

GROOMING  BOARDING  DAYCARE

Senior dog release form

We Love our Senior Guests at Lucky Dog, and it's our privilege to care for pets in every stage of their life. Because your pet is considered a senior dog (age 8 & up) at our facility, there are a few things that it's important for you to understand.

As dogs age, much like humans, their bones and joints can change, energy levels decrease, stress can have an increased influence on their health, and sometimes their immune system can weaken. We work very hard at Lucky Dog to give each guest the perfect experience, so playtimes may be a little shorter, potty breaks a little more frequent, and sometimes we may even take seniors home with us at night to ensure they have 24 hour monitoring and a break from our fun free play environment.

All precautions to provide the best quality of care to your senior pet will be taken. If problems do arise while your pet is in our care, we will do our best to inform you promptly, but if you cannot be reached, we will use our professional discretion and seek veterinary care. Likewise, if your pet becomes ill after their visit we ask that you please notify us, as some reactions are common, but others can be very serious. It is critical that the team understand your pet's health and any changes from previous care that are needed every visit going forward. Thank you for helping us provide the best care for your senior pet.

Please circle any that apply to your dog:

Hearing & Vision---Heart Worm Positive---Seizures---Diabetes---Congestive Heart Failure---Incontinence---Diarrhea---Vomiting---Low Blood Pressure---Respiratory Issues---Allergies---Skin Infections---Joint Pain---Joint Problems

Any other issues we should be aware of
