SOLAR TABLES

...BECAUSE WITH ENVIROENERGY SOLUTIONS THE SUN SHINES FOR EVERYONE...

Today everybody's life revolves around mobile devices and connectivity, either for business or pleasure. We Are All Addicted and All like to Use our Mobile Devices During Our Leisure time in the Garden, around the Pool or on the Beach, on camping...

IPOD

GAME DEVICE

TABLET

MOBILE

SPEAKERS

But all these devices use batteries and often require recharging...

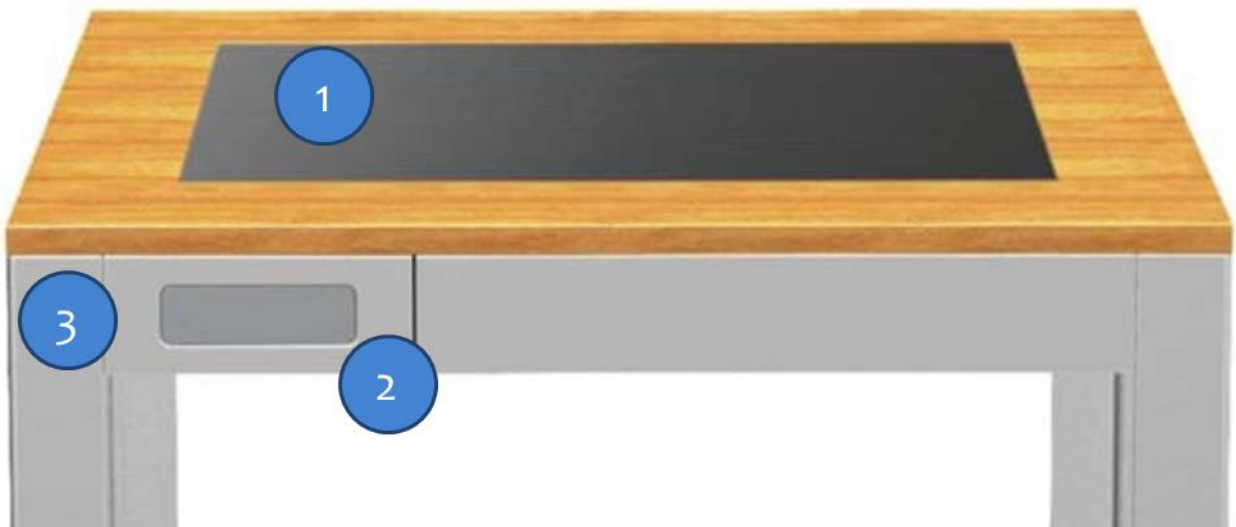

Unfortunately, most of the Time, there is no Electricity Available around. In the Garden or On a Terrace, Around the Pool or on the Beach, in the Wilderness or a Hotel Lobby, in a restaurant or in a bar...

Enviroenergy Solutions Solar Tables offer a unique solution to Recharge All Portable Devices and they can be Installed anywhere, completely independent of any power source.

In a bar, in a restaurant, on a terrace, around the pool or on the beach they are a simple, elegant and original way for customers to recharge all their devices. They are an attraction on their own and attract and keep people around for a longer time.

Thanks to their unique technology requiring only UV rays to charge and function, they can even be installed and work indoors.

Basic Features:

1 Ultra-Sensitive, Thin Film Solar Panel

2 Power Box: Charges the Batteries and Protects them from Overcharge and Over-Discharge (sound alarm), stores the Energy and transforms it to AC current when required, including alarm for over-discharge.

3 Various Plug Outlets (USB, Car lighter, AC, etc...), AC/DC switch, LCD Screen with Working Status, function mode and Battery Condition Indicators.

An Ultra-Sensitive solar panel, similar to the ones used in solar calculators that can function anywhere, absorbs and transforms UV rays to electricity (DC) to charge the built-in battery. The energy stored is then used to charge devices through a variety of plug outlets: USB, car lighter, normal European plug. By switching ON the built-in inverter, the current is transformed from DC to AC and is capable of charging a variety of appliances (Lap Top computer, lamp, TV...).

ENVIROENERGY SOLUTIONS SOLAR TABLES are designed for both outdoor use (garden, camping, pool, beach, on a terrace, balcony, etc...) and Indoor use (Hotel lobby, Bars, Restaurants, in the house always near a window, etc...).

Enviroenergy Solutions Solar Tables, are available in a variety of Sizes, Power Outputs (30w, 40w, 60w, 80w, 100w, 120w), Models (high, Low, 4 legs or 1 central leg, 12V/230V), Materials (Aluminum, Wood, Leather) and Colors, and can also be Tailor Made Upon Request.

Frequently Asked Questions:

➤ **What is Enviroenergy Solutions Solar Table?**

It is a revolutionary and unique table that produce electricity from daylight.

➤ **How does it work?**

Enviroenergy Solutions Solar tables consist of a HQ amorphous thin film PV panel that produces electricity using, daylight, a battery that stores and feeds the electricity to the various plugs and outlets of the table to power and recharge any portable electronic device and rechargeable battery.

➤ **How safe are they?**

Enviroenergy Solutions Solar tables are designed for outdoor use and are of course waterproof. The panel is made of very resistant tempered glass (similar to a car windows). A charge controller and voltage regulator prevent short-circuits or overcharging of the batteries.

➤ **What are they for?**

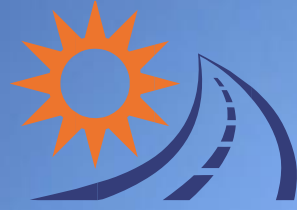

Enviroenergy Solutions Solar Tables allow the use and charging of portable devices, independently from any other power source and where you would not normally expect to find an electrical supply.

➤ **Do they work when there is no Sun?**

Enviroenergy Solutions Solar Tables work with UV light (direct and indirect) so they can produce electricity even when the sky is gray or indoors. Thanks to the integrated battery and electricity storage, our Solar Tables allow powering and charging of devices even at Night.
