MECH PRO™ COLD WEATHER

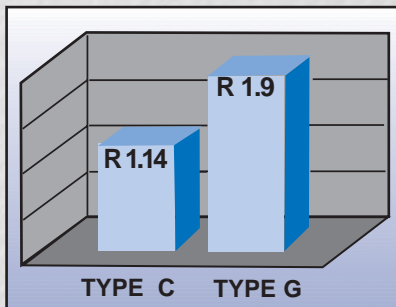

Type G Thinsulate™

We use exclusively 3M's Type G Thinsulate for our SUG Cold Weather, Mech Pro Cold Weather, and lined leather gloves.

Type G Thinsulate™ is simply better than the traditional Type C insulation.

- 65% Warmer
- Softer
- Thicker yet more flexible
- More resilient
(that means it keeps its shape better)

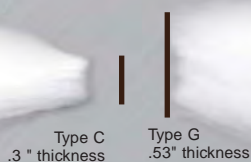

Insulation Value Comparison

Based on 3M published technical data for 100 Gram.

Type C vs Type G insulation

Wells Lamont Glove Within a Glove

All of our gloves have full linings, but our better lined leather and leather palm gloves feature a fully wrapped glove within a glove. Insulation is wrapped completely around the fingers to minimize heat loss. This method costs more but delivers the best Wells Lamont quality.

1119 Cowhide

Why Wells Lamont Ragg Gloves for cold weather?

- Ragg wool naturally repels water
- Ragg wool retains warmth even when wet
- Wells Lamont ragg wool gloves are prelaundered to reduce the itch associated with wool.

572 Ragg Wool

85% wool 15% nylon grey ragg wool with C100 Thinsulate™ insulation with fully wrapped brushed lining. Hob Nob® dots on palm and thumb. Self hemmed.

Thermofill™ is an exclusive Wells Lamont continuous filament high loft polyester insulation that uses its bulk to trap and retain heat by preventing "thermal shorts" or cold spots caused by compression. Thermofill™ won't matt and retains its shape even after wetting. We use a minimum of PF100 gram weight.

SPORT UTILITY GLOVE

WORK HARD, PLAY HARD

The theme behind Wells Lamont **SUG™** Sport Utility Gloves.

First introduced less than two years ago, **SUGs** have emerged as a breakthrough category quickly moving consumers up from the lesser cost traditional gloves. Simply, the bold and exciting new approach that went way beyond plain old work gloves **worked**.

Having evolved from the combination of a tired old work glove category and the expertise of our sports glove technology and influence, **SUGs** livened up the work glove category injecting fun, color, and improved designs all with noticeable benefits. **SUGs** combination of new materials, and form fitting, slimmer, tapered designs proved that there is an entire consumer base willing and wanting to buy an affordable glove that does not forget is **Work Hard** heritage, yet seeks its **Play Hard** image.

And why not, they look and feel better than anything you've ever tried before.

SUGs have features that work !

Dimension 3™ breathable stretch mesh backs for comfort and decrease in overall weight. **Wedgy™** palm patch designs with indents to add protection only where it's needed. **Overwrap™** fingertips that eliminate seams in highest wear areas. **KwikPull™** fingerless glove removal assists. **Perimeter Patching Systems™** that expand contact points for rounded surfaces. **Grips™** precurved construction to reduce hand fatigue. **Airdex™** super stretchable spandex backs. **Xtrastretch™** terry thumbs... **Slimfit™** shaped constructions... **Duraflex™** synthetic patch reinforcements. **Recovery™** 4 way stretch materials, **Feeltite™** extra heavy closures and **DSP™** digital coated leather patching.

SUGs success comes from having bold exciting contemporary packaging that emphasize the dual **Work Hard, Play Hard™** brand theme. And the use of our patented ** yellow piping **Focus Frame™** went way beyond our initial expectations as did our in your face free standing floor merchandising **SUGs**... and why not, the least that you would expect from Wells Lamont...America's Best Selling Gloves !

828 Wrist Rapps

NEW

- * **Breathable Dimension 3™** directional stretch mesh back
- * Patented **Grips™** precurved design reduces hand fatigue
- * Premium grain pigskin leather
- * Anti vibration padded reinforced palm patch
- * With unique **Power-Wrist Stabilizer™ Wrist Rapps™**
- * Packed one pair per carton

828L - 3 pr large05255-2

828M - 3 pr medium05256-9

Why Wrist Rapps ?

Repetitive motion that causes extreme flexing or extending of the wrist can lead to carpal tunnel issues. Our unique Rapps™ design minimizes these movements, ones often associated with the use of heavy duty power and hand tools. The double layer wrist Rapp protects the carpal tunnel area from the impact of power tools.

822 Cowhide

NEW

- Patented **Grips™** precurved design reduces hand fatigue

MechPro™

Wells Lamont high quality MechPro gloves are designed for performance without being overpriced.

Note our MechPro quality features:

- Synthetic leathers that are stronger and more abrasion resistant than competitive brands. And machine washable too !

- Pinched fingertip designs on selected styles improves comfort and tactility because there is less seam material to get in the way

- Stretch panels in the finger crotches on picture of panel selected styles. These stretch "gussets" reduce seam feel and improve comfort and flexibility.

- Unisex size designations and sizes for smaller hands for both women and young adults.

7701 MechPro

Machine washable synthetic suede. Perforated finger fourchettes for comfort. Reinforced fingertips. Improved pinched fingertip design; improved gussetted finger crotch for comfort. Elastic cuff with hook & loop adjustable wrist closure. Ideal for basic utility, light tool use, maintenance.

LEATHER GUIDE

Commonly used glove leather is described next to each magnified (8x) photo of an actual leather swatch.

All work glove leather is not the same, and neither are all leather work gloves. Each leather and leather glove have their own characteristics. What we have illustrated is a quick series of lessons that define these characteristics and where and how they be best used.

Grain Pigskin

Pigskin is unmatched for its abrasion resistance, and breathability (note distinctive hair follicles that contribute to this). Tanned correctly, this leather is very flexible, and moisture and puncture resistant.

Grain Deerskin

Prized for its flexibility, softness and insulating ability, deerskin is surprisingly strong and moisture resistant. Because deer are not raised for commercial use, there can be large quality and consistency variances.

Split Deerskin

The most flexible of all work glove leathers, deersplit is not as available as grain because of the small hide size and the fact that deer raised in warm climates do not produce thick enough hides. Because it tends to be thinner, an excellent choice for insulated gloves.

Grain Elkskin

Very similar to grain deerskin, elkskin can frequently have a distinctive "pebbled" appearance, characterized by small bumps on the surface. Elkskin can come in very thick hides, which increase its insulation effectiveness and wearability. Again, wide quality variances occur.

Grain Goatskin

Densely packed fibers allow this leather to be thin, but retain much of its strength. Since the hides can be very small, quality variances are common, as a single pair of gloves can contain side, shoulder, and belly parts.

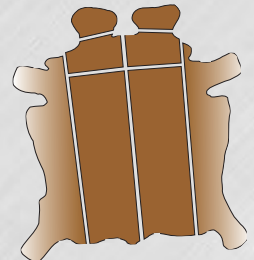

Split Cowhide

The most used, cost effective, and versatile of work glove leathers. The pearl side split shown here clearly shows high fiber density responsible for this leather's high abrasion resistance and strength.

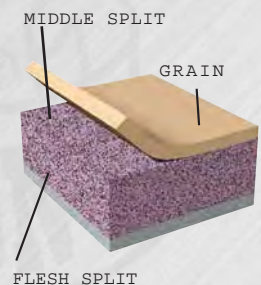

How a leather hide is used

Our leather gloves are made from carefully selected hides to our exacting specifications, most in our own tanneries. In the processing of most hides, especially those from larger animals, it is customary to cut them into two or more smaller pieces for easier handling. The most common pieces used in glove leather are the belly, side, and shoulder pieces.

Because leather hides are too thick for commercial use, they must then be cut into layers. A hide is divided into three layers. The smooth or outer layer, or grain side, is used for better gloves where look and dexterity is important.

The bottom layer, or flesh split side with the feel of suede is very strong, and is used mostly in leather palm styles, but also in full leather gloves.

We do not use the middle split layer. While it can look like flesh split, there is no tensile strength to this leather, resulting in poor performing gloves.

All Wells Lamont leather is graded and separated into A, B, or C grades. Wells Lamont uses primarily A and B grades for our best gloves, B and C grades for our better gloves, depending on the type of leather.

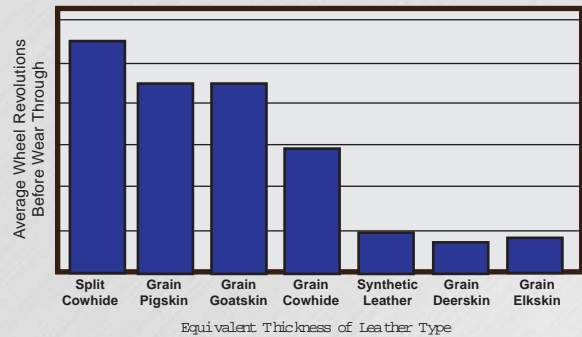

Leather Wear & Performance

Abrasion resistance is most critical to the longevity of a work glove, since constant rubbing caused by repetitive motion is by far the most common force encountered. That's why we test our leathers for performance characteristics as illustrated in the chart below. For true abrasion comparisons, equivalent weights or thickness of leather need to be tested.

Many leather gloves, in order to achieve greater tactile sensitivity or flexibility, are made from a "thinner" or "shaved" leather thereby reducing their abrasion performance. There can be many misconceptions regarding leather performance when leather thickness is not considered. Gloves are routinely made from different thickness leather in order to satisfy specific glove performance requirements at the expense of abrasion ability.

Note that occasional scratches or scars are your assurance that the leather is a natural product. These slight variances in no way affect the wearability of the gloves.

**Teledyne Tabor
Wheel Abrasion
testing
(5 samples)**

Common work glove leather physical performance characteristics: (for equivalent thicknesses of natural leather)

NOTE: The table below is meant to give you a general indication of how various types of leather perform in relation to each other during standard testing. While all leather is washable to some degree, our comments below refer to our proprietary machine washable leather tanning formula.

Leather Type	Abrasion resistance	Puncture resistance	Tensile strength	Breathability	Flexibility	Tactile sensitivity	Insulation ability	Moisture resistance	Relative cost
Grain Pigskin	Best	High	Good	Best	High	High	Low	Best	Low
Grain Cowhide	High	Best	High	Fair	Good	Good	Good	Fair	Mid-range
Split Cowhide	High	Best	High	Fair	Fair	Fair	Good	Fair	Low
Grain Deerskin	Fair	Fair	Best	Fair	High	High	Best	Better	High
Split Deerskin	Fair	Fair	Fair	High	Best	Best	Good	Good	Mid-range
Grain Goatskin	High	High	High	Fair	High	High	Low	Good	Mid-range
Grain Elkskin	Fair	Fair	High	Fair	High	Good	High	Better	High
Machine Washable Leather	Slightly less	Slightly less	Same	Same	More	More	Same	Most	High

Material recommendations for common work glove applications: (for equivalent thicknesses of natural leather)

Applications	Grain Pigskin	Grain Cowhide	Split Cowhide	Grain Deerskin Elkskin	Grain Goatskin	Synthetic Leathers	Coated Knits
Framing, carpentry, roofing	Good	Best	Fair	Good	Good	Good	Fair
Maintenance, dry surface cleaning	Better	Good	Good	Best	Better	Good	Fair
Demolition, rough labor	Good	Better	Best	Fair	Fair	Fair	Good
Equipment operation	Good	Good	Fair	Best	Better	Better	Fair
Heavy machine operation	Good	Better	Best	Good	Good	Fair	Fair
Landscaping	Best	Good	Better	Fair	Good	Good	Good
Hand tools, pistol grips, assembly	Good	Good	Fair	Better	Better	Best	Fair
Parcel delivery, warehouse work	Good	Better	Good	Good	Better	Good	Best
Transportation	Good	Good	Fair	Best	Good	Better	Fair
Low abrasion operations	Good	Fair	Fair	Good	Better	Best	Fair
High abrasion operations	Better	Good	Best	Fair	Better	Good	Good
Fencing	Good	Better	Best	Fair	Good	Fair	Fair
Rigging	Better	Good	Good	Good	Best	Better	Fair
Materials handling	Better	Better	Better	Fair	Good	Good	Best

NOTE: Recommendations shown above are for better types of work gloves. Jersey, canvas, and other textile gloves are suitable for a very broad range of lighter duty tasks. For recommended uses of liquidproof and chemical resistant gloves, please refer to tables on pages 47 - 48.

UNLINED LEATHER

Authentic Western Work Gloves

Quality hand protection
for the toughest ranching jobs.

1744 Western Goatskin

NEW

Premium grain lightweight saddletan goatskin for super dexterity. Snap fit back with keystone thumb. Clute cut.

GRAB the best value in gloves

Our newest in promotional multipack offerings with:

New production innovation

New product **GRAB** packaging

New **GRAB** merchandising

And here's how we do it:

1st: we offer the product

4000Q Leather Palm

Pearl grey split cowhide leather palm with full leather first finger, thumb, fingertips, and knuckle strap. Continuous heel. Safety cuff, wing thumb, double shirred wrist. With reinforced palm patch.
Packed 4 pair per Grab pack;
12 packs per display pack.

4000QG-DPL.....05265 -1

275Q Reversible Chore

Golden brown standard weight polyester / cotton chore glove with polyester / cotton lining. Knit wrist. **New Reversible Pattern - Fits either hand !**
Packed 6 pair per Grab pack;
9 packs per display pack.

275LKG-DPL - large.....05266-8
275XLKG-DPL - extra larg.....05267-5

588Q Reversible Jersey

Standard weight Wearpower® polyester / cotton blend jersey. Seal brown color. Knit wrist. **New Reversible Pattern - Fits either hand !**
Packed 9 pair per Grab pack;
12 packs per display pack.

588LQG-DPL.....05264-4

133FG Latex Coated Knit

Economy latex textured coating for grip on palm, thumb, fingertips. Ergonomic design for comfort. 10 cut polyester blend knit shell.
Packed 3 pair per Grab pack;
20 packs per display pack.

133LFG-DPL - large.....05261-3
133MFG-DPL - medium05262-0
133XLFG-DPL - extra large.....05263-7

GREAT GREAT VALUE AND DURABILITY

2nd: we offer the package

Visually exciting extra wide multi pack bands die cut to look different and with bold graphics to incite your customer to GRAB a pack. Then shrink wrapped to keep the product clean and all together.

3rd: we offer the display

- * GRAB display tray for counter, or shelf use.
- * Compact size at 18 x 12 x 10"
- * Visually exciting graphics that reinforces the message of the package product
- * Strong, durable, and it comes prepacked with your product... simply take off the shipper lid and you're in business

4th: we offer the possibilities:

As a free standing multi unit floor display

An entire end cap assortment

Multi trays on a shelf unit

1096 Goatskin Winter Lined

NEW

Thinsulate
INSULATION

Reverse grain goatskin with type G100 Thinsulate insulation and fully wrapped brushed lining. Reinforced palm patch, keystone thumb, and leather bound. Double shirred wrist, gunn cut.

21 mil latex with flocked lining.
13 inch gauntlet. Textured grip. One pair per sleeve.

173L - 12 pr large.....01731-5
173M - 12 pr medium.....04290-4

168 Disposable Vinyl with Aloe

Enriched with Aloe Vera for skin conditioning and vitamin E for moisturizing. 5 mil vinyl, rolled cuff, latex free; ambidextrous - fits either hand. Powder free; 4 hand polybag;

168 - 12 each 4 hand polybag.....04618-6

SUREGARD™ DISPOSABLES

Nitrile

- Best protection for oil based paints & stains, turpentines, tung oil, and related products.
- Best for puncture and tear resistance of all disposable gloves
- **Latex Free** for those with allergic reactions to latex.
- 5 mil, rolled cuff, lightly powdered for easy on & off; ambidextrous - fits either hand.

97L Disposable Nitrile

10 Hand retail pack.
97L - 12 ea size large.....04011-5

Vinyl

- Better protection for water & oil based paints & stains.
- Looser fitting than latex; provides more air flow for better comfort
- **Latex Free** for those with allergic reactions to latex.
- 5 mil, rolled cuff, lightly powdered for easy on & off; ambidextrous - fits either hand.

90L Disposable Vinyl

10 Hand retail pack.
90L - 12 ea size large.....01668-4

Latex

- Good protection for water based paints & stains, and household chemicals.
- Good elasticity for that second skin fit & feel.
- Excellent choice for household cleaning
- 5 mil, rolled cuff, lightly powdered for easy on & off; ambidextrous - fits either hand.

94L Disposable Latex

10 Hand retail pack.
94L - 12 ea size large.....03412-1

Heavy Duty Vinyl

- In heavy duty form, more resistant to heavier duty cleaning chemicals than 5 mil vinyl.
- **Latex Free** for those with allergic reactions to latex.
- 6 mil green, rolled cut. Lightly powdered; ambidextrous - fits either hand

166 Disposable Vinyl

6 hands retail pack
166 - 12 ea. one size.....04418-2

153 Disposable Nitrile

100 hand dispenser box.
153 - size large.....04393-2

151 Disposable Nitrile

50 hand dispenser box.
151 - size large.....04394-9

165 Disposable Vinyl

100 hand dispenser box.
165 - size large.....03883-9

155 Disposable Vinyl

50 hand dispenser box.
155 - size large.....04294-2

W770 Disposable Latex

100 hand dispenser box.
W770L - size large.....04012-2

157 Disposable Latex

50 hand dispenser box.
157 - size large.....04295-9

159 Medical Quality Latex

50 hand dispenser box.
157 - size large.....04296-6

160 Disposable Vinyl

160 - 300 hands one size.....04292-8
packed per bucket display with header card

161 Disposable Vinyl

50 each 6 hand packs
161 - one size.....04293-5
packed per bucket display with header card

PHYSICAL PERFORMANCE GUIDE

Latex Rubber

Latex, or natural rubber, has excellent abrasion, cut and tear resistance as well as outstanding grip and temperature resistance from 0-300 degrees F.

However, natural rubber has poor flame resistance. It is not recommended where resistance to oil, grease or petroleum solvents is required.

Latex will withstand all liquids that mix with water, making unsupported types especially suited for general household use. Heavier versions will resist common furniture strippers without sacrificing grip or tactile sensitivity.

Coated versions have crinkle finishes, making them the best choice for handling sharp-edged materials like glass and sheet metal, as well as lumber, stones and concrete.

Neoprene

Neoprene protects from a broad range of chemicals and is one of the best coatings for strong alkalis and acids. Neoprene has excellent tactile strength and resembles natural latex in flexibility, but is much more chemical resistant and impermeable to gases, vapor and moisture.

Neoprene performs well in temperatures from 0-300 degrees F, resists herbicides and pesticides, common farm chemicals; oils and a very broad range of alkalis and acids in degreasing.

Petrochemical, metal fabrication, plating, galvanizing and general material handling are suitable applications for neoprene in its coated form.

PVC

PVC provides excellent economical resistance to most oils, acids, fats, caustics and petroleum hydrocarbons in addition to outstanding abrasion resistance in its heavier forms.

PVC gloves are useful in alcohols and glycol ethers, but not aldehydes, ketones, aromatic hydrocarbons, halogen compounds, heterocyclic compounds or nitro compounds. PVC performs well in temperatures ranging from 25-150 degrees F.

Our disposable gloves will provide only short term protection. They are best suited for painting, hair care, food handling and dishwashing.

Nitrile

A synthetic rubber that provides excellent resistance to a very wide range of solvents and hazardous chemicals; also resists punctures, cuts, snags and abrasion. Nitrile protects against oils, greases, acids, caustics, herbicides, pesticides, kerosene, naphtha, alcohols, turpentine, tung oil and many petroleum products.

Nitrile gloves have better cut and abrasion resistance than neoprene and PVC gloves, and are considered an excellent general-purpose product. Nitrile functions well in temperatures ranging from 25-300 degrees F.

Unsupported applications include common farm and garden protection, industrial painting, cleaning and maintenance, and automotive use.

Nitrile gloves provides outstanding flexibility and abrasion-resistance.

Physical Performance Data: E - Excellent / G - Good / F - Fair / P - Poor

1,1,1-Trichloroethane, 99%	NR	NR	NR	*
Tricresyl Phosphate, 90%	G	P	G	*
Triethanolamine, 85%	E	F	G	E
Turpentine, 100%	NR	NR	E	NR
Zylene, 99%	NR	NR	E	NR

Degradation Rating:

E = Excellent / G = Good / F = Fair / P = Poor
NR = Not Recommended / * = No DATA

*TEST DATA IS INTENDED AS A GUIDE ONLY. IT IS RECOMMENDED THAT YOU PERFORM YOUR OWN EVALUATION BASED ON ACTUAL WORKING CONDITIONS.

PRODUCT MERCHANDISING

Promotional Displays

BIG04

Bulk bin 1/8 pallet floor display. Ships assembled and loaded with gloves ready to go; just remove the shipper! Holds 6 to 18 dozen gloves.

Assembled size: 30" H x 12" W x 19" D
Floor space:1.6 sq ft
Shipper size:24 x 12 x 30"
Ship UPS

BIG01

Our largest! Bulk bin quarter pallet floor display. Holds 12 to 36 dozen gloves. Ships assembled and loaded with gloves ready to sell!

Assembled size: ...36" H x 23" W x 19" D
Floor space:3.0 sq ft.
Shipper size:24 x 20 x 36"
Ship UPS

TGDMP

Promotional floor dump display. Holds 6 to 12 dozen gloves; tray ships assembled; only need to assemble base.

Assembled size: 51" H x 19 1/2" W x 27" D
Floor space: 23 1/2" H x 19 3/4" W x 11" D
Shipper size:3.6 sq ft.
Ship UPS

SRCLIP

12 position clip strip. Holds 1 dozen pair. Height 39" with gloves. Includes label holder/scan plate. Ships two clip strips per case with gloves prehung for quick sale.

Shipper size: ...39 x 6 x 5"
Ships UPS

WK06 Powerwing WK06F Floor Display

Two tray powerwing display insert. Use as one 48" powerwing display or split up to use as two 24" powerwing displays in separate locations. Ships assembled & loaded. With 2 header cards.

Assembled:52" H x 13 1/2" W x 4 1/2" D
Shipper size:24 x 14 x 9 1/2"
Ships UPS

WRK04-WL Counter / Pegboard / Slatwall Display

Permanent wire display that can be used as a 4 facing counter or shelf display, or use in pegboard or slatwall as a two row 8 facing display. Scan plates for all facings. No assembly required except for header card placement.

Assembled (single row): .24" W x 12" D x 15" H
Assembled (double row): .24" W x 12" D x 27" H
Counter space:2.0 sq ft
Shipper size:16" W x 13" H x 21"
Ships UPS

DPLY20

Promotional shelf / counter display. Hold 3 to 5 dozen gloves. Ships assembled and loaded.

Assembled:16" W x 8" H x 12" D
Counter space:1.3 sq ft
Shipper size:16 1/2" x 12 1/2" x 8 1/4"
Ships UPS
