

The Otto Building, Hackney, London

Fuller and Thomas Construction Ltd completed this project for Eco Green Roofs and McLaren Construction.

The project was completed in 2021 to a fantastic finish. The job included raising floor levels, decking, building play equipment and planters, wet pour play surfaces, plants, trees and poly tunnels.

Being the roof of a school, the work needed to be completed quickly and quietly and to a safe standard, all parties involved were very happy with the finish.
