

Sealing Solutions for Technical Lighting Applications

JAMAK Fabrication—serving the lighting industry for over 40 years. Our custom designed products can provide unique solutions for projects demanding optimum performance in an environmentally conscious world.

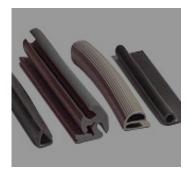

Jamak Fabrication is a long-term solution provider for gaskets and sealing products for the lighting industry

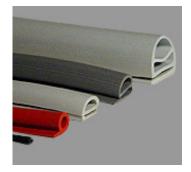

- High crosslink density = low out-gassing volatility
- High temperature silicone gaskets (+500F)
- Bonded / Spliced, or molded Corners
- Ultra low temperature sealing (-80F)
- Extruded and transfer, injection, or compression molded parts
- Various material options available

- EPDM and other organic rubber
- Color matching available
- PSA backed product
- High consistency and liquid silicone parts
- Dense & sponge
- Dual durometer and co-extrusion

JAMAK is a leader in providing functionally designed and precision made sealing solutions. Throughout our global operations, our focus is on creating value for our customers by providing outstanding technical service and manufacturing options. From designing products and materials engineering, to customer support, we demonstrate our commitment to excellence in the quality and performance of the products we provide.

Design and Material Development

Unique to our industry is JAMAK's emphasis on material research and development. Our technical support staff provides the resources for designing, formulating, developing products and test methods. Our engineering design software allows us to offer design and tooling alternatives quickly and cost effectively.

Company Information

- Over 40 years experience in silicone formulation and product manufacturing
- Many first to market innovations and patented products
- Over 350,000 sq. ft. of global manufacturing capacity in the US, Europe and Asia.
- On-site Center for Design Development and Testing

By partnering with a solutions-provider like JAMAK Manufacturing, you receive engineering support and materials development to meet the toughest standards for your projects

- Bonded Gaskets
- Sponge & HCR Materials
- Low Volatile Compounds
- Grommets/Moldings
- Dual Durometer Extrusions

- Dual Durometer Extrusions
- Fabricated Gaskets
- Co-Extruded Profiles & Gaskets
- High Temperature Materials
