Author: Robert S Witte

ISBN: 9780471722298

Business Statistics: A First Course, 8th edition. Choose a format. Overview Table of contents For teachers. Overview Business Statistics: A First Course, 3rd Edition, by Sharpe, De Veaux, and Velleman, narrows the gap between theory and practice — relevant statistical methods empower business students to make effective, data-informed decisions. Features and benefits MyLab gives you the tools you need to learn — and to get a better grade. Immediate feedback: On assignments and quizzes — and assistance with each problem if you need it — helps you get unstuck.

The mobile eText: Lets you learn on your terms, wherever you are. Defining and Collecting Data 2. Organizing and Visualizing Variables 3. Numerical Descriptive Measures 4. Basic Probability 5. Show More. Show Less. Getting Started 1. Picturing Distributions with Graphs 2.

Describing Distributions with Numbers 3. The Normal Distributions 4. Scatterplots and Correlation 5. Regression 6. Exploring Data: Part I Review. Producing Data: Sampling 9. Producing Data: Experiments Introducing Probability Sampling Distributions Confidence Intervals: The Basics Tests of Significance: The Basics Inference in Practice Inference about a Population Mean Comparing Two Means Inference about a Population Proportion Expanded discussion of iterated integrals, with added figures to clarify discussion.

A new subsection on the bivariate normal distribution begins the section on the multivariate normal distribution in Chapter 3 Some Special Distributions. Discussion on standard errors for estimates obtained by bootstrapping the sample is now offered in Chapter 7 Sufficiency. Several topics that were discussed in the Exercises are now discussed in the text , including quantiles in Section 1. Multivariate Distributions 2. Some Special Distributions 3. Some Elementary Statistical Inferences 4. Consistency and Limiting Distributions 5. Maximum Likelihood Methods 6.

Sufficiency 7. Optimal Tests of Hypotheses 8. Inferences About Normal Linear Models 9. Nonparametric and Robust Statistics Bayesian Statistics Mathematical Comments A. R Primer B. Lists of Common Distributions D. Table of Distributions E. Is this data set Terminology Consider the graph of a normal probability distribution of x values with mean and Terminology Answer true or false. The margin of error when using x as a point estmate for isx.

Terminology Answer each of the following statements true or false regarding the level of Statistical Literacy and Terminology When are two random samples independent? Terminology Match each of the following tests to the appropriate description: test of independence More Editions of This Book Corresponding editions of this textbook are also available below:. Understanding Basic Statistics : Technology Guide. Understanding Basic Statistics, 6th ed. Understanding Basic Statistics, Enhanced. Understanding Basic Statistics, 7th Edition. Understanding Basic Statistics - With Access. Related Statistics Textbooks with Solutions. ISBN: Still sussing out bartleby? Check out a sample textbook solution. Homework Help by Math Subjects.
