, practices, job hazard analysis, safety and health audits, safety and health consulting, safety inspections

Legal compliance - environmental audits/evaluations, expert witness, NPRI reporting, construction monitoring, compliance audits

Noise control and hearing conservation - noise surveys and worker exposure

Personal protective equipment – consultation and recommendations

Respiratory safety – training, fit testing

Risk assessment – environmental risk assessment, toxicology, evaluation and recommendations, soil vapour monitoring

Safety/health training – IAQ, asbestos, mould, fire and life safety programs, confined space, general safety, hazardous building materials, spill response, respirator, safe work procedures

Testing – asbestos, mould, lead, PCB, radon, legionella

Workplace hazardous material information system – training, evaluation, MSDS/GHS authoring, evaluation, audits

Work site safety – inspections, training, audits, safe work practice development, asbestos, lead, mould and other hazardous materials assessments and remediation inspections

Priority: SAFETY Consulting Inc

Confined space entry - information and procedures on lockout/tagout, space testing and retrieval

Environmental - HS&E reviews available

Ergonomics - man to machine interface consideration

Fire safety - consulting and training

Health and safety programs - design, development and auditing

Legal compliance - principal director holds a CRSP designation

Noise control and hearing conservation - work space noise and audiometric testing

Personal protective equipment - consulting and training

Risk assessment - review and/or create safe procedures to mitigate risk

Safety and health training - fall protection, confined space, fire safety, PPE, WHMIS

Testing (safety) - audiometric and noise level testing

Workplace hazardous materials information system - consulting and training

SAFE Hospitality

Ergonomics - training

Health and safety programs - assessment and training

Legal compliance - information

Risk assessment - tools and resources

Safety/health training - training sessions

Workplace hazardous materials information system - online and workshop whmis

Work site safety - onsite safety assessments available

Safety at Work

Confined space entry – awareness and setup for on-site

Environmental – EM (environmental monitor)

Hazardous chemicals – WHMIS/GHS training and on-site awareness and inventory

Health and safety programs – orientation/training, supervisor, WSH committee/representative training, incident investigations and reporting

Legal compliance – WSH basics and compliance awareness training

Noise control and hearing conservation – hearing conservation and noise surveillance

Personal protective equipment – PPE training and inspection programs

Respiratory safety – CSA Z94.4-11 training and fit testing

Risk assessment – CSO and auditor to conduct on-site and GAP analysis

Safety/health training – WHMIS/GHS awareness, TDG, supervisors and safe work, orientations, incident investigations and reporting

Workplace hazardous material information system – WHMIS and GSH awareness

Work site safety – CSO for both Construction Safety Association of Manitoba and Manitoba Heavy Construction, environmental monitor

Safety Services Manitoba

Air safety – air quality testing

Confined space entry – confined space entry, program development and training

Ergonomics – assessment and training

Fire safety – fire protection training

Hazardous chemicals – training

Health and safety programs – training, consulting and development

Legal compliance – training, auditing, inspections and investigations

Library information – research/information on health and safety topics

Noise control and hearing conservation – testing, program development and training

Personal protective equipment – training, auditing and consulting

Respiratory safety – program development and training, respiratory protection consulting

Risk assessment – training and consulting

Safety equipment – training and consulting

Safety/health training – training and consulting

Testing (safety) – occupational hygiene

Vibration – consulting

Workplace hazardous material information system – WHMIS training and consulting

Work site safety – training and consulting

Safety with Shelly

Health and safety programs - COR programs, SECOR programs, H&S programs, audits

Legal compliance - advice, consulting, assistance to comply with the law, audits

Safety and health training - whmis, TDG, propane, common care, supervisory training, fall protection

Workplace hazardous material information systems - training

Work site safety - site safety, project, inspections, audits

Saftee with Stef

Health and safety programs - company policies

Legal compliance - workplace safety and health regulations and requirements

Safety and health training - responsibilities, first aid, CPR, AED orientations

Workplace hazardous materials information systems - training

Work site safety - lockout, safety in worksite

Serenity Safety Consulting

Health and safety programs - COR programs, safety program manuals, COR audits

Legal compliance - government compliance, incident investigation

Library - tool box talks, safety information

Personal protective equipment - consultation and recommendations

Risk assessment - job hazard assessments, worksite inspections

Safety and health training - tool box meetings, workplace safety training

Workplace hazardous material information systems - training and certification

Work site safety - inspection, act and regulation compliance

Shermco Industries Canada Inc

Personal protective equipment - arc flash protection and electrical systems safety; qualified electrical worker training

Risk assessment - arc flash protection and electrical systems safety; qualified electrical worker training

Safety equipment - arc flash protection and electrical systems safety; qualified electrical worker training

Safety/health training - arc flash protection and electrical systems safety; qualified electrical worker training

Testing (safety) - battery testing training

Work site safety - arc flash protection and electrical systems safety; qualified electrical worker training, electrical safety for non-electrical workers

SOS Safety Services Inc.

Air safety - air monitoring, confined space gas detection

Confined space entry - hazard assessments and procedures, training, gas detection, back up

Environmental - environmental assessment, safe work procedures, gas detection, noise

Ergonomics - safe work procedures, training, assessments

Fire safety - assessments, safe work procedures, training

Hazardous chemicals - WHMIS inventories, training, safe work procedures

Health and safety programs - customized safety manuals, procedures, policies, safety coordination

Legal compliance - safety manuals, policies, training, procedures, work order assistance

Library - consultation

Noise control and hearing conservation - policies, training

Personal protective equipment - policies, training, consultation

Respiratory safety - policies, training, fit testing

Risk assessment - project, confined space, fall arrest, procedural hazard assessment

Safety equipment - consultation, training

Safety and health training - WHMIS, fall arrest, confined space, PPE, fire, safety rep, scissor lift, forklift

Testing (safety) - gas detection

Workplace hazardous materials information systems - training, policies, inventory, MSDS

Work site safety - hazard assessment, inspections, investigations, legal compliance, meetings

St. John Ambulance

Safety and health training - First Aid, CPR and AED Training

Survival Appliance Products

Safety equipment – survival kits, winter and otherwise, vehicle, aircraft,

The Manitoba Lung Associations

Air safety - smoking cessation/tobacco reduction programs

Environmental - radon test kits, scent-free stickers, and resources

Health and safety programs - occupational lung health screening program

Respiratory safety - spirometry testing

Safety and health training - respiratory training and educator courses

Winnipeg Air Testing

Air safety - air quality evaluation, lab analysis, industrial hygiene testing and program development, asbestos, mould, compressed breathing air systems, metals, welding fumes, solvents, gasses, dust, airborne allergens, skin exposure

Hazardous chemicals - occupational exposure testing, setting of OELs, chemical storage and spill response

Health and safety programs - audits and training, asbestos management, setting of OELs

Legal compliance - compliance audits, assistance with improvement orders, expert witness, CRSP, CIH, ROH, CRM Designations

Noise control and hearing conservation - noise surveys, work space noise exposure monitoring, hearing protection assessment

Personal protective equipment - evaluation and training, needs assessment and cost analysis

Risk assessment - risk assessment, toxicology evaluation and recommendation, pre-demolition audits

Testing - compliance audits, air, noise, ventilation, heat stress, asbestos, mould, metals, welding

fumes, solvents, gasses, dust, airborne allergens, skin exposures

Vibration - assessment and recommendation

Workable Solutions, Occupational Therapy Consulting Services

Ergonomics - office and industrial ergonomic risk assessment, ergonomic training workshops

Health and safety programs - injury prevention programs, ergonomics programs

Risk assessment - ergonomic risk assessment

Safety and health training - body mechanics training, ergonomics training, employee wellness
