

Norb Callahan

---

Technology Consultant

Greetings,

I have spent more than 33 years implementing and managing technology for businesses that include financial services, informational outlets, and real estate concerns. I am comfortable working in board rooms or on-site where, over three decades, I have put my focus on the migration of applications to cloud services, the implementation of ERP and accounting systems, corporate email deployments, network infrastructure stabilization, and computer hardware refreshes.

Given that experience, I offer the following services for consideration according to your needs:

- Yardi Voyager implementation, support and troubleshooting
- Technology vendor management
- Hardware procurement
- Interim Chief Information Officer
- Cyber-Security and Anti-Virus
- Internet Selection
- On site or remote training and technical support
- Microsoft SQL Server scripts and report writing
- Application evaluation and selection
- Web Site planning
- Microsoft Office 365
- Windows 10/Windows Server 2016
- Mobile devices
- Wireless networking
