

# CIAAG 8-Point Strategy: Oversight

**CIAAG has developed an 8-Point Strategy to address healthcare disparities in the nation. Recent policy changes devised to combat drug misuse have exacerbated healthcare disparities in a number of areas.**

**We have identified 8 areas of public policy that need to be addressed in order to accomplish the nation's goals of reducing healthcare costs, decreasing disability rates and overdose rates.**

**The 1st point of the 8-Point Strategy is focused on Oversight, including but not limited to, the following:**

- Develop Public-Private Partnership Committee
- Review the composition of the Federal Opioid Task Force/Committee's and remove anyone with personal bias and/or conflicts of interest
- Ensure representation on Federal Opioid Task Force/Committee's for individuals living with painful illnesses/conditions who are free of bias and financial conflicts of interest.
- Develop Clinical Research Oversight Committee
- Develop an Accountability Office for reporting concerns of corruption and abuse
