LASER

Enlighten II

True laser technology that targets pigmentation as different wavelengths to improve skin texture, tone, and tightness. Treatments include Tattoo removal, Picogenesis, Melasma treatment. Allows for skin resurfacing and tightening, decreased sun spots and pigment irregularities caused by sun damage. **Melasma** treatments are typically 4-8 with 6 weeks between, **Picogenesis** is 2-4 treatments 4-6 weeks apart, and tattoo removal is dependent on size, color, length of time they have had the tattoo, and where the tattoo was done. **Tattoo treatments** are 6 weeks apart. Pt. must have a consult prior to scheduling for the procedure.
