in a space customized by our team of professionals.

**Admit as many as you like & bring the big screen home!**

Goal Sirens & Effects • Soundproofing • Superhero Props  
Stage Lighting & Effects • Full Scale Surround Sound • Visual Effects

NOT ACTUAL PROJECT. FOR INSPIRATION ONLY.

# Meet Randy

## Creativity has no limits.

Randy Cusack has delved into a vast array of artistic avenues over the past 15 years. Starting where most do, Randy found he enjoyed art class in high school. But, never thought much of pursuing his passion. Being told “There is no money in art” & “That’s not a real job” Randy kept his art close, as a hobby. However, around 2017 came back to his art and has never looked back.

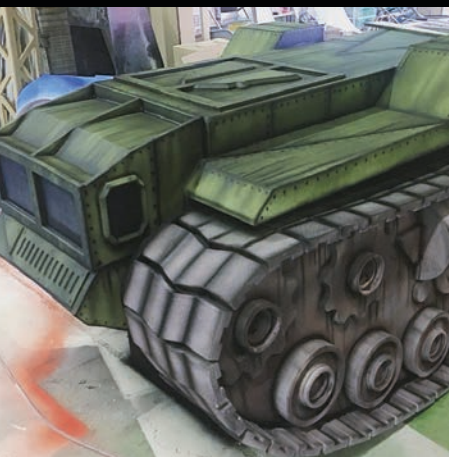

Randy regards art in a very broad term, and has endeavoured to explore all its corners. He has had the pleasure to have had his art take him around the world, learning things he never thought of.

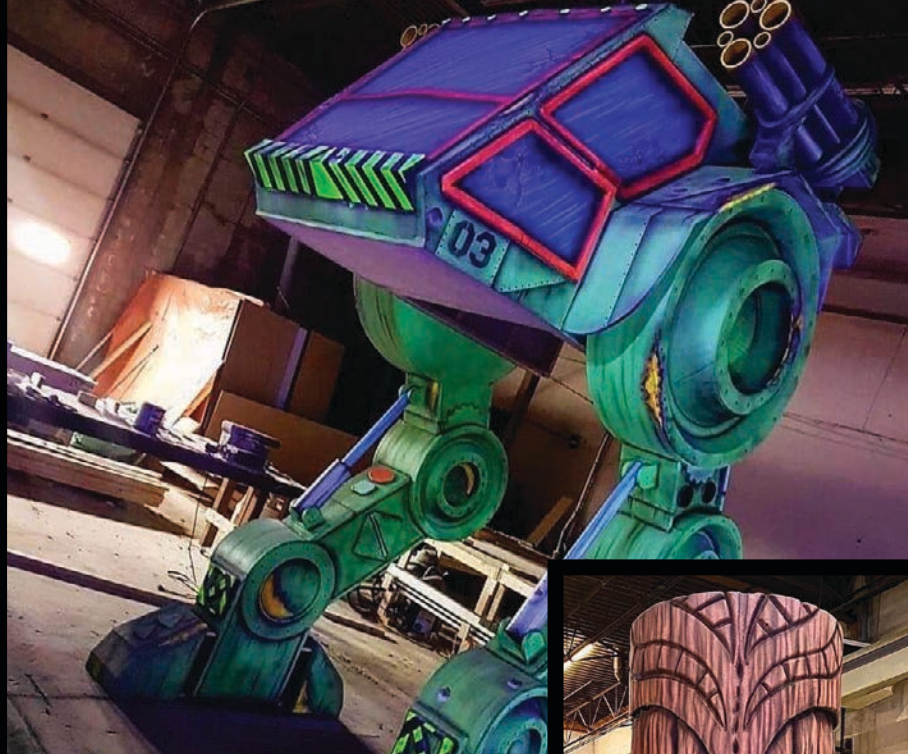

Having a myriad of talents, from painting canvas to baking and decorating custom cakes. He has owned and designed his own clothing line, which is a feat on its own, as well as spray painted fantastic murals. Now, Randy currently works at All Action UV Attractions. There he builds and designs mini golf and laser tag arenas.

Working at All Action for 6 years has allowed Randy to expand his knowledge and further extend his skill set in foam carving and sculpting, as well as epoxy resins, fiberglass, carbon fiber, and Linex coatings. Learning to paint in black light was a huge learning curve for Randy, but an adventure for sure. From dinosaurs, outer space, the Wild West and everything in between. Randy has been lucky enough to install his art in Amsterdam, Scotland and all over the USA and Australia. We continue to grow and never know what’s coming next.

With the current state of the world, it has been difficult to travel to do the installations. We are currently working around that, which led to this idea.

Randy is excited to work with Josh Hudon and learn even more while making people happy. With everything learned, teaming up with Josh will result in some amazing spaces that will be custom made for the client with no detail overlooked. Being passionate about themes and creating spaces that are visually appealing and functional, Randy looks forward to what he can accomplish with Josh and his team.

# Meet Josh

Creating highly unique one of a kind experiences.

Since 1996, Josh Hudon has been working in the construction industry. In 2007, he went into business for himself and Adlyn Construction was founded and quickly scaled from small renovations into bathrooms, kitchens & basements which became his primary focus.

In 2006 Josh went to Vancouver, BC for professional fireworks & pyrotechnics certifications.

Over the years, Josh has worked as a contractor on many thrilling, large scale events and for large organizations such as:

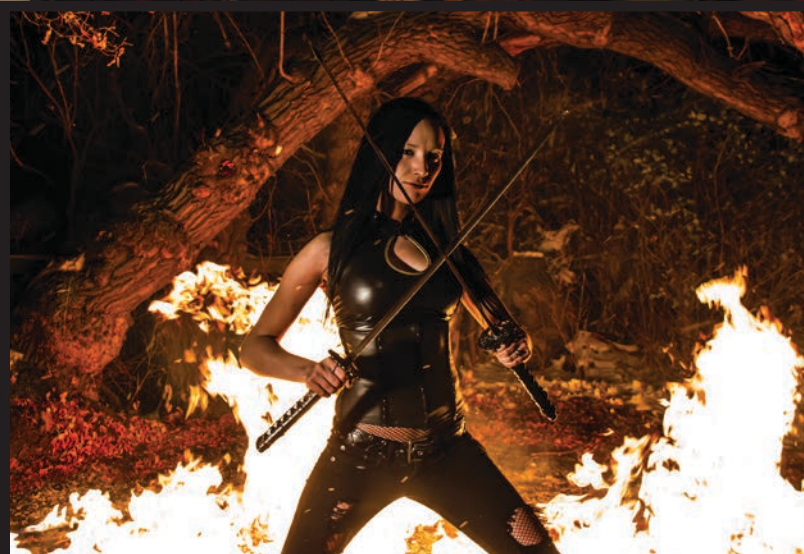

- Calgary Stampede
- Canadian Finals Rodeo
- Edmonton Oilers
- Edmonton Eskimos
- Calgary Stampeders
- Calgary Flames
- TOIFA Awards
- Professional Bull Riders
- Boonstock
- Edmonton Canada Day/New Years Eve Fireworks
- WWE

After a long recovery from a near fatal car accident, in 2013 Josh decided to return his focus to home renovations. Josh has built a strong reputation as a trustworthy kitchen & bathroom remodeler, basement developer and has recently taken a strong interest in building envelopes.

Operating with strong core values & quality craftsmanship, Josh & his team of skilled tradespeople are always very busy with exciting projects. Demonstrating the importance of helping the client with selections, being fully transparent in every aspect of the quoting process as well as the project itself, and always trying to go above & beyond, raving reviews of Josh and Adlyn Construction are easy to find all over the internet. Josh is committed to a smooth, low stress and fun process.

The anticipation of exploring his creativity and passion for creating experiences once again, with such a talented artist, is very exciting.
