Curriculum

This is a Home Health Aide Training Program which prepares CNA's for certification as a Home Health Aide by the State of California. This certification allows the Home Health Aide to function as an entry level worker on a health care team in a home health agency. Only individuals with a current Certified Nurse Assistant (CNA) certificate may enroll in a 40 Hour Home Health Aide Training Program to become a certified Home Health Aide (HHA). Students will learn the introduction to home health aide and agency role; interpretation of medical and social needs of people being served; personal care services; nutrition; cleaning and care tasks in the home. Classes include a combination of theory, skills lab, and clinical training.

Student Next Steps:

Make sure to have completed a physical exam & TB test. HHA applications can be completed with Student Services. A Student Checklist is provided on this brochure for your convenience.
