### 4. FIRST AID MEASURES

- Ingestion (Swallowing): DO NOT INDUCE VOMITING.** Give large quantities of water. Never give anything by mouth to an unconscious person. Call a physician immediately.
- Inhalation (Breathing):** Remove patient from contaminated area. If breathing has stopped, give mouth to mouth resuscitation, then oxygen if needed. Get immediate medical attention.
- Skin Contact:** Remove contaminated clothing at once while washing affected area with plenty of water for at least 15 minutes. Call a physician.
- Eye Contact:** Wash eyes with plenty of water for at least 15 minutes, lifting upper and lower eyelids for occasionally. Remove contact lenses, if present and easy to do. Continue rinsing. Get immediate medical attention.
- 

### 5. FIRE-FIGHTING MEASURES

Not considered to be a fire hazard.

Not considered to be an explosion hazard.

Use any means suitable for extinguishing surrounding fire. Avoid direct contact of liquid with water.

In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full face piece operated in the pressure demand or other positive pressure mode.

### 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures:

Do not inhale vapors, mist or gas. Ensure adequate ventilation. Remove all sources of ignition. Take steps to prevent eye or skin contact or inhalation.

Environmental precautions:

Contain spill if possible and safe to do so. Prevent product from entering drains.

Methods and materials for containment and cleaning up:

To clean up spill, scrape up or use absorbent material. Wash contaminated area with alkaline cleaner and water. All clean up and disposal should be carried out in accordance with federal, state and local regulations.

---

### 7. HANDLING AND STORAGE

Precautions for safe handling:

Do not get on skin or in eyes. Do not inhale vapor or mist.

Conditions for safe storage, including any incompatibilities:

Keep in a tightly closed container. Store in a cool, dry, ventilated area. Protect against physical damage. Separated from acids and alkalis. Containers of this material may be hazardous when empty since they retain product residues.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Exposure Limits:**

| Material       | CAS #     | EINECS#   | TWA (OSHA) | TLV (ACGIH) |
|----------------|-----------|-----------|------------|-------------|
| Sodium Nitrite | 7632-00-0 | 231-555-9 | N/A        | N/A         |

**Appropriate engineering controls:**

General room or local exhaust ventilations is usually required to meet exposure limits.

**Individual protection measures, such as personal protective equipment:**

**Respiratory protection:** Use NIOSH approved organic vapor/acid gas respirator or canister respirator within the use limitations of these devices when lacking sufficient local ventilation to control vapors to a safe level. In all other situations use a self-contained breathing apparatus.

**Eye Protection:** Use chemical safety goggles and/or a full face shield where splashing is possible. Use equipment approved by appropriate government standards, such as NIOSH (US) or EN166 (EU). Maintain eye wash fountain and quick-drench facilities in work area.

**Skin and body protection:** Wear impervious protective clothing, including boots, gloves, lab coat, apron or coveralls, as appropriate, to prevent skin contact.
