

## Exhaustive OBRY Bi-Glyph roots

All OBRY words oriented from left to right. Masoretic Hebrew remains oriented from right to left.

**BLACK COLOR CODING** signals words listed in Strong's as bi-glyphs and have textual support as such

**PURPLE COLOR CODING** signals words listed in Strong's as bi-glyph roots, but currently have less textual evidence than BLACK coded listings

**BLUE COLOR CODING** signals words not listed in Strong's as simple bi-glyphs but that have a strong argument for the actuality of them being bi-glyph roots with modifiers

**GREEN COLOR CODING** signals words not listed in Strong's as simple bi-glyphs with currently less textual evidence than blue coded entries; however, they do have some evidence of being a bi-glyph root

**RED COLOR CODING** signals words listed in Strong's as bi-glyph roots but do not appear to have sufficient textual proof thereof

**MAGENTA COLOR CODING** signals a root or two glyph combination with no apparent Strong's entries to classify it under. Sometimes this combination can only be found within other words.

\* - when an OP definition is applied based on a more precise understanding. Example: H2874 𐤀𐤋𐤁- n. 12x. a butchering\*

The use of these terms is, in no way, to suggest they are appropriate. The part of speech designation goes only for the English translation's part of speech. The OBRY part of speech is then contrasted in the final column when applicable

<p>𐤆 - used for "definite article" as prefix and to undefine or "spread" as suffix (specifically locatively). A key to it's usage is found in Gen 17:5 and 15, wherein 𐤆𐤆𐤆𐤆 adds 𐤆 to 𐤃𐤅𐤒𐤍 (now 𐤃𐤅𐤒𐤆𐤍) and 𐤗𐤒𐤆 (now 𐤗𐤒𐤆) as he promises to greatly increase this couple who are old and have no children. The sense of "broadening", (if indeed it is a man stretching out his hands), whether to "increase" via widening, at the front, or "decrease" via widening, at the end, or perhaps just widening a thing or idea when inserted in the midst, is herein found.</p>
